**Please Provide A Summary of Your Request, Including Background Information to Explain the Request:**

This would authorize Task Order 001 under the Master Services Agreement with Arcadis to perform a comprehensive drainage and flooding evaluation of the Prater Alley basin near City Hall.

The purpose of this study is to identify through detailed stormwater models the existing system capacity, identification of critical flood event, and an evaluation of several scenarios that could reduce flood occurrences. A second phase would be required, in the future, to develop construction plans for the selected improvements to be implemented.

See attached Task Order for additional information about the scope of the project.
