**Subject:** Pennco Fire SCBA confidence course trailer?

Hello Melanie

Yes, Pennington County Fire Sponsors a SCBA confidence course that is made up of dimensional lumber and plywood. It is stored in a twin axle, enclosed trailer, please review the attached PDF for specific information concerning the trailer itself.

I have no problem with the Deadwood Volunteer Fire Department/City of Deadwood borrowing the trailer and confidence course under the following guidelines

- You break it, you fix it, this includes the trailer, course etc
- Tow Vehicle: highly recommend the trailer be towed with an agency vehicle capable of towing a twin axle trailer; Agency vehicle should have the proper insurance for the vehicle and the trailer/contents
- You will need help loading/unloading/assembly etc.
- I believe Chief Fetter has assembled and disassembled this course in the past.
- Recommend towing the trailer on a day with very little wind
- Please grease the bearing buddies with high speed bearing grease.
- Please insure the tires including the spare are at the recommended pressure
- Please repair/replace any course material that is damaged

Please give me a call if you have questions etc.
