Mr. Kuchenbecker stated the applicant has submitted an application for project approval for work at 66 Taylor Avenue. The applicant is requesting permission to

repair the existing driveway by scraping and filling with new rock to bring the driveway up level with the garage. Clear a 10-foot-wide area on the right side of the garage and fill with the same rock and construct a 55' x 36" tall retaining wall using Versalok Diamond Block on the right side of the newly cleared space. The new fill will be moved to the back of the higher part of the yard to create additional feet to be used for planting a fruit tree and other local thriving plants/bushes/flowers. addition onto the front of the structure and remodel the current structure to create a residence. The proposed addition would have a 4/12 pitched shed style roof and a front western style overhang and porch with 6x6 post supports. The addition will add 12 feet to length of existing structure and 28 feet deep to match existing width. Lower portion will be sided with rustic tin from about 42-48 inches down. Upper portions will be sided with a man-made board and batten material. Tin roof to shed snow more easily. Staff and commissioners should utilize the standards set forth under South Dakota Administrative Rules in reviewing this project. Because the roof line presented in the project, it is staff's opinion the proposed work and changes does encroach upon, but does not damage or destroy a historic resource; furthermore, the project does have an adverse effect on the character of the building and the overall historic character of the State and National Register Historic Districts or the Deadwood National Historic Landmark District.
