

May 28, 2024

Joshua Skluzacek
Engineer – Community Development Director
Engineering Department
38 1st Street West
Dickinson, ND 58601

Re: East Broadway Dam Modification Project – Final Design Scope, Schedule, and Budget

Dear Mr. Skluzacek:

We are excited for the opportunity to continue working with you on the East Broadway Dam Modification project. We were previously contracted by the City to complete an alternatives analysis of three options to remove or replace the dam and then complete a 30% design of the selected alternative. This work was completed from summer 2021 to spring 2022. The City selected the alternative of removing the existing dam and constructing a new rock riffle spillway upstream of the current dam location.

This letter presents our scope, schedule, and fee estimate to take the project through final design, permitting, and provide bidding support. It also includes assistance with obtaining land along the east bank of the proposed rock riffle spillway and assisting with the title transfer of a second property located adjacent to the work. This scope assumes the concept shown in the 30% design will continue to be advanced, without significant changes. This scope does not include construction administration or engineering services during construction; however, these services could be contracted separately at a later date in time. This proposal has been updated to address land acquisition and public involvement updates requested by the City as well as address changes to the North Dakota administrative and technical requirements (issued in 2024) necessary for a construction permit.

1.0 Scope

Job 1: Project Management

Job 1 will consist of kicking off this phase of the project, managing the scope, schedule, and budget of the project, and meetings and other communications with the City.

We will provide a bi-weekly progress report that includes summary of milestone progress, actions completed the prior period, actions to be performed during the next period, budget summary, and a list of action items. We will also coordinate a monthly milestone meeting with the City throughout the duration of the project. The monthly meeting will be utilized to review and discuss the actions from the bi-weekly report.

Job 2: Detailed Design and Bidding Documents

Job 2 will consist of detailed design of the proposed rock riffle spillway and preparation of Issued for Bidding Plans, Specifications, and Engineer's Estimate of Probable Construction Cost. We will prepare submittals for the City to review at 65%, 95%, and final Issued for Bidding. Detailed Design and Bidding Documents consists of the following:

Task A: Hydraulic Modeling

We will finalize the hydraulic modeling that was started in the previous phase of the project, reflecting the final configuration to be constructed. The hydraulic model will be used to confirm there is "no-rise" in river levels upstream of the dam for permitting purposes. It will also be used to determine proposed water velocities, and those velocities will be used to appropriately size the rock used for the rock riffles and riprap bank stabilization. The hydraulic design will also be used to develop information to share with the Contractor to aid in the design of water management during construction of the project. A hydraulic memo will be prepared to document the modeling work that was done.

Task B: Design and Drawings

Detailed design of the rock riffle spillway will be completed, and we will prepare Drawings for use in permitting, bidding, and construction. Drawings will be prepared using AutoCAD Civil3D in compliance with Barr's CAD standards. Drawings will be issued at 65%, 95%, and Issued for Bidding. The 65% Drawings will be used in permit applications. The Issued for Bidding Drawings will be signed and stamped by a Professional Engineer licensed in the state of North Dakota.

Deliverables: PDF of Drawings at 65% complete, 95% complete, and Issued for Bidding.

Task C: Specifications

Specifications will be completed in accordance with the standards set forth by the Construction Specifications Institute (CSI). City Standards and Specifications will be followed as applicable. Specifications will be issued at 65%, 95%, and Issued for Bidding. We will also prepare the "front end" contracting documents (Division 00 Specifications) with input from the City. The "front end" contracting documents will be based upon EJCDC standard documents. The Issued for Bidding Specifications will be signed and stamped by a Professional Engineer licensed in the state of North Dakota.

Deliverables: PDF of Specifications at 65% complete, 95% complete, and Issued for Bidding.

Task D: Cost Estimates

We will prepare Engineer's Opinion of Probable Construction Costs for the project at 65% complete, 95% complete, and Issued for Bidding. The range of costs will be in conformance with ASTM E2516 for the level of design complete at the time of the estimate.

Deliverables: Engineer's Opinion of Probable Construction Costs at 65% complete, 95% complete, and Issued for Bidding.

Task E: Design Report

New Dam Safety Standards adopted by the ND DWR in January 2024 require a Design Report be submitted to the DWR for the Dam Construction Permit review and approval. We will prepare a design

report documenting the technical work of the project to accompany the 95% complete Plans and Specifications for the submittal to the DWR.

