

# PROCLAMATION

## WORLD DUCHENNE AWARENESS DAY

**WHEREAS**, Duchenne muscular dystrophy (Duchenne) is the most common fatal genetic disorder diagnosed in childhood, affecting approximately one in every 5,000 live male births each year; and

**WHEREAS**, the Duchenne gene is found on the X-chromosome, it primarily affects boys; however, it occurs across all races and cultures; and

**WHEREAS**, Duchenne results in progressive loss of strength and is caused by a mutation in the gene that encodes for dystrophin. Because dystrophin is absent, the muscle cells are easily damaged. The progressive muscle weakness leads to serious medical problems, particularly issues relating to the heart and lungs. People with Duchenne typically live into their late twenties; and

**WHEREAS**, Duchenne can be passed from parent to child, but approximately 35% of cases occur because of a random spontaneous mutation. In other words, it can affect anyone. Although there are medical treatments that may help slow its progression, there is currently no cure for Duchenne; and

**WHEREAS**, on September 7, 2024, World Duchenne Awareness Day will take place. Duchenne organizations around the world will raise awareness for all people living with Duchenne muscular dystrophy.

**NOW, THEREFORE I**, Annalee Sams, Mayor for the City of Dalton, hereby proclaim September 7, 2024 as World Duchenne Awareness Day in the City of Dalton and encourage our residents to increase their understanding and awareness of Duchenne muscular dystrophy.

*In witness whereof, I have hereunto set my hand  
and caused the seal of this city to be affixed.*
