ELECTRICAL INTERCONNECTION AND EXCHANGE AGREEMENT

Industrial customer has installed a solar power generation source (roof mounted solar panels) that will be interconnected with the city's distribution system.

Whenever someone attaches a power generation source to our distribution system, such as a solar power system, they are required to meet certain guidelines to prevent negative impact to our system. We also must visually inspect and field test that the system operates in accordance with our guidelines.

We have completed the field test portion of the requirements. The terms for operating the solar generation system are outlined in the provided standard agreement, and have been signed by the owner. I'm requesting your authorization to allow the Mayor and city clerk to sign and execute the agreement on the City's behalf.
