Written Statement

The owner/applicant is submitting this Major Final Plat Application for Stockert's Third Subdivision to allow for the combination of Lots 1-3, Block 2 of Stockert's First Subdivision and all of Stockert's Second Subdivision. As part of this application, the right-of-way and easements within Stockert's Second Subdivision are proposed to be vacated. Utility company signatures on the City's vacation petition form have been submitted with this request. The right-of-way does not contain any public infrastructure and is not necessary to provide access to any property, especially once these lots are combined. This site contains two existing buildings with one of these buildings lying over the current property line and easement as shown by the plat drawing. Vacating the easement will resolve this issue.

This property is located within the City's ETZ. No public improvements will be required for this subdivision. The owner plans to utilize the existing access from ND Highway 22 or 24th Street SE on the north side of this plat to access the proposed lot.

A portion of this site is located within the FEMA Special Flood Hazard Area Zone 'AE'. This floodplain area and the topography are shown on the enclosed plat drawings.

The applicant does not own or intend to purchase any additional surrounding land at this time. To my knowledge, neighboring property owners have not been informed of this plan to date. This application has been prepared in accordance with local, state, and federal regulations. No changes to the plat have been made since Preliminary Plat approval.

Your consideration of this request is greatly appreciated. Feel free to contact me for any additional information or questions regarding this submittal. Thank You!
