- Cheer Camp – 28 enrolled
- Coding Class: Animation and Video Games – 10 enrolled
- Outdoor Kids Yoga – 14 enrolled
- Video Game Design – 6 enrolled
- Sewlutions Lab – 9 enrolled

What I Have Been Up To

- Baseball and Softball completed their leagues on July 9th and are now in play offs/tournament. I have made some notes on what I've learned this year in regards to staffing, logistics of the leagues, etc. but overall, I believe this year was a success for all involved.
- Tee ball and coach pitch will be wrapping up on July 18th. Our sponsors and volunteer coaches have been much appreciated this season!
- Our Parks and Recreation Commission met at the end of June. Our minutes are posted online, but we've been having great discussions. A couple topics I am looking forward to bringing to council in a more formal matter coming up:
 - I am working on for the Commission to review is a community survey in the wants and needs of our community in regards to parks, recreation, facilities, etc, in which we will bring to council before sending out for community response. This will hopefully give a better guidance of direction on some of our wishes for the Commission to accomplish.
 - The Pool has created a "fundraising committee" stemmed from our Parks and Recreation Commission, where they will work with Commission on the funds they raise for improvements and projects at the pool. Our biggest focus right now is to get some pool shade structures down there. The goal is to utilize what was placed in capital projects for this year, but also to raise money for more improvements to the facility. I am working with the pool manager to put together a list of what's needed at the pool for daily operations and what we can do enhance the patron experience there.
- I have started working on a Fall Activities Flyer which I hope to begin registration for in August.
