

Case No. 220067
Address: 6-10 Water St.

Staff Report

The applicant has submitted an application for Project Approval for work at 6-10 Water St., a noncontributing structure located in the McGovern Hill Planning Unit in the City of Deadwood.

Applicant: JNI Properties
Owner: IDEUS, JOHN A
Constructed: 1900

CRITERIA FOR THE ISSUANCE OF A PROJECT APPROVAL

The Historic Preservation Commission shall use the following criteria in granting or denying the Project Approval:

General Factors:

1. Historic significance of the resource:

This is a historic multi-family residence which has undergone substantial modifications. The building has a very large 2nd level addition, with an asymmetrical gable roof, as well as a modern first-level addition topped by an outdoor deck. Non-historic doors and windows are also visible. Because of the loss of integrity caused by these changes, this building cannot currently contribute to the Deadwood National Historic Landmark District.

2. Architectural design of the resource and proposed alterations:

The applicant is requesting permission to remove existing railing, install new 4" square heavy wire fencing panels in sections to fit existing metal support posts. Top and bottom rails will be 2" square tubing to match railing on walk bridge to property. All will be painted to match house paint.

Staff Opinion:

The proposed work and changes do not encroach upon, damage, or destroy a historic resource or have an adverse effect on the character of the building or the historic character of the State and National Register Historic Districts or the Deadwood National Historic Landmark District.

Motions available for commission action:

A: If you, as a commissioner, have determined the Project DOES NOT Encroach Upon, Damage or Destroy a historic property then:
