Childers Associates File No. 031.1-24

Dear Ms. Brooks:

In accordance with your request, I analyzed the updated project plans submitted to me for the purpose of updated my previous appraisal, dated August 29, 2024. This update appraisal revises the sizes of the proposed acquisitions and the estimated just compensation due to the property owner. I have not reinspected the subject property for this update. The descriptions and analyses presented in the previous appraisal are included herein unless otherwise noted.

I inspected the above referenced property for the purpose of estimating the market value of the property rights proposed for acquisition. Additionally, I also considered the impact of the proposed acquisitions on the remaining property and determined that the remainder is unaffected by the acquisitions. Therefore, only the underlying land and property rights acquired will be appraised. The attached analysis and conclusions represent an appraisal presented in a summary report format. All of the supporting data and analysis needed to fully understand the appraisal is included herein.

The purpose of the appraisal is to establish the just compensation due to the property owner in consideration of the proposed acquisitions. The intended use of the document is to facilitate the City of Dalton's negotiations to acquire the necessary property rights from the property owner. The intended users of the report are the City of Dalton – as the client – and its authorized representatives, including yourself.

Ms. Devon Brooks

The effective date of value for the appraisal is the date of my most recent inspection, August 15, 2024. Based on my analysis included herein, the estimated just compensation for the proposed acquisitions is:

DESCRIPTION OF PART ACQUIRED

Land

Permanent Easements

Size:

Easement 1: 155 square feet (along Glenwood)

Easement 2: 1,299 square feet (southeast corner)

Total: 1,454 square feet (shown in orange)

NOTE: The easements include one permanent drainage easement and one permanent sewer easement. The easement area is allocated as approximately 732 square feet for the sewer and 722 square feet for drainage.

General shape: Irregular (see sketch)
 Approximate dimensions: Easement 1: 31 feet along Glenwood and 5 feet deep
 Easement 2: About 32.5 feet wide on the southern edge, a combined 38 feet wide on the northern boundary; the southern portion ranges from 6.7 feet deep on the eastern edge to 17.50 feet deep on the western edge while the northern portion ranges from about 19.7 feet deep on the western side to about 20.8 feet on the eastern side.

Topography: Level but sloping downward to the southeast
 Flood plain/Wetlands: None
 Access/Driveways: The easements are situated along the southern portion of the Glenwood Avenue frontage and along the southern portion of the tract; access is not impacted by the acquisitions.

Remarks/Conclusions: The permanent easements are for the installation and maintenance of a 68-inch by 43-inch, elliptical concrete pipe that will be used for stormwater drainage; the easement will also be used to expand the existing sanitary sewer lines. The easements will allow the contractor the right to access and use the encumbered areas for the purpose of the project. The easement areas are too small and irregular in shape to support independent development. Therefore, the tract will be valued as part of the whole.

Temporary Construction Easement

Size: Easement 1: 1,012 square feet (along Glenwood)
 Easement 2: 27 square feet (southeast corner)
 Total: 1,039 square feet (shown in grey)

General shape: Irregular
 Approximate dimensions: See sketch
 Topography: Level but sloping downward to the southeast
 Flood plain/Wetlands: None
 Access/Driveways: None; the temporary easements are located to the rear of the permanent easements and do not have access to Glenwood Avenue.

Remarks/Conclusions: The easements are highly irregular in shape and lack sufficient depth and dimensions to support any independent use. The acquisitions will therefore be considered as part of the whole.

Improvements

The acquisition areas are unimproved.

IMPACT OF ACQUISITION ON REMAINDER

Size:	Unchanged
Shape:	Unchanged
Topography:	Unchanged
Grade:	Unchanged
Access/Driveways:	Unchanged
Exposure:	Unchanged
Distance to New Right of Way:	N/A
Distance to New Pavement:	N/A
Parking:	N/A
Describe Cross Sections:	N/A
Other:	The acquisitions will diminish the property rights slightly as a 1,454-square foot permanent easement is established on the land. The diminished property rights do not impact the use or utility of the land and have no impact on the remainder.

How does the acquisition affect the value of the remainder?

The acquisition involves two permanent easements for the installation and maintenance of a stormwater drain pipe and a sanitary sewer pipe and a temporary construction easement that will allow the contractor the right to access the encumbered areas. The easements are fairly small and do not alter the use or utility of the subject remainder. In this regard, the acquisitions are judged to have no impact on the value of the remainder.
