

**TO:** Mayor and City Council of the City of Dacula  
**FROM:** Brittni Nix, Director of Planning & Economic Development  
**DATE:** June 27, 2022  
**SUBJECT:** Bid package for McMillan Road stormwater improvements

---

The McMillan Road stormwater improvements bid documents have been finalized and provided for your review. In order to alleviate the current flooding issue along McMillan Road, sections of the existing storm sewer system located through the City's property will be demolished. A new storm sewer system will be installed along McMillan Road and extended westward along the stream until discharged. Existing storm pipe crossing under McMillan Road will be replaced with a new RCP culvert and junction box adjacent to Falcons Plaza.

Additional improvements to McMillan Road include regrading, installing curb and gutter along the west side, and repaving. The City property will be used as the construction area for the project. All existing pavement within the fence limits will be removed and the property fine graded prior to project completion.

The proposed improvements have an estimated OPCC (Opinion of Probable Construction Cost) of \$576,043.05, which includes a 20% contingency. This project is fully funded by the American Rescue Plan Act (ARPA) federal funds.

Staff requests the Mayor and City Council approve the bid package as provided and grant authorization to solicit for public bids.

Best Regards,

Brittni Nix, Director of Planning & Economic Development
