

CentralSquare's Public Safety Software Solution for the Dodgeville Police Department

Dodgeville, WI

Public Safety Suite Pro

June 11, 2024

Chief Brandon Wilhelm
Dodgeville Police Department
111 West Merrimac Street
Dodgeville, WI 53533

Dear Chief Wilhelm:

As the provider of law enforcement services to nearly 5,000 residents, the Dodgeville Police Department (DPD) must have the most efficient and reliable technology to serve their citizens. This proposal provides DPD with an outline of how CentralSquare Technologies, LLC (CentralSquare) and its Public Safety Pro Suite (Pro Suite) would enable you to best serve your community.

CentralSquare and its solutions are distinguished in a number of ways:

- CentralSquare's focus is on public safety and public administration software.
- All our products (CAD, RMS, Jail, Mobile, Civil, etc.) are one application with one database from one vendor: CentralSquare.
- We listen to our customers and develop and deliver the new features, functionality, and interfaces they prioritize.
- With the solution's Custom Modules and Custom Forms, the DPD can truly go paperless and will have the flexibility to automate and track as much data as is chosen.
- Each module within Pro Suite is a first-class component of our solution; each provides every agency with the best solution available today.
- Public Safety Suite Pro is extremely configurable, yet very easy to learn and use.
- We provide more services and take on more responsibility as part of our standard support and maintenance plan than our competition does, and we do it for less. Our support and maintenance include 100% responsibility for the Pro Suite physical server, operating system software, and Pro Suite software.
- CentralSquare offers DPD the lowest-risk solution with the richest functionality.

CentralSquare's Public Safety Suite – Pro provides the most effective software to DPD's law enforcement services. Through our zealous pledge to customer support that is known throughout the U.S., we will help provide the best possible service to the City of Dodgeville.

Sincerely,

A handwritten signature in black ink, appearing to read "Trevor Milton".

Company Overview

Formation of the Market Leader

CentralSquare's Pro Suite team is based out of our Public Safety Center of Excellence in Sioux Falls, South Dakota, and has been providing public safety agencies with high-quality, market-leading supported software since 2003. CentralSquare provides technology solutions that currently help more than 8,000 public sector agencies deliver vital safety and administrative services to three out of every four residents of the U.S. and Canada.

Maintenance clients can count on Public Safety Suite Pro to continually update and remain on the leading edge of technology and industry trends. CentralSquare does not rest on past achievements and continues to expand and improve the functionality of Public Safety Suite Pro with three to four major releases per year. Agencies receive all updates and releases as part of the maintenance agreement with CentralSquare. Performing massive, disruptive software updates every three to five years is a thing of the past. Upgrades are added predictably and incrementally to empower Public Safety Suite Pro clients to be more efficient and effective.

CentralSquare provides a single, comprehensive level of support for Public Safety Suite Pro. If an agency has a question, no matter when or what, a CentralSquare Support representative will pick up the phone to respond. We back the solution 100%. There are no arguments about whether the issue is with the hardware or the software – CentralSquare monitors, manages, and supports both.

Since its first Go Live, Public Safety Suite Pro has held one of the highest customer retention rates in the industry. This is achieved by providing a combination of the best software and support and maintaining a passion for public safety. CentralSquare's goal is to give each client the tools they need to succeed.

CentralSquare continues to innovate - in our products, our delivery, and our support methodology. One of our most significant initiatives targets customer success. Our goal remains 100% customer satisfaction, 100% of the time, from your successful Go Live through your ongoing use of our solutions. We have recently recruited high caliber team members with significant experience supporting software solutions for public sector users. In addition to training new team members, we implemented new avenues for keeping our seasoned specialists performing at peak effectiveness to support our customers. This includes working with developers and product documentation specialists, getting coaching from trainers, and asking for feedback from customers.

