Staff Report

DATE:

February 25, 2025

TO:

Honorable Mayor and City Council

FROM:

John Guertin, City Manager

SUBJECT:

Update of User Regulatory Fees

CEQA:

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. The approval of the resolution meets the above criteria and is not subject to CEQA. No additional

environmental review is required.

Recommendation

Adopt resolution updating and establishing user and regulatory fees. Updated fees will be effective July 1, 2025.

Background

This item provides findings and recommendations from the recently completed user and regulatory fee study. The user and regulatory fee study, completed with support from ClearSource Financial Consulting (ClearSource), provides an up-to-date analysis of the City's current costs of providing fee-related services. This information can be used by the City Council as it considers potential updates to fees. User and regulatory fees are set at the direction of the City Council at the conclusion of a public hearing to consider adoption of any new fees or fee increases.

The services for which a city imposes a user or regulatory fee typically derive from an individual person or entity's action, request, or behavior. Therefore, except in cases where there is an overwhelming public benefit generated by a city's involvement in the individual action, a fee for service ensures that the individual bears most, if not all, of the cost incurred by the City to provide that service. When a fee targets "100% or full cost recovery," the individual is bearing the entirety of the cost. When a fee targets less than full cost recovery, another City revenue source – in most cases, the General Fund – subsidizes the individualized activity.

Industry best practice and California statute are in harmony: User and regulatory fees should be set according to the estimated reasonable cost of service and should bear a fair and reasonable relationship to the payer's burdens on, or benefits received from, the activities and/or services provided by the City.

Ongoing review and adjustment of fees provides multiple benefits, including:

- Increasing the availability of General Fund revenues to be used for services and activities available to all Del Rey Oaks residents and businesses, such as public safety services.
- Keeping pace with general cost inflation.
- Avoiding fee spikes that are more likely to occur when municipalities leave fees unchanged for a multi-year period.
- Providing fee payers, city staff, and city policymakers with a pattern of consistency that provides information for forecasting and decision-making purposes.
- Helping meet fee-payer service level expectations by collecting fees to fund the existing level of services provided.
- Encouraging generational equity among fee payers by avoiding long-term stagnation of fees followed by significant fee increases.

Fee Categories that Were Examined in this Study

This study specifically examined fee categories including, but not limited to:

- Building Fees: such as permitting of new construction or modifications to existing structures
- Planning Fees: such as entitlement review and review for compliance with the zoning code
- Land Development Engineering Fees: such as review and inspection of requests for subdivision and grading
- Encroachment Permit Fees: for work or activities conducted in the City right-of-way
- Police Fees: for specialized services provided such as vehicle releases and report delivery
- Reserved Facility Use Fees: such as reservation fees for exclusive use of City facilities by residents, non-profit groups, and non-residents.

Items Not Examined in this Study

This study specifically excluded examination of the following:

- Development Impact Fees
- Taxes
- Assessments
- Fines or Penalties
- Franchise Fees
- Utility Rates and Services Charges

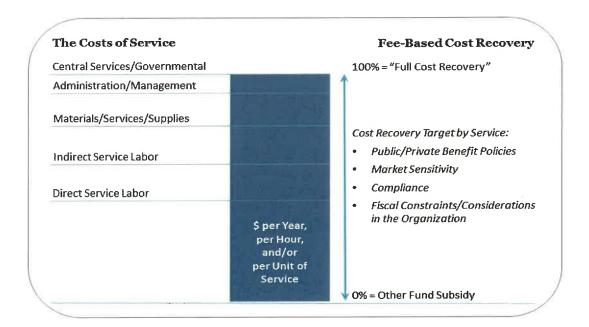

These items are subject to different approval thresholds or are not subject to the same cost of service limitations as the fees examined as part of this study. Consequently, they were specifically excluded from the scope of this study.

Compliance with Law

All adjustments to fees are intended to comply with applicable federal, state, and local laws including providing confirmation that the proposed fees and charges are not a tax as defined in Article 13C of the California Constitution and that the proposed fees are no more than necessary to the cover the reasonable costs of the City's activities and services addressed in the fees. Additionally, the manner in which the costs are allocated to a payor bear a fair and reasonable relationship to the payor's burdens on, or benefits received from the activities and services provided by the City.

Overview of the Cost of Service Analysis

Nearly every service for which a fee is imposed can be illustrated as follows, contrasting the components of the full cost of service, which is the maximum fee amount justified, against the local agency's goals for cost recovery:

Generally, fees for service are targeted to full cost recovery, inclusive of operating, direct, indirect, and capital costs, except in cases where the City Council cites a public interest in lower fees. The City may also be influenced by market conditions, comparing to municipalities of similar size and service profile. Based on the consultant's experience working with municipalities throughout California, most fee-paying stakeholders and city councilmembers accept high-cost recovery targets for development-related fees as long as:

- The elements of the cost of service and assumptions are clearly communicated.
- The city clearly communicates that only eligible costs are included in fees.

Summary & Discussion

Attachment 3 of this report includes the complete fee study report and cost of service analysis. Outcomes and proposals anticipated to be of particular interest to the City Council are summarized below.

Building Fees

- Building plan review, permit processing and field inspection fees have been restructured to enhance the correlation between services provided and fees collected. The proposed fee methodology scales to allow for lower fees for less complex projects and higher fees for more complex projects.
- Establish fixed, consolidated fees for the City's most common minor permits. This will allow
 applicants to easily estimate permit fees and allow staff to efficiently administer the fee
 calculation and collection process.

Full cost recovery is targeted from proposed fees.

