To Whom It May Concern,

SELEX-ES/ELSAG ALPR Systems is uniquely positioned in the state of Georgia as well as the country to provide the very best in law enforcement LPR solutions. Partnered with our local distributors, Madden & Associates, to provide the highest level of local and remote tech support.

ELSAG ALPR Systems is the sole LPR provider for the growing National HIDTA LPR Network. This is a LE ONLY LPR network not owned by a private company, therefore there is no worry about sensitive LE information being compromised on a private company's server. The National HIDTA LPR Network is the only LPR network with not only the NCIC and GCIC hot lists, but the DEA Cat 4 and HIDTA BOLO lists. Naturally, local agencies can add their local hot lists as well. There are NO ongoing user fees or user licenses on the HIDTA LPR Network, unlike our competitors who house data on private company servers.

ELSAG ALPR Systems proudly manufacturers all of its LPR systems in Greensboro, NC and we welcome our friends in law enforcement to come tour the facility. Our Tech Support and software development is also done in the U.S., so no offshore phone calls to the help desk with ELSAG.

Georgia is a great state for our business with Madden & Associates leading the way with customers like Georgia State Patrol and their 80+ mobile units, 60+ fixed cameras on the major highways in and out of the state. There are many, many more city and county agencies in Georgia all sharing LE LPR data on the HIDTA LPR Network. What this means for the local agency is that investigations can be queried in and around your local area of operation. The high-end EOC analytics provides a world class granular investigation tool, user interface, hot list management, and alerting structure. All while being CJIS compliant.

Please be advised that T.J. Madden & Associates of Buford, Georgia is the sole representative group for SELEX-ES Inc.'s ELSAG ALPR Systems in the states of North Carolina, South Carolina, Georgia, Alabama Mississippi and Tennessee. Furthermore, ELSAG ALPR Systems are the only ALPR technology systems that connects to the HIDTA ALPR Network.

Please let me know if you have any questions.

Kindest Regards,