Other key factors in our Customer Success initiative include:

- Launching a Tiered Support Structure, using a streamlined team focused on swift case resolution.
- Expanding the self-service of online help and knowledge base articles available for customers to self-serve. Online help includes video walk-throughs, screenshots, and more.
- Ongoing updates of the Customer Support Portal with more user-requested features and superior functionality.
- Establishing a shorter cadence for review of Support Processes and Procedures, with the ultimate goal being “quick and easy resolution” from every customer’s perspective.

Why Public Safety Suite Pro?

TRUE INTEGRATION. Pro Suite is a completely unified system from both technical and user perspectives because it was built from the ground up as one application with one database from one vendor. Most public safety software companies describe their products as integrated, which often means separate modules, such as Computer-Aided Dispatch (CAD), Records, and Jail, are interfaced together to pass data between modules. Pro Suite seamlessly encompasses CAD, Records, Mobile CAD and Records, Jail, Civil Process Tracking, and Agency Administration.

A VERSATILE, SCALABLE SYSTEM. Pro Suite is remarkably flexible. It is packed with configuration options that allow users to set up the software to match their agency's workflow and business rules, not the other way around. These configuration options allow Pro Suite to match the needs of agencies with a variety of workflows, as well as to support a single agency's changing needs over time. Since many features can be turned on or off, Pro Suite scales well to accommodate the unique needs of both small and large agencies. The company's unrivaled experience working with agencies of all sizes throughout the U.S. makes CentralSquare the clear choice for the lowest-risk implementation, helping to ensure client success.

EASY TO LEARN AND USE. While Pro Suite is rich in functionality, its user interface is clean and uncluttered by excess fields or tabs, leading to a great user experience. This makes the system easy to learn and allows users to efficiently enter data and quickly view key information. The system is designed to guide users through data entry processes, organize information logically, and allow for simple navigation. Powerful searching capabilities provide quick access to needed records, and hyperlinks help users quickly navigate to related records or files.

POWERFUL REPORTING. It is one thing to place data into a system, but something else entirely to get it back out again. Pro Suite comes with a built-in report generator that makes analytical reporting simple and straightforward—even for users who are not highly technical or knowledgeable in report scripting. Best of all, the DPD does not need to submit a request for a new report and then wait for someone else to build it. Instead, the user can create most reports quickly and easily.

LONG-TERM SAVINGS. Because of CentralSquare's unique approach to support and maintenance, there are no surprise hardware costs associated with natural growth. We don't demand "forklift" upgrades or charge for additional memory when an agency grows in size. Instead, those things are covered by the standard maintenance plan – if hardware fails or if more disk space is needed, the cost is included. CentralSquare encourages agencies to own their systems and never charges an agency to retrieve their data.

CentralSquare Public Safety Suite Pro

Wisconsin

CentralSquare Public Safety Suite Pro was first implemented at a Wisconsin agency in 2016 and is used at police departments (including one tribal entity) and sheriff's offices around the state. Some of these clients are also part of multi-agency jurisdictions.

CentralSquare has experience with the Wisconsin Badger TraCS Accident Reports and Citations, which includes all standard crash/citation forms. This list includes crash, car/deer crash, citation, local municipal, non-traffic citation, and warnings.

CentralSquare Pro also integrates to the Wisconsin NCIC (TIME/eTIME) switch and WIJIS. Additionally, CentralSquare Pro integrates with the national AFIS and VINE databases.

Through an interface from CentralSquare Records Pro to the Wisconsin NIBRS, users are able to select cases in Records and manually export those cases to a text file on the local file system, checking any errors against the in-screen error validation tool. From there, agencies provide the file to the state system.

CentralSquare also offers the Wisconsin eReferral interface which integrates Records to the Wisconsin District Attorney's eReferral service. Approved case reports in Records are exported to the WI eReferral service. Data exported from Records includes case number, date/time, location, defendant name and demographics, victim name and demographics, agency, charge, and arrest information.