Planning Fees

- Due to the nature of development within California, many projects take a significant amount
 of resources over a multi-month and potentially multi-year timeframe, depending on project
 complexity and magnitude.
- Full cost recovery is targeted from most proposed fees due to the regulatory nature of the
 fees and the high level of direct benefit resulting from construction activities including
 enjoyment of property enhancements, increased property values, and the desire to avoid
 having other Del Rey Oaks residents and businesses subsidize an individual's private
 construction activities.
- Current cost recovery varies widely depending on the fee examined (10% 90%).

Engineering and Encroachment Permit Fees

- Engineering and encroachment permit fees are collected to recover the costs associated with improvement plan review, permitting, and construction inspection along with review and inspection of work conducted within the City right-of-way.
- Full cost recovery is targeted from proposed fees.

Reserved Facility Use Fees

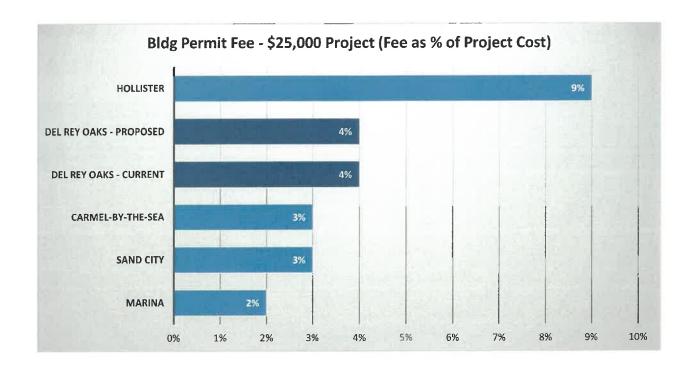

Fees are generally proposed to be adjusted by approximately 20%. This represents an
average of the change in regional cost inflation and California minimum wage since the
City's most recent fee update. The proposed change results in annualized change of
approximately 5% since the City's last update. If fees are left unchanged in an environment
of increasing costs, the City's cost recovery levels deteriorate.

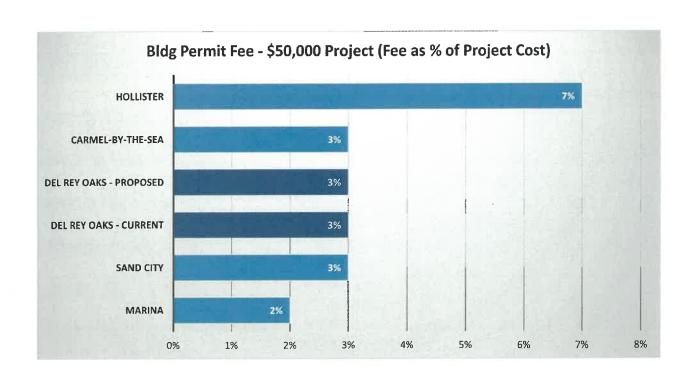

Police Fees

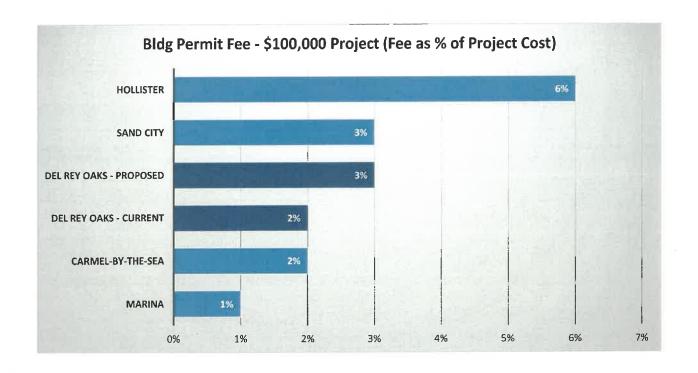

• Minor changes are proposed to Police fees. The changes are intended to align fees to the City's cost of service and/or amounts authorized by the State of California.

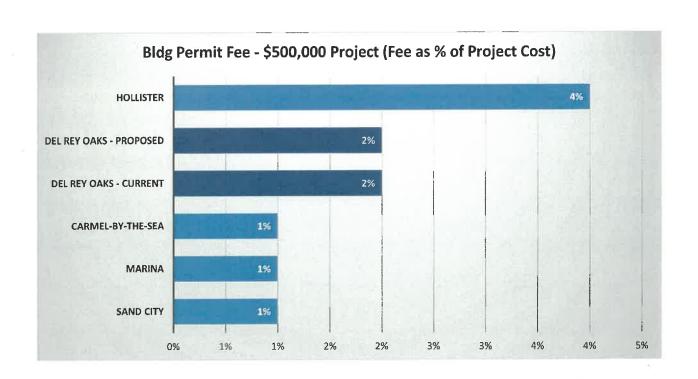

Fee Comparison Information

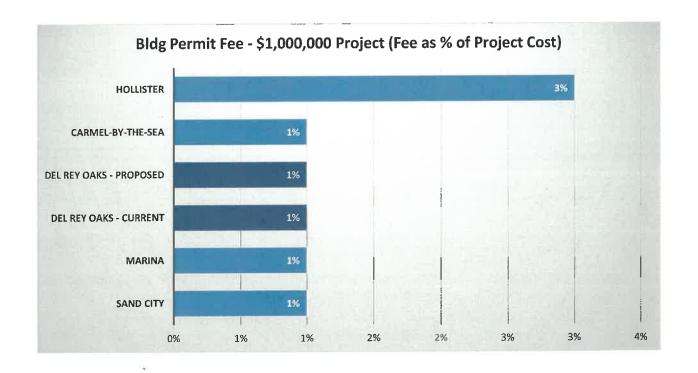

Similar fees are collected by communities throughout the region and the State. The proposed fee amounts do not exceed the City's cost of service and are in-range of amounts charged by other jurisdictions. The tables below illustrate building permit fees for a variety of scenarios ranging from simple to complex, and some common Planning Department service fees including fees for appeals, map review, sign permits, variance, and zone change. Note, amounts shown are based on consultant interpretation of other agency fee schedule. Amounts shown are intended for illustrative purposes rather than representing an exact calculation.