Deliverables: Design Report at 95% complete.

Job 3: Permitting

Barr will prepare and submit permit applications, on the City's behalf, for the following permits/approvals:

- Office of the State Engineering Dam Construction Permit
- State of North Dakota Sovereign Lands Permit
- USACE 404 Permit

It is assumed the 95% Plans will be used for permit applications and any permit fees will be paid by the City.

A cultural resources review will also be triggered by the USACE 404 Permit. Barr will contract Juniper, LLC (Juniper) to perform a cultural resources literature review and pedestrian inventory for the project site. The details of this scope of work, developed by Juniper, are attached to this proposal.

Additionally, Barr will facilitate a public input meeting in Dickinson to present the project to stakeholders and solicit input. We will prepare a presentation and several poster boards for the public input meeting. One Barr staff member will facilitate the meeting in person. We have assumed City staff will also attend the meeting and assist with fielding questions/input from the public. We have assumed this meeting will be held between the 65% and 95% design deliverable dates.

Job 4: Right-of-Way Services

The land on the east side of the river where the project will take place is privately owned by Riverfront North Dakota, LLC. The City has had discussions with this landowner, and the landowner has indicated they are interested in donating this property (the entire parcel) to the City. Assisting the City with obtaining this property is included in this scope of work.

Additionally, the City indicated that the parcel southeast of the parcel to be donated as part of the project currently also lists the owner as Riverfront North Dakota, LLC. This parcel has a building recently constructed by the City on the property, but the City's understanding is that the deed was never filed for the City to officially take ownership of this parcel. Preparing and filing the paperwork for the City to officially take ownership of this parcel is also included in this scope of work.

Barr will contract SRF Consulting Group, Inc. (SRF) to assist with right-of-way services, including preparing purchase agreement and donation documentation and coordinating with the landowner. Additionally, to ensure that both the landowner and City understand the value of the donation, an appraisal of the land value will be performed by Boulder Appraisal as a subconsultant to Barr. The details of SRF's and Boulder Appraisal's scopes of work are attached to this proposal.

Job 5: Bidding Assistance

During the bidding phase of the project we will advertise the bid for contractors on QuestCDN and in North Dakota newspapers, meeting North Dakota Century Code requirements. We will host a virtual pre-

bid meeting for interested contractors, respond to contractor’s questions during bidding, and prepare and issue addendum if necessary.

2.0 Schedule

The anticipated schedule to complete the various Jobs and Tasks identified in Section 1.0 of this document are summarized in Table 1. This schedule is updated to reflect the approval date of the cost share on April 8th and subsequent discussions with the City. We have assumed work will continue to proceed and formal notification of the updated change order acceptance will be provided by June 5, 2024.

Table 1 Anticipated Schedule

Milestone	Approximate Date
Notice to Proceed	June 5, 2024
DWR Cost Share Approval	Complete
Appraisal Report	August 23, 2024
65% Design Complete	September 6, 2024
95% Design Complete	November 22, 2024
Permit Applications Submitted	December 6, 2024
Land Acquisition Complete	December 20, 2024
Issued for Bidding Documents	February 3, 2025

3.0 Budget and Funding

Barr will bill you on a time and expense basis to be invoiced monthly. The budget presented in Table 2 will not be exceeded without prior authorization by you. The items highlighted are items that have changed from the previous change order to reflect changes to North Dakota rules and changes requested by the City.

Table 2 Estimated Budget

	Labor Hours	Labor Costs	Expenses	Sub-Contractor Total	Project Total
Job 1 - Project Management					
General PM	36.0	\$ 6,940.00	\$ -	\$ -	\$ 6,940.00

The ND Department of Water Resources (DWR) has approved a cost-share for the final design of this project, not to exceed \$106,908, as approved by the DWR Commission on February 8, 2024. It is likely the

DWR will also cost share the construction phase of the project, but funds for that phase will need to be requested in the future.

We will look for additional funding sources to support the construction as the design progresses. One funding source where we have been successful for similar projects in North Dakota is the Outdoor Heritage Fund. The Outdoor Heritage Fund can contribute up to 20% of the construction cost and requires the project to meet one of four categories. The one we have met with other rock riffles is fish passage.