Some of CentralSquare's Wisconsin customers also enjoy complimentary access to the largest public safety software customer database in the United States, CentralSquare's Community Data Platform. Agencies that agree to contribute data get the benefit of free access to two of the most powerful search and display tools available for law enforcement. Participating agencies receive an annual subscription to both Community Data Platform Search (CDP Search) and CrimeMapping.com. Officers and Investigators can quickly access information about incidents, arrests, warrants, and persons of interest from agencies across the US using CDP Search. CrimeMapping.com gives agencies powerful analytical tools while also providing the public with information about incidents.

Public Safety Suite Pro Overview

Core Functionality

The core functionality of CentralSquare Pro Suite is available to users regardless of whether they work in a single product (such as CAD or JMS) or have access to all Pro Suite products and modules.

KEY FEATURES

- Fine-grained Permissions
- Internal Messaging
- State/NCIC Queries
- User Dashboards
- Master Indices (Names, Vehicles, Addresses)
- Spell-checking
- Redaction
- Agency-based Configurability
- Custom Forms and Modules
- Full-text Searching
- Record Linking
- Contextual Menus
- Wizards
- Data Auto-population
- Alerts

Administration (Core)

Tracking all the parts that agencies depend on like fleet management, equipment, inventory, and more.

Administration applies Public Safety Suite Pro's efficiency and organization to the management of internal agency processes. It can be configured to match any agency's procedures, and custom dashboards can link directly to records or automatic emails to inform staff of purchase requests. It enables users to perform administrative tasks such as equipment tracking or fleet management in the same system used to manage all other agency operations. As a result, records can be linked to each other and all of the data can be accessed for statistical reports.

KEY FEATURES

- Fleet Management
- Policy Manual
- Inventory Management
- Equipment Tracking
- Purchase Requisitions
- Service Dog Management

Personnel (Core + Advanced)

Providing a single location for all information and management of agency employees.

Personnel offers a single log for all pertinent data on each employee or user, including historic personnel. The DPD has a central location to track demographic information, photos, and other attachments on each record. Additionally, training, commendations, promotions, service history, and citizen feedback can be tracked on each record according to each agency's configuration needs. Agency administrators will also use Personnel to manage permissions and user access throughout Public Safety Suite Pro.

KEY FEATURES

- Promotions and Awards
- Disciplinary Actions
- Training and Certifications
- Custom Forms
- Commendations
- Citizen Feedback

Records (Core + Advanced)

Bringing agencies' data together in one system and place, eliminating the need for countless spreadsheets, filing cabinets, and computer programs.

Records is a records management system that consolidates records that have traditionally been kept in different programs, documents, and spreadsheets. It then automates the processing of these records for public safety agencies. This module organizes everything from case reports, to warrants, to sex offender data in an easy-to-use fashion.

Master indices (including names, addresses, and vehicles) form the backbone of Records, powered by tight integration with the other Public Safety Suite Pro modules. A single name search not only reveals demographic information but also every record in the system involving that individual: dispatch incidents, case involvements, citations, civil processes, warrants, inmate records, and more.

Records provides a smooth workflow for case reporting and approval. Case information pulled from CAD eliminates the need for duplicate data entry, and the involvement wizard walks users through the process of matching offenders, suspects, victims, and witnesses to the appropriate offenses. By eliminating the need for retyping, data becomes more secure and accurate.

With Records, users can stay organized by attaching narratives, citations, search warrants, and evidence directly to case reports. A shared database across the agency's system makes all necessary info easy to find.

In addition to case management, Records enables comprehensive property and evidence tracking, including a detailed chain of custody log. Records also logs warrants, sex offender data, pistol permit information, bicycle registration, and more, managing all of the agency's records in one centralized, easy-to-search system.

Records also includes sealing and expungement capabilities. Cases, Warrants, and Intelligence Cases can be sealed. This allows for restricting case report access to specific personnel or personnel groups. Cases and Intelligence Cases can also be expunged.