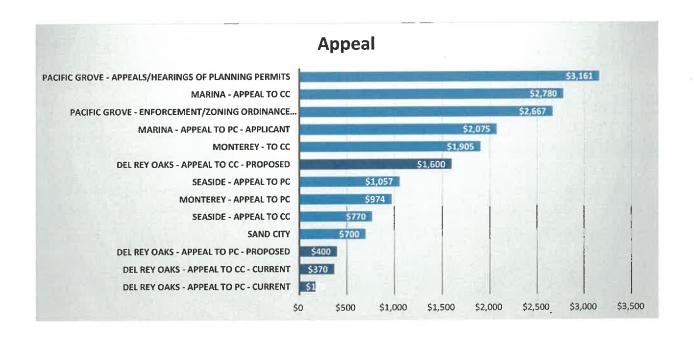

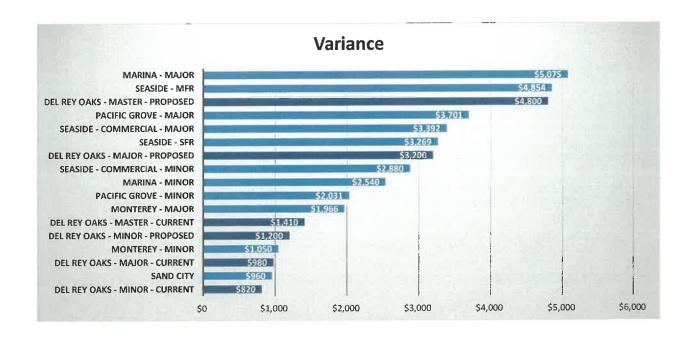

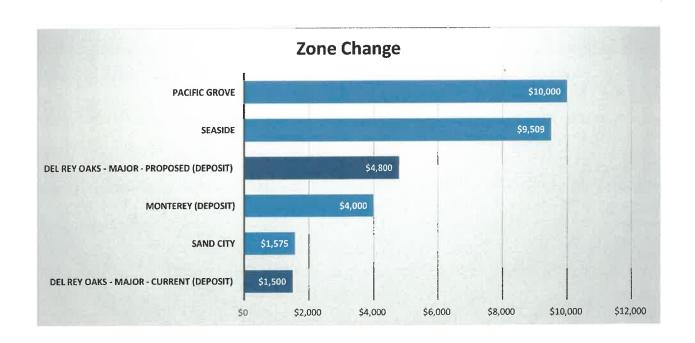

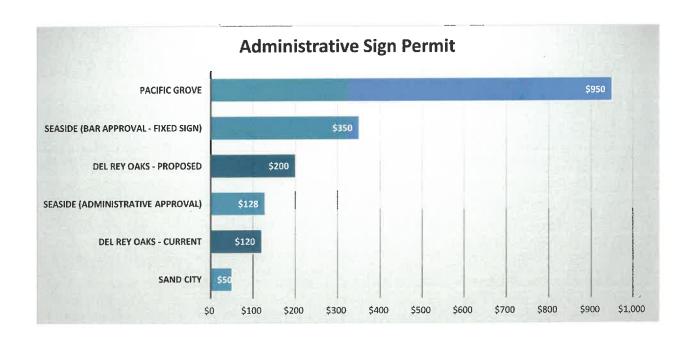

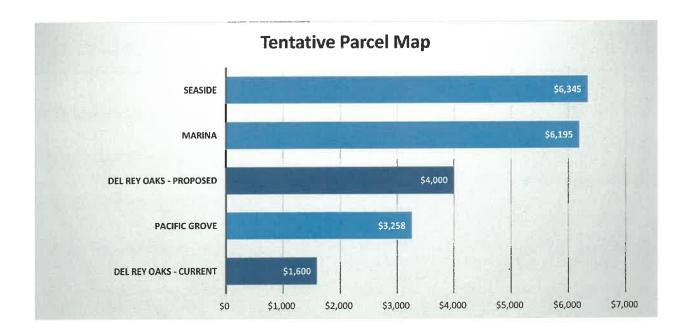

Fiscal Impact

Based on historical project application requests received by the City, it is anticipated that the proposed fee adjustments will result in additional revenue to the General Fund of approximately \$60,000 annually. This revenue is intended to "offset" the costs of existing services being provided by the City. Recovering these costs from service recipients will free up critical General Fund resources to be used for services and activities available to all Del Rey Oaks residents and businesses, such as public safety, public works, and parks maintenance services.

Recommended Action

Adopt resolution updating and establishing user and regulatory fees. Updated fees will be effective July 1, 2025.

