

EXHIBIT I: City of Crest Hill Standards for Special Uses

SECTION 12.7-6 STANDARDS FOR SPECIAL USES, [CREST HILL ZONING ORDINANCE](#)

No special use, including Planned Unit Developments, shall be recommended by the Plan Commission unless said Commission shall find:

- 1. That the establishment, maintenance, or operation of the special use will not be detrimental to or endanger the public health, safety, or general welfare.**

The establishment, maintenance, and operation of the proposed Contractor-Based Business will not be detrimental to or endanger the public health, safety, or general welfare. Contractor-Based Businesses are generally low-intensity in nature, with the majority of work occurring off-site and limited on-site activity related to office functions, equipment storage, and dispatching. As such, the use is not expected to generate significant noise, traffic, or environmental impacts beyond those typically associated with permitted commercial and light industrial uses on the Broadway Street Commercial Corridor.

Potential impacts to public health and safety—such as vehicle movements, outdoor storage, and operational activities—will be effectively managed through compliance with the applicable zoning regulations, building codes, and performance standards. Measures such as designated parking and loading areas, proper screening and buffering, adherence to hours of operation, and safe ingress and egress will ensure that the proposed Contractor-Based Business operates in a controlled and orderly manner. In addition, the property will be subject to oversight by local authorities, including fire, police, and code enforcement, further ensuring that all activities are conducted safely and in accordance with the applicable regulations. Accordingly, with appropriate site design and regulatory compliance, the proposed Contractor-Based Business will not pose a risk to public health, safety, or general welfare and is compatible with the surrounding area.

- 2. That the special use will not be injurious to the use and enjoyment of other property in the immediate vicinity for the purposes already permitted, nor substantially diminish and impair property values within the neighborhood.**

The proposed Contractor-Based Business will not be injurious to the use and enjoyment of other properties in the immediate vicinity for permitted purposes, nor will it substantially diminish or impair property values within the neighborhood. Contractor-Based Businesses are typically characterized by limited on-site activity, with most operations occurring off-site. As a result, impacts such as noise, traffic, and customer activity are generally minimal and comparable to other low-intensity commercial or light industrial uses in the Broadway Street Commercial Corridor. Any potential external effects—such as vehicle storage, equipment, and materials—will be effectively mitigated through appropriate site design, including screening, fencing, landscaping, and designated storage areas.

In addition, adherence to the zoning regulations governing hours of operation, screening, and access, will ensure that the use remains compatible with surrounding properties. Proper ingress and egress design will minimize traffic disruptions, and buffering measures will protect nearby residential and commercial uses. Given these considerations, the operation of the proposed Contractor-Based Business at the Subject Property is not expected to interfere with the reasonable use and enjoyment of neighboring properties. On the contrary, maintaining and utilizing the Subject Property in a productive manner may contribute positively to the Broadway Street

Commercial Corridor by reducing vacancy and underutilization. Therefore, the proposed Special Use will not adversely affect nearby property values or the overall character of the neighborhood.

3. That the establishment of the special use will not impede the normal and orderly development and improvement of surrounding property for uses permitted in the district.

The establishment of the proposed Contractor-Based Business will not impede the normal and orderly development and improvement of surrounding properties for uses permitted in the existing Zoning Districts. The Subject Property is located on the Broadway Street Commercial Corridor which accommodates a mix of uses that is transitioning toward commercial or light industrial activities. The proposed Contractor-Based Business is consistent with this pattern and represents a low- to moderate-intensity use that can coexist with the other permitted uses in the on the Broadway Street Commercial Corridor. The nature of the operation—primarily involving office functions, storage, and dispatching—does not preclude or conflict with the future development opportunities on the adjacent properties.

Furthermore, the proposed Contractor-Based Business will be subject to applicable zoning regulations and performance standards, ensuring that site design, access, screening, and operational characteristics remain compatible with the surrounding properties. These measures will help maintain an orderly development pattern and prevent adverse impacts that could otherwise hinder neighboring investment or redevelopment. In addition, the productive use of the existing commercial property will contribute to the overall stability and attractiveness of the Broadway Street Commercial Corridor, supporting continued reinvestment and improvement. Accordingly, the proposed Special Use will not interfere with, but rather align with, the planned and anticipated development of the Broadway Street Commercial Corridor and the surrounding area.

4. That adequate utilities, access roads, drainage, and/or other necessary facilities have been or are being provided.

Adequate utilities, access roads, drainage, and other necessary facilities are in place to support the proposed Contractor-Based Business. The Subject Property will benefit from City's water main extension to the east side of Broadway Street, by dedicating utility and sidewalk easement on the property, sealing the existing septic and water wells, and connecting to the City's water and sewer infrastructure. The anticipated demand associated with the proposed Contractor-Based Business is relatively modest and can be accommodated within the capacity of the existing infrastructure. Any required service connections or upgrades will be completed in accordance with applicable engineering standards and the City requirements.

The site has direct access to the Broadway Street Commercial Corridor that is sufficient to accommodate the type and volume of traffic generated by contractor operations, including employee vehicles and work trucks. Ingress and egress will be designed to ensure safe and efficient traffic flow, minimizing congestion and maintaining compatibility with the surrounding uses. Based on these factors, the necessary infrastructure and public facilities are in place to adequately support the proposed Contractor-Based Business.

5. That adequate measures have been or will be taken to provide ingress and egress so designed as to minimize traffic congestion in the public streets.

Adequate measures will be taken to provide ingress and egress designed to minimize traffic congestion on public streets for the proposed Contractor-Based Business. The nature of a Contractor-Based Business typically results in limited and predictable traffic patterns, with most vehicle trips occurring during standard business hours and consisting primarily of employee vehicles and work trucks. Customer traffic is generally minimal. The site will be designed to accommodate these patterns through clearly defined access points that provide safe and efficient entry and exit.

The proposed internal circulation will allow for the orderly movement of vehicles, including sufficient space for maneuvering and staging, thereby preventing queuing or congestion on the adjacent Broadway Street. Additionally, on-site parking and loading areas will be provided in accordance with zoning requirements to ensure that all business-related vehicles are accommodated on the property. Based on these considerations, the proposed ingress and egress design will effectively minimize traffic congestion and ensure safe and efficient access to and from the site.

6. That special use shall in all other respects conform to the applicable regulations of this Ordinance and other applicable City regulations, except as such regulations may in each instance be modified by the City Council pursuant to the recommendation of the Plan Commission.

The proposed Contractor-Based Business will conform to the applicable regulations of the Crest Hill Zoning Ordinance and applicable City requirements. The site is designed in accordance with applicable landscaping, screening, and fencing regulations to ensure compatibility with the surrounding properties. In addition, the proposed Contractor-Based Business will adhere to all building, fire, and life safety codes, as well as any applicable licensing or operational requirements. Accordingly, the proposed Special Use will be developed and operated in full compliance with the Crest Hill Zoning Ordinance and all other applicable City regulations.