KEY FEATURES

- Master Name, Address, Vehicle Indices
- Case Report Management
- Summons/Citations/Tickets
- Case Notes and Status Log
- Property and Evidence Tracking
- Bicycle Registration
- Redaction
- Sealing and Expungement
- Found/Lost Property
- NIBRS Compliance
- Warrants
- Sex Offender Log
- Pistol Permit Tracking
- Pawn Log
- Accident Reports

Mobile Records

Mobile users can have access to much more than just dispatch information. Integration with Records puts name, address, case, and civil process records at their fingertips, and they can run Records queries to find the information they need in the field. Mobile users can write and/or approve case reports in their vehicles instead of returning to the agency, just one more feature that keeps them on the streets, visible in the community, and able to respond quickly when they are needed. The mobile Records system functions the same as the desktop version, so there is no need for agencies using both products to retrain their users.

Portal – Remote CFS Pack

Keeping public safety employees aware and informed about the occurrences in their departments.

The Remote CFS Pack is a secure, web-based portal page that allows agency employees the ability to search, view, and print select data from Public Safety Suite Pro from any device with internet access. Pull up the details of a call for service or look at computer-aided dispatch unit statuses from anywhere with Portal on a mobile device.

By using Portal, agencies improve communications within the department. Employees have access to key information and are more empowered, no matter where they are, using web-enabled devices.

Portal users with special permissions can create custom recurring reports and publish them to Portal.

The Remote CFS Pack includes the following Portal pages: Unit Statuses and Current CFS.

KEY FEATURES

- Access to Real-time CFS Data
- Improve CFS Visibility for Authorized Users
- Multi-agency Data Sharing
- Fine-grained Permissions

Field Ops

Providing critical situational awareness to first responders – no matter how far from their vehicle they may be.

CentralSquare is committed to constantly evaluating and rethinking the relationship between public safety and technology. As technology changes, platforms must evolve. To that end, CentralSquare has directed a significant amount of time and energy toward designing a smartphone application with field officers in mind.

Field Ops was built with a focus on what officers want most in a mobile app – situational awareness, functionality free of an MDT, and a set of tools that eliminates the need for unnecessary hardware like a camera or a voice recorder. Existing solutions aren't user friendly and are often difficult to configure and distribute. Field Ops is different; it's secure, easy to implement, and even easier to use. Better yet, it's FIPS 140-2 compliant and has optional multi-factor authentication to fulfill CJIS Advanced Authentication requirements.

KEY FEATURES

- Integrated Photo and Audio Capture Tools
- Safety-first Information for all Responders
- CJIS Security Standards for Mobile Devices
- Data Capture and Upload to CentralSquare Pro
- Active Calls and Unit Lists with Live Updates
- Increased Situational Awareness
- Real-time CFS Data for Users in the Field
- CentralSquare Pro Credentials Authentication
- Digital Property and Evidence Collection

CrimeMapping.com

Increasing transparency between public safety agencies and the citizens they serve, while protecting victims and investigations.

CrimeMapping.com helps law enforcement agencies keep the public updated on recent criminal activity. By searching an address, feature (such as a school or park), or agency, citizens can get detailed and timely crime data information. Law enforcement agencies can also elect to include sex offender data. The site is accessible from any computer or mobile device, and it takes only a few clicks for citizens to access the data. Sharp mapping visuals and enhanced symbology make it easy to understand what is happening in a given location.

CrimeMapping.com uses an advanced mapping engine to provide functionality and flexibility to agencies. Crime data is extracted on a regular basis from each department's records system, ensuring that information is current. This data is always verified for accuracy, victim names are redacted, and all address information is generalized by block to protect privacy. This tool is also useful for generating static graphs and reports.

KEY FEATURES

- Public-facing Portal
- Visual Representations of Crimes from Imported CAD Data
- Citizen Email Alerts Sign-up
- Submit a Tip Capability
- Printable Map Screens and Charts
- Record-sharing with Other Agencies
- Advanced Mapping Engine with Streets, Terrain, and Image Layers
- Filter by Crime Type, Dates, or Area to Create Simple Reports
- Searchable by Address, Landmark, Zip Code, or Radius to an Agency or Location

Community Data Platform

Providing benefits to agencies across the world in exchange for data sharing.