 Fee Study Report

Respectfully Submitted,	

John Guertin City Manager

RESOLUTION NO. 2025-01

A RESOLUTION OF THE CITY COUNCIL OF DEL REY OAKS UPDATING AND ESTABLISHING USER AND REGULATORY FEES

WHEREAS, user and regulatory fees are established by the City Council; and

WHEREAS, the City recently completed a study to identify the cost of providing various user and regulatory fee-related services; and

WHEREAS, the study examined fee-related services provided by the City, the costs reasonably borne by the City in providing those services, the beneficiaries of those services, and the revenues produced by those paying fees and charges for special services; and

WHEREAS, the City Council finds that providing these services is of direct benefit to applicants both separate and apart from the benefit to the public; and therefore, in the interests of fairness to the general public, the City desires to better recover the costs of providing these services from applicants who have sought or require the City's services by revising its schedule of fees; and

WHEREAS, the City Council hereby finds that the study provides adequate evidence to conclude that the revised fees do not exceed the cost to provide the services for which the fees are charged; and

WHEREAS, the City Council desires that annually the City Manager may update the fees based on the annual percentage change in the all-urban Consumer Price Index for the San Francisco-Oakland-Hayward area (CPI); and

WHEREAS, if the CPI does not change or goes down in a given year, no change shall be made to the fee schedule that year; and

WHEREAS, in adopting this Resolution, the City Council is taking action only on those fees for the services, programs or products set forth in Exhibit "A" which have been modified from prior resolutions of the City Council. The remaining fees that have not been modified from prior resolutions shall remain in full force and effect.

NOW, THEREFORE, be it resolved that the City Council of the City of Del Rey Oaks finds that the foregoing recitals and findings are true and correct and are incorporated herein by reference.

BE IT FURTHER RESOLVED that the City Council of the City of Del Rey Oaks hereby adopts the fees, charges, and rates as set forth in attached Exhibit "A" and incorporated by this reference.

BE IT FURTHER RESOLVED that any new or adjusted fees adopted by this Resolution shall go into effect July 1, 2025.

PASSED AND ADOPTED as a resolution of the City Council of the City of Del Rey Oaks at a meeting held on this 25th day of February, 2025.

Schedule of User and Regulatory Fees

Effective July 1, 2025

City of Del Rey Oaks Schedule of User and Regulatory Fees

Note: This Fee Schedule does not include all fees, rates, or charges that may be imposed by the City of Del Rey Oaks. Examples of excluded items include, but are not limited to, development impact fees, utility rates, and punitive fines and penalties.

Certain items listed in this schedule are shown for reference purposes only, and are not considered as part of the Public Hearing process for setting user and regulatory fees.

[[]a] Total fees shall not exceed amounts outlined in California Government Code 66015(a)(1).

Determination of Valuation for Fee-Setting Purposes

• Building Valuation shall be based on the higher of 1) the applicant's estimated valuation or 2) the most current Building Valuation as printed and published by the International Code Council and adjusted using the most current City Cost Index printed and published by R. S. Means Building Construction Cost Data. CRC, R108.3 Building permit valuations. Building permit valuation shall include total value of the work for which a permit is being issued, such as electrical, gas, mechanical, plumbing equipment, and other permanent systems, including materials and labor. The final building permit valuation shall be set at an amount that allows the City to recover its costs of applicant plan check, permit and inspection activities.

Note: For construction projects with permit fees calculated using Section B, additional fees apply for permit issuance. Additional fees may apply for services provided by other City Departments (e.g. Planning Review), Technology Enhancement Fees, and Fees Collected on Behalf of Other Agencies (e.g. State of California). Additional fees apply for plan review, when applicable.

B. <u>Permit Fee for New Buildings, Additions, Tenant Improvements, Residential Remodels, and Mechanical, Electrical, and/or Plumbing Permits</u> Not Identified Elsewhere in This Fee Schedule

Valuation			Permit Fee	The same of the same	15			Y'rly CPI
\$1	to	\$2,000	\$170.00					Υ
\$2,001	to	\$25,000	\$170.00	for the first \$2,000	plus	\$36.96	for each add'l \$1,000 or fraction thereof, to and including \$25,000	Υ
\$25,001	to	\$50,000	\$1,020.00	for the first \$25,000	plus	\$27.20	for each add'l \$1,000 or fraction thereof, to and including \$50,000	. У
\$50,001	to	\$100,000	\$1,700.00	for the first \$50,000	plus	\$20.40	for each add'l \$1,000 or fraction thereof, to and including \$100,000	Y
\$100,001	to	\$500,000	\$2,720.00	for the first \$100,000	plus	\$13.60	for each add'l \$1,000 or fraction thereof, to and including \$500,000	Υ
\$500,001	to	\$1,000,000	\$8,160.00	for the first \$500,000	plus	\$10.88	for each add'l \$1,000 or fraction thereof, to and including \$1,000,000	Υ
\$1,000,001	and	up	\$13,600.00	for the first \$1,000,000	plus	\$7.07	for each additional \$1,000 or fraction thereof over \$1,000,000	Y

For permits for new construction, additions, tenant improvements or residential remodels requiring plumbing, electric, or mechanical review, the following percentages shall be added to the base permit fee

Plumbing inspection fees = Base permit fee x .10	N
Electrical inspection fees = Base permit fee x .10	N
Mechanical inspection fees = Base permit fee x .10	N

USER AND REGULATORY FEE STUDY

Dear Mr. Guertin:

ClearSource Financial Consulting submits the following report describing the findings of our preparation of a User and Regulatory Fee Study for the City of Del Rey Oaks.

Please refer to the Executive Summary for the key findings of the analysis. The balance of the report and its appendix provides the necessary documentation to support those outcomes.

Thank you for the opportunity to serve the City on this topic. We are happy to continue discussion on this study as the need arises or consult with you on additional topics.

