 Other Conditions of Sale:

Quote Expires in 90 Days

Installation to be provided by QRS to customer installed RJ21X or 66 Block

Customer's radio, telephone, CAD and mapping vendors should provide the proper inputs identified and terminated within 6 feet of the recorder's physical location prior to installation by QRS. Additional charges may apply if the VoIP codec is anything other than G.711 PCM codec. Audio needs to be unencrypted

Price includes one year warranty which covers monitoring, parts, and onsite/remote labor

Service if needed may be obtained by calling (877) 733-7771 ext. 2

Equipment will be ordered and installed 30 days ARO unless agreed upon other wise, in which a written letter with requested install date will be required

Payment terms are net 30 days from invoice / installation

Customer is responsible for insuring the necessary 3rd party licensing, installation, and integration work is completed by its other vendors.

If the end user is not ready for the installation on the agreed upon date, the system will be shipped to end user and an invoice will be sent for 50% of total purchase price. Upon completion of the install and training, the remaining balance will be invoiced.

Quality Results Begin with Quality Recording Solutions

Dallas Police Department
120 Main Street
Dallas, GA 30132

August 29th, 2024

To Whom It May Concern:

Eventide has released the NexLog DX series of recorders. The NexLog Classic series which includes the NexLog740, will be upgraded to the NexLog740DX. Quality Recording Solutions has submitted a proposal to upgrade the NexLog740 recorders located in Dallas PD to the NexLog740DX. Quality Recording Solutions is the only fully authorized Eventide factory trained sales and service center for Georgia & Alabama.

The upgrade will bring the Eventide recording solution located in Dallas PD up to the latest platform of Eventide recording solution platform. The NexLog740 in use by Dallas PD is running software version 2.8.5 Upgrading to the NexLog740DX will bring it to the most current version of Eventide software, version 2023.1.

Once upgraded to the NexLog740DX, the recorder will be running the latest Linux OS which provides more security and higher protection from potential cyber-attacks. The database and some software licenses will be migrated from the NexLog740 into the NexLog740DX during the upgrade process.

The call database that resides on the NexLog740 can only be migrated to the NexLog740DX due to the proprietary encryption that is specific to Eventide recorders. Once the NexLog740 database is transferred to the NexLog740DX, all the calls and radio transmissions will be available for search and playback. The NexLog740DX will optimize the previous database, which increases overall performance, making for quicker searches. Quality Recording Solutions has maintained the Eventide NexLog740 recorder Dallas PD since 2017 and we look forward to continuing to work with them as we upgrade their recording solution to the DX platform.

Regards,

Alex Spencer, Vice President