4.0 Assumptions

We have made the following assumptions while preparing this scope, schedule, and budget:

- All deliverables will be provided in electronic pdf format.
- Meetings will be held virtually using Microsoft Teams or another online platform.
- We have not allocated any budget for Barr staff members to visit the site.
- The scope does not include construction administration or engineering services during construction.
- The concept shown in the 30% design will continue to be advanced, without significant changes.
- This scope does not include geotechnical investigation, analysis, or design but those services can be provided for additional fee should the need arise.
- The State of North Dakota will not require updates to the site hydrology and to the hazard classification. If necessary, we can provide those services for an additional fee.

We look forward to working with you on this interesting project. Please contact Jon Ausdemore or Matt Peterson regarding any questions.

Sincerely,

Jon Ausdemore, PE
Vice President, Principal in Charge

Matt Peterson, PE
Project Manager

RE: Cultural Resource Management Services for Literature Review and Pedestrian Inventory for the East Broadway Dam Replacement Project, Stark County, ND

Dear Mr. Peterson,

Juniper, LLC, is pleased to submit the following cost estimate for Cultural Resource Management Services for the East Broadway Dam Replacement Project in Dickinson, Stark County, ND. Our understanding of the project is based on emails and data received on July 11, 2023. Our estimated costs, our assumptions, and an outline of the cultural resource management tasks to be completed for the proposed undertaking are as follows:

- A not-to-exceed cost of \$9,106.50 for the Literature Review, Intensive Pedestrian Inventory, the overall project documentation and management, and
- A per unit cost of \$750.00 per cultural resource recorded during the Inventory after the first one recorded.

Our cost estimate includes the services outlined below and follows the approximate time frames to complete each task. The time frames are approximate and should be considered best guess estimates for the tasks based on our experience working on similar projects in the region. It is understood that the background research, fieldwork, and a draft report need to be completed and submitted to Barr as soon as possible for the project. We are confident that we can complete the fieldwork and reporting in a timely manner.

Cultural Resources

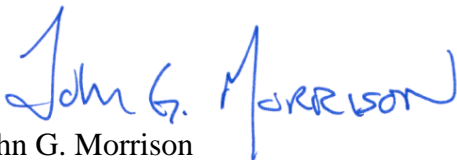

1. Completion of a Class I Literature Review:
 - a. Our anticipated start date is within ten business days of receiving written notice to proceed.
 - b. We anticipate completing this task within ten working days.
 - c. Juniper's Principal Investigator shall review the results of the Literature Review, including reading relevant portions of manuscripts for projects that overlap the project area and data in manuscripts relating to evaluations of cultural resources that may not be contained in the NDCRS forms.
 - d. Juniper's Principal Investigator shall review relevant historic maps, photos, and other online geographic data based on the file search data.

- e. If, through Juniper research, we find that the project area has been partially or completely inventoried in the past, we will notify Barr and consult about how to proceed with the proposed undertaking.
 2. The Intensive Pedestrian Cultural Resource Inventory of the project area:
 - a. The project area is currently undefined, but we assume that the project will be confined to the park areas directly surrounding the dam within Dickinson, ND.
 - b. Based on our estimates less than a 10 acre area will need to be inventoried for cultural materials.
 - c. If more than 10 acres are requested, Barr will be notified, and permission obtained to adjust our costs and time frames to account for additional effort needed to complete the work.
 - d. The project area will need to be staked or provided to Juniper in ESRI shapefile format (NAD 1983 UTM Zone 13 North or comparable datum), Google Earth file (.kmz or .kml file) or plotted on USGS7.5' maps prior to the start of fieldwork.
 - i. Juniper will consult with Barr prior to the start of any fieldwork to assure that the location and outline of the inventory area is correct and there have been no additions or deletions.
 - e. We anticipate having the inventory completed within two days of the start of the fieldwork, weather and field conditions permitting.
 - f. The cost assumes one continuous field effort to complete the fieldwork:
 - i. If the fieldwork is hampered by weather conditions, lack of landowner access, delayed consultation, lack of a defined project corridor, a shelter-in-place-order, or government prohibition of travel, or circumstances beyond Juniper's control, Barr will be notified, and permission obtained to adjust our costs and time frames to account for additional effort needed to complete the work.
 - ii. If the proposed fieldwork needs to be completed over several efforts, Barr will be notified, and permission obtained to adjust our costs and time frames to account for additional effort needed to complete the work.
 3. This cost estimate assumes the identification, recording, updating, and reporting of cultural resources (site, site lead, or isolated find) will be billed on a per unit basis after the first one recorded:
 - a. Each cultural resource which needs to be documented after the first one will be charged at a per unit rate of \$750.00.
 - b. Juniper assumes that the WPA era dam will need to be recorded as part of this project.
 - c. Juniper will notify Barr when more than one cultural resource is recorded.
 - d. GPS data (shape files) from the recording of the cultural resources may be provided (if requested) to Barr with the final report.
 - e. Please be aware that location data and descriptions of cultural resources need to be kept confidential and protected.
 4. The production of a professional quality report:
 - a. Our cost estimate assumes that one report will be produced for the project.
 - b. The draft report will be provided to Barr for their review and possible submission to the stakeholders within 60 days of the end of fieldwork.