The Community Data Platform, or CDP, is a free "data warehouse" solution designed to encourage data sharing between agencies all over the world. Each agency that signs up for the service can push CAD and RMS incident information to this repository, exposing only the data that they choose. This information is then made available to other agencies accessing the service. Searches can be performed by up to 10 concurrent users for the following information:

- CAD Incidents
- RMS Incidents
- RMS Arrests
- RMS Warrants
- RMS Master Names

Custom Forms

CentralSquare offers a custom form generator at no additional cost as a standard part of Public Safety Suite Pro. This tool allows agencies to create unique forms within the system and attach them to specific records in Public Safety Suite Pro, keeping everything in an easily accessible, central location.

Name, address, and vehicle fields are connected to each agency's master indices to reduce data entry. The master indices are searched, and existing information can be selected from the database. This notifies staff of any alerts related to the master indices. If the information being entered is new, the master index is updated so that the information is immediately available in other parts of Public Safety Suite Pro.

When building the form, information from related files, such as case numbers or incident times, can be pulled in automatically. Available information is displayed in a menu for each form type. Adding information to the form is as simple as clicking on the item in the menu.

All data within custom forms are searchable. This makes finding needed information an effortless, efficient process. Instead of searching through paper files or trying to find the correct folder on a server, links and search capabilities make it easy to locate specific information. Data included in forms can also be used to create reports with Reporting.

Custom Modules

Like Custom Forms, Custom Modules give agencies the power to track any information they may need in an integrated part of Public Safety Suite Pro. Agencies can eliminate paper logs and stand-alone spreadsheets by creating modules to fit their exact needs.

Rather than being associated with a record type within the system (as is true for Custom Forms), Custom Modules can track anything an agency needs, such as burn permits, pet licenses, or boat licenses. Each of these records can also create involvements on master name, vehicle, and address records, adding to the power of the data within the system.

Everything within each created module is customizable by the agency, from the log screen that displays information, to the drop-down menu items within the modules, to the templates used to print records. All data entered in Custom Modules is also available in Reporting for reports and statistical analysis.

Custom Fields

For situations where Public Safety Suite Pro doesn't have a system field to track something important to the agency, Custom Fields can be configured on more than one hundred screens within the suite. This allows users to collect additional data for each record type in Pro Suite, making even standard screens truly flexible for each agency's needs. Custom dropdowns, date fields, personnel fields, sequence numbers, and many other types can be added. Several configuration options are available for each field, including field type, default value, and whether the value is displayed on a printout. Custom Field data can be gathered by the report generator in the same manner as standard field data.

Public Safety Suite Pro Implementation

CentralSquare uses a multi-phase approach to ensure a successful implementation for each client agency. Trained and experienced members of the CentralSquare implementation team move through the process with each agency to assure successful outcomes. The following reflects a general timeline that all Pro Suite projects follow.

Kickoff Meeting	Upon contract signature, a kickoff meeting is scheduled to initiate the implementation process, including setting up a statement of work, server installations, and scheduling the Business Process Review (BPR).
Server Setup	CentralSquare procures the Pro Suite servers. The CentralSquare DevOps team sets them up in the Sioux Falls Center of Excellence, installing all necessary software and hardware. The servers are then shipped to the agency for installation and racking on site.
BPR	The goal of the BPR is to confirm contractual requirements, demonstrate Pro Suite software, and have discussions about current DPD processes. The CentralSquare project team will offer best practices and begin capturing the high-level configuration of the DPD's Pro Suite implementation. All product needs and requests are reviewed.
System Config	CentralSquare consultants work with DPD personnel to complete the planned configurations. In addition, CentralSquare Technologies configures and tests interfaces and begins the data conversion process.
System Review	Once configuration is complete, the CentralSquare project team will guide the DPD through end-to-end user testing of the configured software. The goal of System Review is to confirm that the configuration is complete and fits the DPD's needs at all levels.
User Training	CentralSquare provides hands-on software training with real scenarios. Class sizes are limited to ensure that each individual has sufficient time to practice using the system. When the Go Live date arrives, users are well prepared to begin using the new software.
Go Live	CentralSquare provides support the day that the new system goes live. Any questions that arise are addressed immediately by the CentralSquare team, ensuring that the first day using the new system goes smoothly.
System Acceptance	The DPD reviews all aspects of the software, data conversion, and interfaces, and any concerns are documented by the project team. This list of action items is addressed before the agency officially accepts the system. At this point, CentralSquare's Support team takes over the day-to-day needs of the agency.

