The course will focus on the National Flood Insurance.

Department of Commerce, Community, and Economic Development  
Division Of Community And Regional Affairs

Land Management/Planning	National Flood Insurance Program	Learn program requirements as lined out in the 44 CFR 60.3. This specifically includes the responsibilities communities have to manage and minimize their flood risk. This course can be 2 hours to a full week.
Land Management/Planning	NORFMA	Northwest Regional Floodplain Management Association (NORFMA): Presentation on Alaska issues and events, collaboration opportunities between state partners.
Land Management/Planning	Planning Commission Training	This training provides an overview of one or more of the topics planning commissioners must be knowledgeable about, including: Comprehensive and other types of planning, Zoning and platting, and How a planning commission operates.
Land Management/Planning	Preparedness Conference	Learn about mitigation opportunities and collaborative training for flood risk reduction.
Land Management/Planning	Understanding and Evaluating your Erosion Problem	This training, provided through the Alaska Risk MAP Program, assists Alaskan communities in understanding and evaluating erosion problems and alternative solutions. The primary components of the erosion process are explained to help users understand the source of their community erosion problems. Characteristic profiles of eroding shorelines and typical energy sources are presented thereby allowing users to identify the possible causes of their erosion problem. The fundamental principles and means of controlling erosion are presented to enable users to understand potential solutions to their erosion problem. Sources of additional guidance for evaluation, design, and implementation of alternative solutions are also presented. This training is based on the handbook by the same title.