- i. If more than one cultural resource is encountered during the inventory, Juniper will notify Barr and consult on a revised time frame for completion of the report.
 - ii. The revised time frame will assume a timely response from the ND SHPO for any requests for SITS numbers (normally 10-15 days).
 - iii. The ND SHPO has up to 30 days to provide SITS numbers.
 - iv. The report cannot be produced without the SITS numbers from the ND SHPO.
 - v. Draft copies of the report without SITS numbers will not be provided to Barr or to any agencies.
 - c. The report will be considered as final if Barr does not request any revisions in writing within five working days.
 - d. If changes to the report are needed, the final report shall be submitted to Barr within 15 days after Juniper has been notified of the necessary revisions in writing.
 - e. Please be aware that reviewing agencies have 30 days for document review.
 - f. If a reviewing agency requests revisions, a final report shall be submitted to Barr within five days after Juniper has been notified of the necessary revisions in writing.
 - g. Juniper will prepare a digital version of the report.
 - i. One hard copy of the report will be produced for submittal to the ND SHPO.
5. This cost estimate does not include costs for:
 - a. Formal evaluation (testing or historical documentation) of any sites encountered during the inventory.
 - b. Mitigation or data recovery excavations of any cultural resources encountered during the inventory.
 - c. Any monitoring of construction through or adjacent to cultural resources.
 - d. Assisting with in-the-field physical demarcation of sites, i.e., assisting survey crews with staking, flagging, or avoidance of cultural resources.
 - e. Native American Consultation (54 U.S.C. 306108§ 302701) that may be needed to complete the Section 106 process.
 - f. Any legal testimony arising out of project decisions.
 - g. Any services not contained in this scope of work and cost estimate.

If any portions of those additional services are required, the costs for the services will be developed in consultation with Barr. Again, we thank you for the opportunity to work with you on this project.

Sincerely,

John G. Morrison
Vice President/Principal Investigator

Re: Appraisal Bid Proposal
"City of Dickinson East Broadway Dam Project"
5.668 Acre Land Tract / Parcel ID #0664-0100-1700 & #0664-0100-1603
Owner/Donor: Riverfront North Dakota, LLC
Prospective Buyer/Donee: City of Dickinson

Dear Mr. Peterson:

Thank you for contacting Boulder Appraisal for your appraisal needs. Our fee to prepare an appraisal of the above referenced property is estimated not to exceed \$8,500 with delivery in approximately 30-60 days from engagement. Please note that this proposal is subject to change if any material changes are made to the provided information.

It's my understanding that the purpose or objective of the appraisal would be to establish the property's as-is fee simple market value for possible acquisition by the City of Dickinson. Therefore, the appraisal would be completed for you, the client, through the extension of the City of Dickinson.

The appraisal would be completed in conformance with the (a) *Uniform Relocation Assistance and Real Property Acquisition Policy Act* ("The Uniform Act) and the accompanying Sixth Edition of the *Uniform Appraisal Standards for Federal Land Acquisitions* (UASFLA) or "Yellow Book", (b) the 2024 Edition of the *Uniform Standards of Professional Appraisal Practice* (USPAP), (c) NDDOT Right of Way Manual and (d) Appraisal Institute's Code of Professional Ethics and Standards of Professional Appraisal Practice.

Thank you for your consideration. If you have any questions or comments, please inquire.

Respectfully submitted,
