

MUTCD Yield Signs

Section 2B.09 (D) Yield Signs may be used instead of stop signs if one or more of the following conditions exist:

An intersection where a special problem exists and the problem may be susceptible to correction by the use of a yield sign.

Section 2B.10 Yield Sign placement

The yield sign shall be located as close as practical to the intersection it regulates, while optimizing its visibility to the road user it is intended to regulate.

Except at roundabout intersections, where there is a marked crosswalk at the intersection, the YIELD sign should be installed in advance of the crosswalk line nearest to the approaching traffic.