CentralSquare Pro Maintenance and Support

UNPARALELLED SERVICE. Pro Suite has an unmatched client retention rate thanks to excellent CentralSquare support and service. CentralSquare provides more maintenance and support services than other public safety software vendors, including full responsibility for the server software and hardware for as long as an agency stays current with the standard support and maintenance agreement.

24 X 7 X 365 SUPPORT. CentralSquare knows clients use their software all hours of the day. That is why clients can call the toll-free support line at any time and connect with a live person—not an automated answering service or someone overseas. Questions or issues can also be reported via email. Even if it is just a simple “how-to” question, support representatives are ready to assist.

Every call received is entered into a tracking system and assigned a number to ensure that no concern goes unnoticed. Response times are monitored so that all issues are resolved as quickly as possible. All critical issues are given the highest importance ranking and the CentralSquare development team devotes their attention immediately to the matter until it is resolved.

TRACKING CONCERNS. CentralSquare believes transparency is very important when it comes to support of Pro Suite. The support center has a web-based portal which agencies can use to view the status of all their calls and support requests.

SERVER MANAGEMENT. Pro Suite servers are completely maintained on the client's premises by the CentralSquare staff as part of the standard maintenance agreement. These servers are constantly monitored for performance levels and network load. All upgrades to hardware, such as additional disk space, are handled by CentralSquare. This makes the system essentially worry-free for agencies and their IT staff.

FULL SYSTEM BACKUPS. Rather than requiring a manual backup of data or a scheduled download of the entire system, CentralSquare uses an automatic rolling back-up process. Any changes or additions made to Public Safety Suite Pro are constantly streamed to an optional warm standby server, an off-site storage facility, or both. Because the data flow is a constant stream, lower bandwidth is required in comparison to a large file transfer. This ensures that data backups are done without compromising system performance. The data stored on the standby server or off-site storage facility is never more than a few minutes old, so in the event of a power failure or unforeseen disaster, the Pro Suite system and data will still be accessible.

REMOTE SERVICES. Many questions or issues can be solved immediately by the support team using a remote desktop connection. Once connected, the support team walks users through solutions or accesses the agency's server to help diagnose any issues.

SOFTWARE UPDATES. CentralSquare pays attention to each client's needs and challenges. Client insights can lead to enhancements to improve the safety and responsiveness of public safety professionals.

CentralSquare Public Safety Suite Pro's standard maintenance contract includes regular software updates with feature enhancements. Patches are provided as needed with no agency intervention. Clients receive a greater return on investment because of CentralSquare's commitment to continually improve its public safety software.

Software updates are performed using an advanced process that makes client updates completely automatic with no assistance from DPD IT staff. Support representatives contact each agency as software updates are released to schedule them and assist the agencies in taking advantage of new features. This ensures that every agency continues to get the most out of what Pro Suite offers.

NEW FEATURE TRAINING. CentralSquare Public Safety Suite Pro trainers and support representatives frequently hold web-based meetings. These meetings introduce system administrators or other agency personnel to new features and configuration options that benefit our users. This service is offered as part of the ongoing maintenance and is free of charge.

RESEARCH & DEVELOPMENT. CentralSquare believes that public safety software should keep pace with changes in the public safety environment, as well as with advances in technology. Because of this, a significant portion of revenue each year is invested in research and development. Pro Suite is constantly expanding and improving. Each new feature is designed to broaden its functionality and configurability and help its users to do their jobs more efficiently and safely.

