16437 Newbury Court Summary

In July 2021, the resident has underground electric work that failed and required a re-inspection. Per the City's code, there is a $100 re-inspection fee that is required before it is re-inspected. The City's records show it failed but later that it passed. However, the City does not have a record showing payment in 2021. The resident advises that he received his rebate checks in 2021, 2022, 2023, and 2024; however, did not in 2025.

The resident has a receipt showing he submitted his rebate application in 2025, but he has advised that he did not receive a letter advising him that he owed a fee and/or that his rebate application was denied because of an outstanding fee.

He plans to apply for the current 2026 rebate, but wants this issue resolved so that application is not denied.
