RE: April 1st Commission Meeting

Downtown Stormwater Drainage Basin Retrofits/Upgrades Study BRIC Application Cost Share Letter

For your consideration is a cost share letter for the Building Resilient Infrastructure and Communities (BRIC) Program grant application that serves as a commitment of the City of Dickinson to provide the program's required local matching funds. A portion of the intent of the project is to increase the size of the storm drain system within Downtown Dickinson to limit flooding and better handle 10-year storm events. The project is included in the City of Dickinson's Drainage Master Plan. The maximum federal grant award is 75% from the BRIC Program, and the remaining 25% is local matching funds from the City of Dickinson. Based on the current estimates, this grant application is anticipated to be for **\$350,000**, and the City of Dickinson cost share is estimated to be \$87,500. This cost share solely factors in the scoping portion of the project.

The City Engineering staff recommends approval.
