STAFF ANALYSIS

CONSISTENCY, COMPATIBILITY, AND RECOMMENDATIONS

Consistency with Comprehensive Plan

The subject property, as well as adjacent properties to the north, east and west, are designated on the Future Land Use Map (FLUM) of the City’s Comprehensive Plan as RESIDENTIAL. According to Table 4-21 referenced in Policy 1.3.2 of Chapter 4-Land Use of the Comprehensive Plan, the AG zoning district is not deemed to be consistent with the RESIDENTIAL FLUM designation.

Staff finds the following:

- Approval of the proposed amendment would impact the FLUM by creating an area that is not consistent with the adjacent FLUM designations. It would essentially create an island

of AGRICULTURE designation permitting uses incompatible with residential uses in an area currently developed residentially;

- As the adjacent properties to the north, east and west are designated on the FLUM as RESIDENTIAL, and as the adjacent properties to the south are designated as INDUSTRIAL, the requested future land use designation is not compatible in relationship to abutting or adjacent future land use designation.

Compatibility with Local Uses

The applicant has indicated they are intending to construct a primary residence on one of the lots, and use the remaining land as a hobby farm or pasture land. The site is currently zoned RR. According to Table 62-162-2: Permitted Uses by Zoning Districts in the Municipal Code, Horticulture and Crop Production are permitted uses in RR-zoned districts, and Type 1 Animal Production, which involves small-scale livestock raising, is permitted through obtaining a Special Use Permit. However, if the FLUM is approved, and a proposed rezoning from Rural Residential to Agricultural would permit Type I Animal Production immediately adjacent to an established residential subdivision. Type I Animal Production is defined in Section 62-129 of the Zoning Ordinance as follows:

- *Type I animal production.* The raising of animals or production of animal products, such as eggs or dairy products on an agricultural or commercial basis on a site which is also used for crop production or where grazing of natural vegetation is the major feed source; or the raising of animals for recreational use. Type I Animal Production shall also include confined feeding and holding facilities consisting of no more than 20 feeder or fat cattle; no more than 20 beef cows; no more than 20 dairy cattle; no more than 50 swine, llamas, and ostriches or similar large birds; no more than 200 sheep; no more than 300 turkeys; and/or no more than 1,000 chickens, ducks, or geese. Typical uses include grazing, ranching, dairy farming, and poultry farming.

The following uses, which could be considered as incompatible with an established residential subdivision; are permitted in AG zoning:

- Kennels;
- Restaurants (generally); and
- Stables.

According to Table 62-162-2. Permitted Uses by Zoning Districts of the Zoning Ordinance, the following uses that may be considered as incompatible with an established residential subdivision could be allowed as special uses in AG zoning:

- Type II and Type III animal production;

- Livestock sales;
- Retirement residential;
- General offices;
- Campgrounds;
- Indoor and outdoor commercial recreation;
- Convenience storage;
- Surplus sales;
- Trade services;
- Veterinary services;
- Resource extraction;
- Petroleum storage and sales;
- Stockyards;
- Toxic gaseous storage;
- Landfill; and
- Motorized sports.
