PRODUCT / SERVICE	DESCRIPTION	UNIT PRICE
System Observations	Old style Parking Lot Lighting fixtures. The parts to repair the fixtures are becoming harder and harder to purchase. The older style 250 watt design is being phased out. This type ballast and bulb have quite a bit shorter life span than LED fixtures. Ballast cost if we can find them is \$125.00 each. Bulb cost is 25.00ea. Due to covid and inflation lighting fixture and parts have gone up in price.	\$0.00
Premium Option	Replace 11 Parking Lot lighting fixtures, with new LED Parking Lot Lighting fixtures. Rework the wiring at each Pole to accomodate new LED Lighting Fixtures.	\$10,155.80
Standard Option	Replace 11 ballasts and bulbs to each Pole. Rework wiring in each fixture.	\$7,210.00

thank you! We appreciate your business!
