*Labor/ Time implementing management practices	80 Hours	\$10/ hr	\$800
TOTAL			\$3000

\*The quantitative time for implementing management practices through bow hunting varies immensely based on weather conditions, wind directions and accessibility to permitted lands.

\*License fee is in the quantity of 20 due to the maximum potential number of deer to be removed. A better understanding of the amount for removal will be estimated upon management practices being accepted. 20 is the maximum number that would be harvested in a given year. A more realistic number will be 12-15 for the first few years.