Sincerely,

TERRY MADSEN, PRESIDENT | CLEARSOURCE FINANCIAL CONSULTING

PHONE: 831.288.0608

J-M-l-

EMAIL: TMADSEN@CLEARSOURCEFINANCIAL.COM

STUDY OVERVIEW

The City of Del Rey Oaks has completed a User and Regulatory Fee Study. California cities regularly conduct these studies to justify fee amounts imposed and to optimize the overall portfolio of revenues available to the municipality to fund its services.

Industry practice and fiscal conditions in the state have led most cities to link cost recovery for services of individual action, cause, or benefit to that same individual through user fee revenue, relieving the agency's general revenues as much as possible for use toward services of broader community benefit.

USER AND REGULATORY FEES

Cities derive annual revenue from a number of sources. These include, but are not limited to, property taxes, sales taxes, license fees, franchise fees, fines, rents, and user and regulatory fees. User and regulatory fees are intended to cover all, or a portion of, the costs incurred by the City for providing fee-related services and activities that are not otherwise provided to those not paying the fee.

California law provides guidance regarding the amounts the City may charge for fee-related services and activities. Specifically, in order to avoid being considered taxes, the **fees charged shall not exceed the estimated reasonable cost of providing the services**, activities, or materials for which fees are charged.

At its conclusion, this study proposes for City Council review and consideration at public hearing a new **Schedule of User and Regulatory Fees** for application in Fiscal Year 2024-2025 and continued update in subsequent years.

COST RECOVERY POLICY AND PRACTICE

Recovering the costs of providing fee-related services directly influences the City's fiscal health and increases the City's ability to meet the service level expectations of fee payers.

The services for which the City imposes a user or regulatory fee typically derive from an individual person or entity's action, request, or behavior. Therefore, except in cases where there is an overwhelming public benefit generated by the City's involvement in the individual action, a fee for service ensures that the individual bears most, if not all, of the cost incurred by the City to provide that service. When a fee targets "100% or full cost recovery," the individual is bearing the entirety of the cost. When a fee targets less than full cost recovery, another City revenue source – in most cases, the General Fund – subsidizes the individualized activity.

Generally, fees for service are targeted to full cost recovery, inclusive of operating, direct, indirect, and capital costs, except in cases where the City Council cites a public interest in lower fees. The City may also be influenced by market conditions, comparing to municipalities of similar size and service profile.

FINDINGS AND PROPOSED ACTION

During the course of study, information and analysis was generated and is discussed substantively throughout this report and its technical appendix. However, summarized in the following table by broad fee category and highlighted in the subsequent findings statements, are outcomes and proposals of particular interest to City leaders and policymakers.

PRIMARY OUTCOMES

D BUILDING FEES

- Building plan review, permit processing and field inspection fees have been restructured to
 enhance the correlation between services provided and fees collected. Thé proposed fee
 methodology scales to allow for lower fees for less complex projects and higher fees for
 more complex projects.
- Establish fixed, consolidated fees for the City's most common minor permits. This will allow
 applicants to easily estimate permit fees and allow staff to efficiently administer the fee
 calculation and collection process.
- Full cost recovery is targeted from proposed fees.

PLANNING FEES

- Due to the nature of development within California, many projects take a significant amount of resources over a multi-month and potentially multi-year timeframe, depending on project complexity and magnitude.
- Full cost recovery is targeted from most proposed fees due to the regulatory nature of the
 fees and the high level of direct benefit resulting from construction activities including
 enjoyment of property enhancements, increased property values, and the desire to avoid
 having other Del Rey Oaks residents and businesses subsidize an individual's private
 construction activities.
- Current cost recovery varies widely depending on the fee examined (10% 90%).

> ENGINEERING FEES

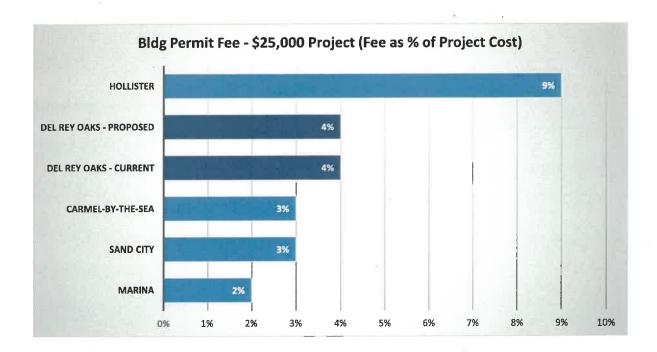

- Engineering and encroachment permit fees are collected to recover the costs associated with improvement plan review, permitting, and construction inspection along with review and inspection of work conducted within the City right-of-way.
- Full cost recovery is targeted from proposed fees.

Fees are generally proposed to be adjusted by approximately 20%. This represents an average of the change in regional cost inflation and California minimum wage since the City's most recent fee update. The proposed change results in annualized change of approximately 5% since the City's last update. If fees are left unchanged in an environment of increasing costs, the City's cost recovery levels deteriorate.

