

Engineering Memorandum

February 11th, 2026

RE: February 17th City Commission Meeting

ESRI RENEWAL AGREEMENT

This is the annual maintenance for the GIS software license to be used by the newly hired GIS Technician. It is in addition to the renewal for software we previously licensed, a professional level license including many of the advanced capabilities available for both desktop and enterprise. The prices are available to us as a local government through a purchase agreement negotiated by the State of North Dakota with ESRI, the company that makes the GIS software.

The city engineering staff recommends approval.
