(#2) Motion by Alderperson Oberlin seconded by Alderwoman Gazal, to Conduct a Public Hearing for the City of Crest Hill's Fiscal Year 2025/2026 Annual Budget.

On roll call, the vote was:

AYES: Ald. Methvin, Jefferson, Gazal, Oberlin, Cipiti, Alber, Kubal, Dyke.

NAYES: None.

ABSENT: None.

There being eight (8) affirmative votes, the MOTION CARRIED.

Public Hearing opened at 7:24 p.m.

Finance Director Glenn Gehrke delivered a comprehensive budget overview with the following highlights:

- A combined federal budget deficit of \$2,617,682.00 due to reliance on fund balances.
- Projected total water/sewer capital projects at \$15,030,000.00 with \$9,922,392.00 eligible for grant reimbursement through the IEPA, DCEO, and CDBG grants.
- General fund revenues set at \$12,762,249.32 and expenditures at \$12,756,193.75, resulting in an anticipated \$6,055.57 surplus.
- A reported \$2.3 million surplus in the water/sewer fund targeted for future water projects.
- Liquid assets are approximately \$27 million.

Director Gehrke articulated the city's robust reserves surpassing minimum requirements, reinforcing its AA bond rating. Upon conclusion of the presentation, the Council engaged in discussions, spearheaded by Alderperson Oberlin, concerning reserve funds' allocation for infrastructure projects.

Director Gehrke, supported by Interim City Administrator Tony Graff, clarified that these reserves are earmarked for imminent water projects, especially toward commitments with the Grand Prairie Water Commission. Emphasis was placed on the critical nature of these financial reserves in maintaining the city's solidity, particularly given the \$33.5 million investment needed for water infrastructure, pivotal for the City of Crest Hill's transition to Lake Michigan Water by 2030.

Alderwoman Gazal commented that we have eight months of reserves but only supposed to have two months in reserve and asked what the purpose is of keeping that money in reserve when we have fractured streets. Director Gehrke commented that the minimum to keep money in reserve is two months and you want to keep that money in reserve since you have many projects coming up for that Grand Prairie Water Commission and it is expensive. It was then stated that some of the reserves will be going toward that project with the Grand Prairie Water Commission and when we get to the year 2026/2027 and must pay back the capitol projects the money would be in the bank.

Further dialogues underscored that these reserves provide financial safeguarding, allowing steady operational cash flow and project funding management without unforeseen borrowing needs. Reference was made to projected contributions essential for sustaining appropriate water and sewer rates, aligning with Grand Prairie Water Commission's fiscal obligations.

Mayor Soliman asked if anyone in the audience would like to approach the podium and make a comment or ask a question. There were none.

Treasurer Conklin thanked Director Gehrke for putting the budget together in such short notice. Treasurer Conklin also commented that Director Gehrke had assistance from the department heads and staff and everyone was very helpful.

Director Gehrke thanked the staff and department heads for helping and doing the best for the city and he stated that it is nice to work for a municipality where everyone comes together and the city should be proud of that.

Director Gehrke commented that he forgot to include the ordinance and asked if we can have another meeting to vote on the ordinance prior to April 30, 2025.

Attorney Stiff commented that this would be a special regular meeting with one agenda item and then you can move onto the work session meeting.

Mayor Soliman asked for a motion to close the Public Hearing for the City of Crest Hill's Fiscal Year 2025/2026 Annual Budget.

CONDUCT A PUBLIC MEETING FOR THE MS4 ANNUAL UPDATE:

City Engineer Ron Wiedeman provided an update on the city's MS4 (Municipal Separate Storm Sewer System) permit compliance efforts, highlighting six key responsibilities the city upholds annually. This permit is renewed every five years. The update detailed efforts in the following areas:

- Public Education and Outreach on Stormwater Quality: Initiatives include regular updates on the city website and social media to educate the public about keeping water clean. The city regularly publishes educational materials to inform residents about the impact of stormwater pollution and how they can help prevent it.
- Public Involvement and Participation: The city encourages public participation through events like the meeting held that day, serving as a forum for transparency and community engagement. Public involvement is an ongoing aspect of the program, with opportunities for the community to provide feedback and learn more about the city's water quality initiatives.
- Illicit Discharge Detection and Elimination (IDDE): The city operates a pre-treatment program monitored annually to identify and eliminate unauthorized discharges into the storm sewer system. Residents are urged to report any suspicious activities such as oil dumping by contacting Public Works at 815-741-5108.
- Construction Site Stormwater Runoff Control: Routine inspections are conducted on construction sites to ensure compliance with local and state stormwater management regulations. Inspections are conducted before and after rain events, and the city requires developers to submit reports on compliance.
- Pollution Prevention and Good Housekeeping Practices: This involves routine maintenance activities by Public Works such as street sweeping and catch basin cleaning to minimize pollutants entering the storm sewer system. The city aims to reduce pollution through effective maintenance and operational strategies.

Engineer Wiedeman emphasized the importance of the MS4 program, which stands for Municipal Separate Storm Sewer System, as part of the Clean Water Act. The program plays a crucial role in protecting water quality by preventing pollutants from entering water bodies through stormwater runoff. Engineer Wiedeman noted that municipalities have a significant impact on water quality through land use decisions and public works operations.

Regular inspections are conducted on major outfalls annually and on all other outfalls every three to four years to ensure they are in good condition.

Additionally, he clarified the definition of illicit discharge, citing examples such as yard care products, automotive fluids, and sewage waste. Engineer Wiedeman also pointed out exemptions in the program like dechlorinated pool discharges and firefighting activities.

The City also has a permit renewal every five years, and they are currently preparing for the upcoming renewal period. This requires documentation of compliance with program components and submission to the appropriate regulatory authorities. Engineer Wiedeman reiterated the positive impact of these efforts on keeping the water safe for drinking, fishing, and other activities, helping to maintain the ecological balance and environmental health of Crest Hill.

Mayor Soliman asked if anyone had any questions or comments regarding the MS4 Annual update. There were no questions from the Council or public following the update, indicating comprehensive understanding and satisfaction with the current MS4 compliance efforts.