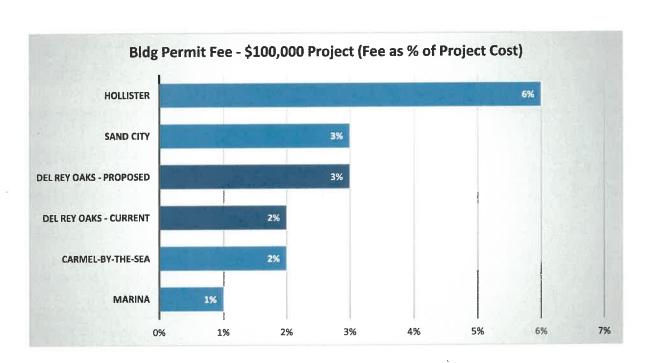

REGIONAL FEE COMPARISON

Similar fees are collected by communities throughout the region and the State. The proposed fee amounts do not exceed the City's cost of service and are in-range of amounts charged by other jurisdictions. The tables below illustrate building permit fees for a variety of scenarios ranging from simple to complex, and some common Planning Department service fees including fees for appeals, map review, zone change, sign permits, and variances. Note, amounts shown are based on consultant interpretation of other agency fee schedules. Amounts shown are intended for illustrative purposes rather than representing an exact calculation.

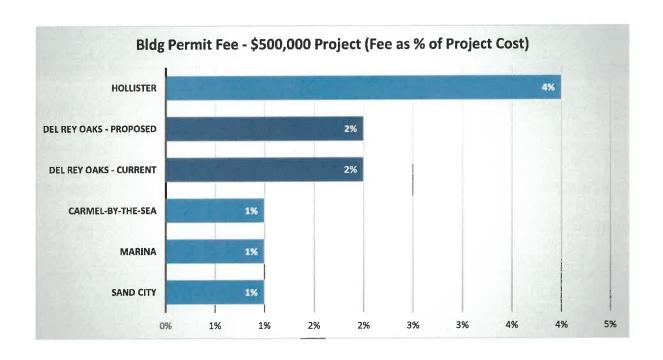

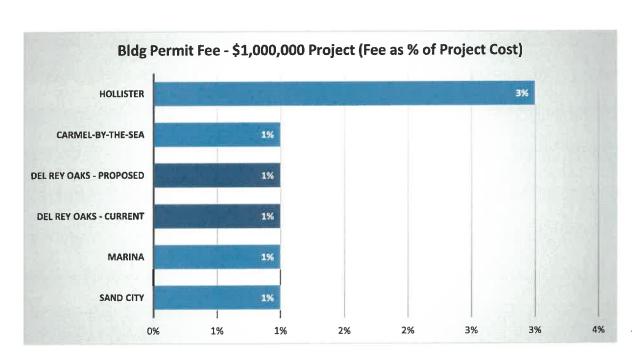

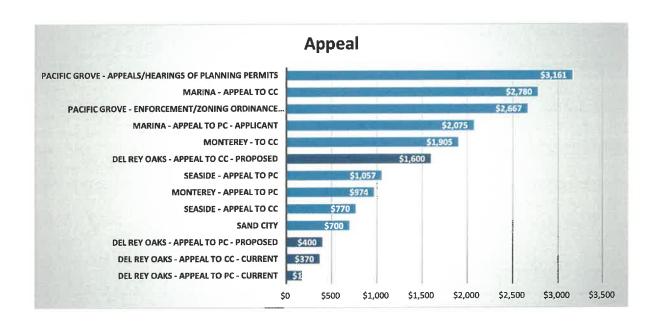

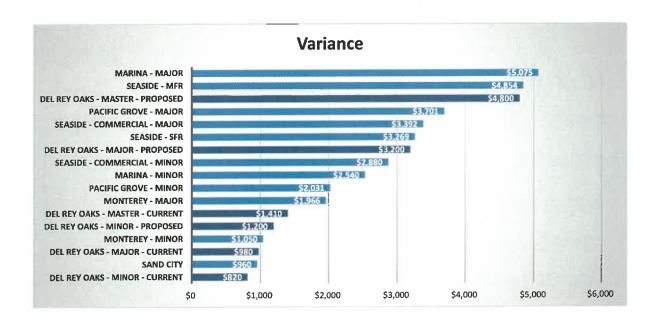

EXECUTIVE SUMMARY

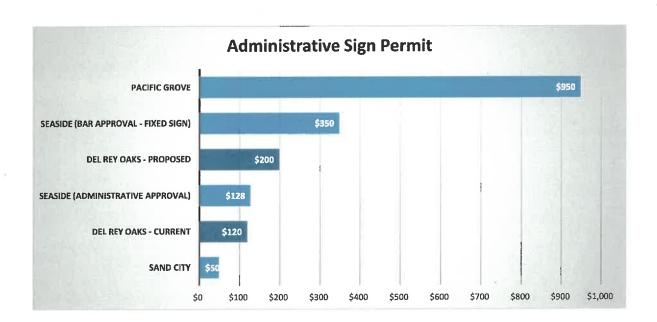

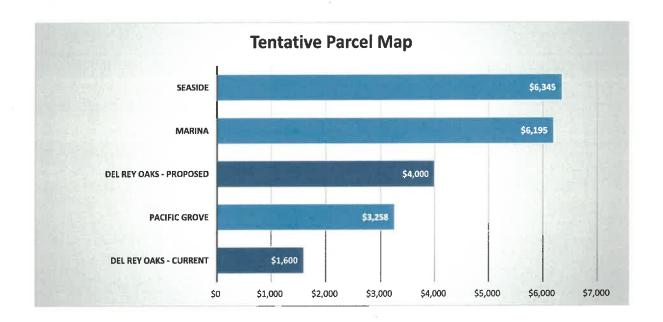

EXECUTIVE SUMMARY

FISCAL IMPACT

The anticipated fiscal impact of the proposed fee changes is an additional \$60,000 in annual General Fund revenue. The primary purpose of the adjustments to the City's fee schedule is to correlate fees to services provided. The City's proposed fees seek to recover the City's full cost of service for new development within the City and avoid cost recovery deterioration for non-development related fees.