AGENCIES USING CENTRAL SQUARE PUBLIC SAFETY SUITE PRO HAVE REDUCED:

TIME SPENT ENTERING DATA BY
OVER 50%

PAPER-BASED FORMS BY
UP TO 80%

TIME SPENT ON RMS PROCESS
BY 60%

ONGOING SYSTEM
MAINTENANCE COSTS BY 60%

Annual Maintenance and Subscriptions renewals shall be due on the anniversary of the Delivery Date*. Annual Maintenance and Subscription Fees are subject to increase as outlined in the Master Agreement.

*Delivery Date: For on-premise Solutions, Delivery shall be when CentralSquare delivers to Customer the initial copies of the Solutions outlined above by whichever the following applies and occurs first (a) electronic delivery, by posting it on CentralSquare's network for downloading, or similar suitable electronic file transfer method, or (b) physical shipment, such as on a disc or other suitable media transfer method, or (c) installation, or (d) delivery of managed services server. Physical shipment is on FOB - CentralSquare's shipping point, and electronic delivery is at the time CentralSquare provides Customer with access to download the Solutions. For cloud-based Solutions Delivery shall be whichever the following applies and occurs first when Authorized Users have (a) received log-in access to the Solution or any module of the Solution or (b) received access to the Solution via a URL.

The On Premise Subscriptions purchased under this Quote shall be governed by Exhibit A attached hereto.

BILLING INFORMATION

Fees will be payable within 30 days of invoicing.

Please note that the Unit Price shown above has been rounded to the nearest two decimal places for display purposes only. The actual price may include as many as five decimal places. For example, an actual price of \$21.37656 will be shown as a Unit Price of \$21.38. The Total for this quote has been calculated using the actual prices for the product and/or service, rather than the Unit Price displayed above.

Prices shown do not include any taxes that may apply. Any such taxes are the responsibility of Customer. This is not an invoice.

For customers based in the United States or Canada, any applicable taxes will be determined based on the laws and regulations of the taxing authority(ies) governing the "Ship To" location provided by Customer on the Quote Form.

Terms and Conditions for On-Prem Subscriptions

BY INDICATING YOUR ACCEPTANCE, OR BY USING THE SOFTWARE, YOU ACCEPT THE TERMS AND CONDITIONS AS STATED HEREIN.

1. **Subscription Access.** Customer is purchasing subscription priced software under this Quote. So long as Client has paid the annual subscription fees and is current at all times with the subscription fees as stated herein, CentralSquare grants to Client a limited non-exclusive, non-transferable access to use the subscription software granted in this Quote. Client understands and acknowledges no ownership or any form of intellectual property rights transfer under the terms of this Quote.

If customer terminates this Quote in accordance with the termination for convenience provision below, customer shall be entitled to a pro-rata refund of the annual subscription fee, calculated by the remaining months in the applicable annual subscription.

2. **Termination for Convenience.** This Quote may be terminated without cause by either party by providing written notice to the other party thirty (30) days prior to the date of termination.
3. **Termination of Access Rights.** Upon termination of this Quote, (i) all rights granted herein shall terminate immediately and automatically upon the effective date of such termination; (ii) Customer's right to the accessed software granted herein shall terminate; and (iii) Customer will cease using such software and at CentralSquare's direction return or destroy the software and any supplemental confidential information or documentation.
4. **Right to Audit.** Customer shall maintain for a reasonable period, but in no event less than three (3) years after expiration or termination of this Quote, the systems, books and records necessary to accurately reflect compliance with software access and the use thereof under this Quote. Upon request, Customer shall permit CentralSquare and its directors, officers, employees, and agents to have on-site access at Customer's premises (or remote access as the case may be) during normal business hours to audit such systems, books, and records for the purpose of verifying Customer's use of the software to monitor compliance with this Quote no more than once per year. If an audit reveals that Customer has exceeded the restrictions on use or non-compliance with this Quote, Customer shall be responsible for the reimbursement of all costs related to the audit and prompt payment by Customer to CentralSquare of any underpayment.
