**COMPATIBILITY, COMPLIANCE, AND RECOMMENDATIONS**

**Compatibility with Local Uses, Compliance with The Zoning Ordinance and Consistency with the Comprehensive Plan**

The adjacent properties are zoned AG. Rezoning the subject property to RR would not introduce uses into the general vicinity that would be incompatible with the general development pattern. As the RR zoning district does not allow uses currently permitted in the AG zoning district, such as Type II animal production and Type III animal production, and as Type I animal production is only allowed in the RR zoning district with approval of a Special Use Permit, rezoning the property to RR would limit impacts on the residentially zoned properties located within a third of a mile to the east as well as residentially zoned property within one-half mile.

If approved, the proposed Wood Acres Subdivision would create residential lots ranging in area from 5 acres to 7 acres. As the minimum lot area in RR zoning is one acre, the lot areas in the proposed subdivision would comply with for RR zoning. The proposed rezoning also meets the purpose of the RR zoning district as listed in Article 39.04 of the City's Zoning Ordinance:

*This district provides for the rural residential use of land, accommodating very low and low density environments. The district's regulations assure that density is developed consistent with: land use policies of the Dickinson Comprehensive Plan regarding rural subdivision; levels of infrastructure; and environmentally sensitive development practices. The district also accommodates developments that merge urban living with rural life.*

Regarding consistency with the Dickinson 2035: Roadmap to the Future Comprehensive Plan; Policy 1.3.2. of Chapter 4-Land Use does not allow RR zoning within the Urban Service Area. As the subject property is located outside of the Urban Service Area the request is consistent with the Comprehensive Plan.