Please continue to the following technical report and appendix for further discussion of this User and Regulatory Fee Study.

SCOPE OF STUDY

The City of Del Rey Oaks has completed a **User and Regulatory Fee Study**, which represents an external review of prevailing practices and development of a new **Schedule of User and Regulatory Fees**. ClearSource Financial Consulting has prepared this analysis using FY 2024/25 organizational information and will be available to answer questions as the City proceeds in implementing findings as it chooses.

Key tasks expected by the City from this study included the following:

- Review eligible fee-related services Citywide to establish the reasonable relationship between current fees for service and the underlying costs of service.
- Calculate the full cost of service, including estimated Citywide overhead costs.
- Recommend fees to be charged for each service.
- Recommend cost recovery strategies and best practices in setting fees, while considering the complexities and demands of responsible programs or departments.
- Identify underlying billable rates for cost recovery opportunities and as the basis for user fees.

DIRECT SERVICES UNDER REVIEW

FEE CATEGORIES

- Building Services include, but are not limited to building plan review, permitting, and inspection for construction and sub-trades.
- Engineering Services include, but are not limited to, Including and development plan review and inspection, and encroachment permitting.
- Planning Services include, but are not limited to, entitlement review, and review for project compliance with the City's Zoning Code.
- Police Fees Services include vehicle release and requests for specialized services.
- Community Services Services include reserved facility use fees.
- Administrative Fees Services include business license application review processing.

REASON FOR STUDY

Cities derive annual revenue from a number of sources. These include, but are not limited to, property taxes, sales taxes, franchise fees, fines, rents, and user and regulatory fees. User and regulatory fees are intended to cover all, or a portion of, the costs incurred by a City for providing fee-related services and activities that are not otherwise provided to those not paying the fee.

California cities regularly conduct fee studies to justify fee amounts imposed and to optimize the overall body of revenues available to the municipality to fund its services. Widespread industry practice and fiscal conditions in the state have led most cities to link cost recovery for services of individual action, cause, or benefit to that individual through user fee revenue, relieving the agency's general revenues for services of broader community benefit.

PREVAILING GUIDANCE

The objectives of this study, the methodology used to complete the study, and the formulation of outcomes and recommendations for future consideration were significantly influenced by Article 13C of the California Constitution and Section 66014 of the California Government Code.

Article 13C states that the local government bears the burden of proving by a preponderance of the evidence that a levy, charge, or other exaction is not a tax, that the amount is no more than necessary to cover the reasonable costs of the governmental activity, and that the manner in which those costs are allocated to a payer bear a fair or reasonable relationship to the payer's burdens on, or benefits received from, the governmental activity. Additionally, Article 13C identifies the following as items that are not defined as taxes:

- A charge imposed for a specific benefit conferred or privilege granted directly to the payer that is not provided to those not charged, and which does not exceed the reasonable costs to the local government of conferring the benefit or granting the privilege.
- A charge imposed for a specific government service or product provided directly to the payer that is not provided to those not charged, and which does not exceed the reasonable costs to the local government of providing the service or product.
- A charge imposed for the reasonable regulatory costs to a local government for issuing licenses and permits, performing investigations, inspections, and audits, enforcing agricultural marketing orders, and the administrative enforcement and adjudication thereof.
- A charge imposed for entrance to or use of local government property, or the purchase, rental, or lease of local government property.
- A fine, penalty, or other monetary charge imposed by the judicial branch of government or a local government, as a result of a violation of law.
- A charge imposed as a condition of property development.
- Assessments and property-related fees imposed in accordance with the provisions of Article XIII D.

Section 66014(a) of the California Government Code includes the following, "Notwithstanding any other provision of law, when a local agency charges fees for zoning variances; zoning changes; use permits; building inspections; building permits; ...the processing of maps under the provisions of the Subdivision Map Act...; or planning services...; those fees may not exceed the estimated reasonable cost of providing the service for which the fee is charged, unless a question regarding the amount of the fee charged in excess of the estimated reasonable cost of providing the services or materials is submitted to, and approved by, a popular vote of two-thirds of those electors voting on the issue.

The outcomes and recommendations of the study are intended to comply with applicable federal, state, and local laws including providing confirmation that the proposed fees ("charges") recommended as a result of this study are not taxes as defined in Article 13C of the California Constitution and that the proposed fees are no more than necessary to the cover the reasonable costs of the City's activities and services addressed in the fees. Additionally, this report is intended to show that the manner in which the costs are allocated to a payer bear a fair and reasonable relationship to the payer's burdens on, or benefits received from the activities and services provided by the City.

PROJECT ORIENTATION

METHODOLOGY AND DATA SOURCES

This study calculated the estimated reasonable cost of providing various fee-related services across the City organization. Generally, the estimated reasonable cost of providing the fee-related services and activities examined in this study can be calculated as the product of the composite fully-burdened hourly labor rate of the division responsible for providing services and the estimated labor time required to process a typical request for service.

The composite fully-burdened hourly rates calculated in this study are based on the estimated annual hours spent providing fee related services, and estimated labor, services and supplies, and Citywide overhead expenditures, sourced as follows:

- Labor expenditures for in-house personnel were based on budgeted salary and benefits expenditures.
- Contract service personnel and other services and supplies related costs were based on current industry market rates for service.
- Citywide overhead cost allocations were developed to assign a reasonable share of central service support to the City's direct service units.
- Estimated labor time spent providing fee related services were developed based on interviews with City staff and are in-line with typical direct service ratios experienced by the consultant via studies of similar municipalities throughout California. Commonly used industry data also aided in the development of time estimates and proposed fee structures.

