

CITY COUNCIL ITEM SUMMARY

MEETING DATE:	May 16, 2024
SUBCATEGORY:	Bid Award/Purchases
DEPARTMENT NAME:	Public Works
AGENDA ITEM TITLE:	Terrell Heights Phase II Stormwater Improvement
DEPARTMENT SUMMARY RECOMMENDATION:	<p>Due to the high bids that Public Works received last year, Phase I of the Terrell Heights Stormwater Improvement project was performed by our Public Works' crews. However, due to the complexity of Phase II, we decided that this part of the project would be rebid. This phase included stormwater installation, various utility repairs, upgrades and re-alignments and the installation of a detention pond (Alternative 2). Barge Design, the design engineer, assisted the city with bidding and review. On April 26, 2024, we received bids from four contractors to perform the work. The overall low bidder for the base project and both alternative bids was HD Excavations and Utilities from Villa Rica, Georgia for \$1,511,550.00.</p> <p>Our design engineer has reviewed all bid documents and recommends issuing a Notice of Award and entering a contract with the low bidder, HD Excavations and Utilities</p> <p>Public Works will utilize America Rescue Plan Act (ARPA) Funds for this project. To qualify for these funds, we feel that this project would help our stormwater division "manage, reduce and recapture stormwater" resulting in reduced flooding at this location. Therefore, this project would meet the requirements for eligibility of ARPA funds.</p> <p>An estimated \$309,360.00 will use water/sewer funds, while the remaining \$1,202,190.00 will be funded by ARPA funds. The \$309,360.00 water/sewer portion is not budgeted but will be paid from sewer revenue. Public Works recommends accepting the bid from HD Excavations and Utilities and allowing the mayor to sign the Notice of Award and the associated contract provided by our design engineer.</p>
