The storage building in the rear needs to be taken down and removed from the property. The Front half of the building has fallen off and the roof has collapsed down to the ground, causing the pitch of the remaining roof to cave in on itself, and the side walls to pull in. I need to take the rest down and have it removed in a roll off. I will do the work myself. At a later date a 3 car garage will be put in its place, the garage will look very similar to the current building taken down. They make metal now that looks like weathered wood and that's what we plan to replace it with. I would like to remove now due to safety