Once cost of service levels are identified, the City may use this information to inform targeted cost recovery from fees. Fees set at the cost of service target full cost recovery. Fees set at any amount less than the cost of service target less than full cost recovery.

An illustration of the methods used in this analysis is shown in Exhibit 1:

EXHIBIT 1 | STEPS IN ANALYZING COSTS OF SERVICE AND USER FEES

COST C	OF SERVICE ANALYSIS Process and Methods				
1 ANNUAL LABOR TIME	 Identify annual hours spent providing fee services for each participating division Information is developed and tested using a combination of interviews, questionnaires, historical project information, and historical revenue information 				
2 ANNUAL EXPENDITURES	Identify annual cost of providing fee services for each participating division Information is developed and tested using a combination of information found in the City's adopted budget, expenditure history, and the overhead cost plan.				
3 FULLY BURDENED	 Calculate the estimated fully burdened hourly rate using information from Steps 1 and 2 				
HOURLY RATES	Annual Cost ÷ Annual Hours = Hourly Rate				
4 SERVICE/ACTIVITY LABOR TIME	 Estimate labor time required to process individual request for service Information is developed and tested using a combination of interviews, questionnaires, commonly used measures, and information developed in Step 1 				
5 UNIT COST	Calculate the estimated cost of service using information from Steps 3 and 4				
OF SERVICE	Hourly Rate x Labor Hours = Unit Cost of Service				
6 CURRENT	Calculate current cost recovery level for a specific service				
COST RECOVERY	Current Fee + Unit Cost of Service = Current Cost Recovery				
7 TARGETED	 Use laws, industry standards, goals and policies, and historical trends to determine targeted cost recovery 				
COST RECOVERY	Proposed Fee ÷ Unit Cost of Service = Targeted Cost Recovery				
8 TEST FOR REASONABLENESS	 Test to confirm forecast revenue from fees will not exceed program costs Use historical permit volume and proposed fees to forecast anticipated revenue from fees 				
	Forecasted revenues should not exceed program costs				

CONSIDERATIONS FOR IMPLEMENTATION

If the City decides to adopt or otherwise utilize outcomes generated through this study, it should:

- Update Systems for Fee Outcomes Ensure that City staff begin using updated fees and associated outcomes once the updated schedule of fees becomes effective. Values should be included in all official fee schedules used throughout the City (e.g., departmental pamphlets, counter schedules, and online information). Additionally, ensure collections processes are updated, which may include coding in billing systems and training for personnel who handle fees directly with the public.
- Actively Monitor the Use of Fees In order to recover accurate and eligible amounts expected, the City should be diligent about tracking time to projects for time and materials billings and ensuring fees are applied in the correct amount and using the correct and intended basis for fixed fee billings.
- Monitor Feedback and Permit Statistics Monitor permit and application volume and applicant feedback to determine if fee modifications are resulting in any unanticipated changes in project frequency and to increase the level of detail available for revenue forecasting.
- ▶ Annually Review and Adjust Fee Values In order to generally maintain pace with regional cost inflation and/or the City's salary cost inflation, the City should adjust its fees on an annual basis. A commonly used, reasonable inflation index is the annual change in the all-urban Consumer Price Index (CPI) representative of the region.
- Periodically Perform Comprehensive Analysis A comprehensive fee study should be conducted periodically (e.g., every three to five years) to ensure fee levels remain at or below legal limits and are consistent with evolving service practices and local conditions.

[[]a] Each deposit and/or fee listed in this schedule is based on the estimated number of hours required to perform a standard service request and the typical cost of services/materials required to perform the requested service. For service requests that are anticipated to require efforts, services, or materials, materially different than those typically required, the Department reserves the right to modify the initial deposit amount and/or use a time and materials billing methodology rather than a fixed fee for service.

[b] In addition to the fees identified in this schedule, the City will pass-through to the applicant any discrete costs incurred from the use of outside service providers or other agencies required to process the specific application (e.g., County recording fees, Department of Fish and Wildlife fees, LAFCO fees, noticing fees, specialized review service fees, etc.)

[[]a] in addition to amounts shown, additional amounts due to Department of Justice and/or other agencies will be collected.
[b] Fee set by State of California.
[c] Based on number of false alarms per calendar year.

*Fully-burdened hourly rates intended to represent reasonable estimates of fully-burdened hourly rates for typical service providers. Del Rey Oaks currently does not have any non-sworn/records dedicated personnel. For purposes of this analysis GlearSource has assumed that certain fee related services would typically be performed by non-sworn/records dedicated personnel.

Estimated Townwide Indirect Cost Rate - General Fund

Dept/Division	Total	Notes
Indirect Costs	\$935,304	
Direct Expenses	\$3,391,721	
Total	28%	<<< Indirect cost rate *

^{*} This represents a conservative indirect cost rate calculation. This estimate was developed for purposes of user and regulatory fee cost of service analysis. As part of day-to-day operations, staff may categorize, assign, or quantify indirect costs using different criteria and methods.

[[]a] Source: FY 22/23 actual expenditures.

[[]b] Adjustment to exclude 50% of Deputy City Clerk/Permit Clerk. Calculation based on top step salary x 1.5 to account for salary and benfits x .5 to account for allocation of time to Building. Consider this a direct cost to Building.

[[]c] Adjustment to exclude legal expenditures. For purposes of this analysis only, legal costs are considered direct to avoid potentially allocating direct costs as indirect.
