

Engineering Memorandum

February 11th, 2026

RE: February 17th City Commission Meeting

ESRI RENEWAL AGREEMENT

This is the annual maintenance for the GIS software the city uses. It includes our enterprise software (SQL Geodatabase, Server and Portal), desktop software used by employees from several departments, along with the ability to publish web maps for public use and services giving various contractors access to our data.

The prices are available to us as a local government through a purchase agreement negotiated by the State of North Dakota with ESRI, the company that makes the GIS software.

The city engineering staff recommends approval.
