Hello,

Thank you for speaking with me today. I wanted to provide a little more information about the YES Program and the community event we are hoping to host.

The YES Program is a youth-focused initiative centered around supporting and strengthening Iowa County first response services through education, exposure, and community involvement. While YES is not currently a formal nonprofit organization, it operates similarly to an after-school or community club and does not generate profit from its activities or events. The program is designed purely to benefit local youth, community members, and Iowa County first response entities.

Our mission is to help improve and support Iowa County first response services by encouraging youth engagement, building community relationships, and increasing awareness of the important work done by EMS, fire, law enforcement, and other emergency response organizations.

One of the ways we hope to accomplish this is through a free community Touch-A-Truck event open to all Iowa County residents. The event would showcase a variety of first response vehicles and equipment while giving families and children the opportunity to interact with local emergency service personnel in a fun and welcoming environment.

In addition to the vehicle displays, the event would feature:

- A YES Program information table
- Information and outreach for the developing YAP Program
- Children's activities
- Local food trucks

Our goal is for the event to both promote community engagement and highlight the valuable services our first responders provide, while creating a positive and educational experience for families throughout Iowa County.

Thank you for your time and consideration. Please let me know if you have any questions or would like any additional information.

Best,

Alexandra Garvey
