No, paving and milling operations should stop at the railroad right-of-way on either side of the crossing.

5. Regarding note 15 in section 400 – General Notes, it appears to be a carry-over from a previous project. Is that correct? Also, will we be required to mill and pave into the side streets if applicable?

No, the contractor will not be required to mill and pave into the side streets.

6. Is it the city's intent to reclaim the gutter line? There are several streets that are currently paved into the gutter making it hard to tell if it's header curb or if it's curb and gutter, how much extra milling depth will be required to pave back flush if reclaiming the gutter line is what's desired.

No extra milling is required beyond the standard depth to account for the resurfacing to be put down.

7. Could you clarify what the patching depth will be either 4 or 6 inches or is this to be determined in the field?

The patching depth is to be determined in the field.

**CERTIFICATE EXPIRES: April 30, 2025**

**PRIMARY WORK CLASS/CODE: 400**

**SECONDARY WORK CLASS(ES)/CODE(S): 205, 209, 301, 310, 432 and 550**

The total amount of incomplete work, regardless of its location and with whom it is contracted, whether in progress or awarded but not yet begun, shall not exceed the Maximum Capacity Rating. If dissatisfied with the Rating, we direct you to the Appeals Procedures in §672-5-.08 (1) & (2) and §672-1-.05, Rules of the State Department of Transportation.

A Subcontractor may request an extension of its current registration **prior** to the expiration date of the registration by providing the Department with the following information: the amount of time requested for the extension (either 30, 60 or 90 days), the reason for the extension request and the original expiration date of the registration. The Department in its discretion will determine whether the extension should be granted and will notify the Contractor of its determination.

Allowing approved registration to lapse will leave the Subcontractor without the ability to bid work until such time as the standing returns to an approved status. If you desire to apply at some intermediate period before the expiration date, your Rating will be reviewed based on the new application.

This Certificate is issued for contractors to be eligible for work with the Georgia Department of Transportation (GDOT) only. GDOT does not certify contractors as eligible to do business with entities other than GDOT. *Work class codes are for reference only and do not represent a certification to be provided in support of contractor ability or NAICS code determinations. NAICS Codes are assigned by the office of Equal Employment Opportunity.*
