Bonny

Re: Deadwood Grant

This is a follow up to our conversation last Friday, August 21<sup>st</sup>, regarding our grant award of \$5,000.00 to construct the chimney on the McGillicuddy House. Per my explanation that we were not going to be able to construct the chimney at this time due to our funds being needed to complete other projects currently scheduled for the house, such as refinishing the original floor on the main level. You had indicated that we could request that those funds be used to finish the floor. The floor is clearly a defining feature of the house in that it is tongue and groove flooring laid in a pattern that contains several large Xs, a pattern that appears on Stick Style houses.

I have included several photographs. Please let me know if you need anything else from me.

Thank you,

Jean Kessloff
