		<p>We are hoping for either a June or July install. Since we are not handling the shipping, the installation will be dependent upon manufacturer's production and shipping schedule and Alaska Marine Lines schedule to Dillingham. We will need assistance on site for the unloading of the containers from Alaska Marine Lines. We will do the actual unloading of the equipment from the containers.</p> <p>Installation cost is calculated using "normal" ground conditions. There may be additional charges if we run across any "unexpected" material that will need to be removed. This may include: backfill material, rocks, concrete, and any other material that necessitates beyond "normal" excavation techniques and/or equipment.</p> <p>Then of course, there is the Covid disclaimer, we are not responsible for any delays for material and/or installation due to Covid.</p> <p>We are responsible for drawing any necessary permits and those expenses. You are responsible for either locating a current utility locate or to have one done. Locate must be done as soon as possible.</p> <p>1/2 payment needed at time of order, balance to be paid upon acceptance.</p> <p>Thank you. Kit Wilson</p>
