

Dear Lori Goodell,

I recently saw that the Friends of the Landfill Committee is looking for another volunteer. I am interested in participating on the committee. I grew up in Dillingham and I have a strong interest in preserving the environmental and human health of the community. I graduated from the University of Alaska Fairbanks in May of 2020 with a Bachelor's Degree in Geological Sciences. I think my local knowledge and education would make me a useful addition to the Friends of the Landfill Committee.

I have been employed as the Contaminated Sites Coordinator for the Bristol Bay Native Association for 9 months. Solid waste management and removal falls within the scope of my work and is something I have experience dealing with in coordination with the Bristol Bay communities. If selected for the committee, I would be excited to volunteer my efforts and skills to make a positive difference in the community.

I appreciate the opportunity to apply to be on the Friends of the Landfill Committee. If you have any questions, you can reach me at [jared.miller@bbna.com](mailto:jared.miller@bbna.com) or 907-842-5257

I look forward to hearing from you.

Sincerely,

Jared Miller
