MEMORANDUM

To: City of The Village of Douglas Planning Commission
Date: March 8, 2024
From: Tricia Anderson, AICP
RE: **57 Chestnut St., 69 Washington St., and 67 Washington St. – Rezone Request from R-3, Neighborhood Conservation District to R-4, Harbor Residential**

Max Nykerk, of Lakewood Construction, Inc., on behalf of AMK Holdings, LLC, is requesting to rezone the following three parcels shown in Table 1, from R-3, Neighborhood Conservation to R-4, Harbor Residential. The purpose of this memorandum is to review the rezoning request pursuant to Article 28, Amendments, of the City of the Village of Douglas Zoning Ordinance.

Address	Parcel #	Acreage	Square Feet	Legal description
57 Chestnut Street	59-100-003-00	.15	6,534	LOT 3 DOUGLAS PLAT
69 Washington Street	59-100-004-00	.22	9,583.2	LOT 4 & N 34 FT LOT 5 DOUGLAS PLAT ALSO THAT PT OF THE PUBLIC ALLEY LOCATED BETWEEN WALL ST & CHESTNUT ST FROM THE E LIN OF WASHINGTON ST TO THE W LIN OF WATER ST; A DISTANCE OF ONE BLOCK SEC 16 T3N R16W
67 Washington Street	59-100-005-00	.25	10,890	LOT 5 EX N 34 FT & LOT 6 DOUGLAS PLAT.

Table 1 – Subject Parcel Information

Background and Request. The parcel located at 57 Chestnut contains a two-story home and has been used as a rental property for several years. The parcel located at 69 Washington is vacant, and 67 Washington is occupied by “the red barn”, which is currently empty. The parcels at 27 and 31 Water Street and 62 Chestnut Street are also under the same ownership as the subject parcels.

We have had several pre-application conferences with the applicant to discuss the project, and the City's procedures for the review of development proposals and rezoning requests, permitted land uses in residential districts, and future land uses as laid out in the City's Master Plan. The application narrative indicates that the applicant is seeking to build a multifamily development within a single building on the rezoned parcels. These parcels would be provided access to the lake through 27 Water Street, which would be developed with additional amenities such as a pier with private boat slips on

Figure 1 – Parcels under common ownership. Parcels outlined in blue are the subject parcels proposed for rezoning. Parcels outlined in red are owned by AMK Holdings and part of the overall conceptual development

Kalamazoo Lake and a swimming pool. In our pre-application conferences, we explored the potential for developing the property as a PUD due to the uniqueness of the described overall development plan. This could include all the parcels under the owner's control in this area, however, these parcels would not meet the required 2-acre minimum size for a PUD. We also discussed the possibility of vacating Water Street from Wall Street to Chestnut, and Chesnut from Water Street to Washington, to further facilitate the development. However, the applicant indicated that they were not interested in pursuing street vacation and have therefore limited the request to only include the three parcels outlined in red in Figure 1.

Procedure. The Planning Commission is tasked with reviewing the request to rezone the subject parcels and making a recommendation to the City Council to approve, deny, or table the request. If the City Council approves the rezoning request, the applicant can then apply for the proposed development. At this stage, a site plan is not required to be submitted in conjunction with the request to rezone the property; however, the longer-term plans for the property and the context surrounding the application may impact the Planning Commission's thinking as it evaluates the request.

The applicant has submitted a narrative that describes a multifamily project and some of the uses that are planned on the parcels under common ownership, but this should not be considered binding, should the rezoning be approved.

Review. Section 28.05 outlines the required information that must be submitted by the petitioner. We have determined that the application is complete, thus, we have reviewed and considered the factors listed in Section 28.06, Planning Commission Recommendations. These factors are listed below, along with our analysis of each.

1. *In reviewing any application for an amendment to this Ordinance, the Planning Commission shall identify and evaluate all factors relevant to the application and shall report its findings in full along with its recommendations for disposition of the application, to the City Council within a reasonable period. The matters to be considered by the Planning Commission shall include, but shall not be limited to the following:*

a. *What, if any, identifiable conditions related to the application have changed since the existing zoning district was established that justify the proposed amendment?*

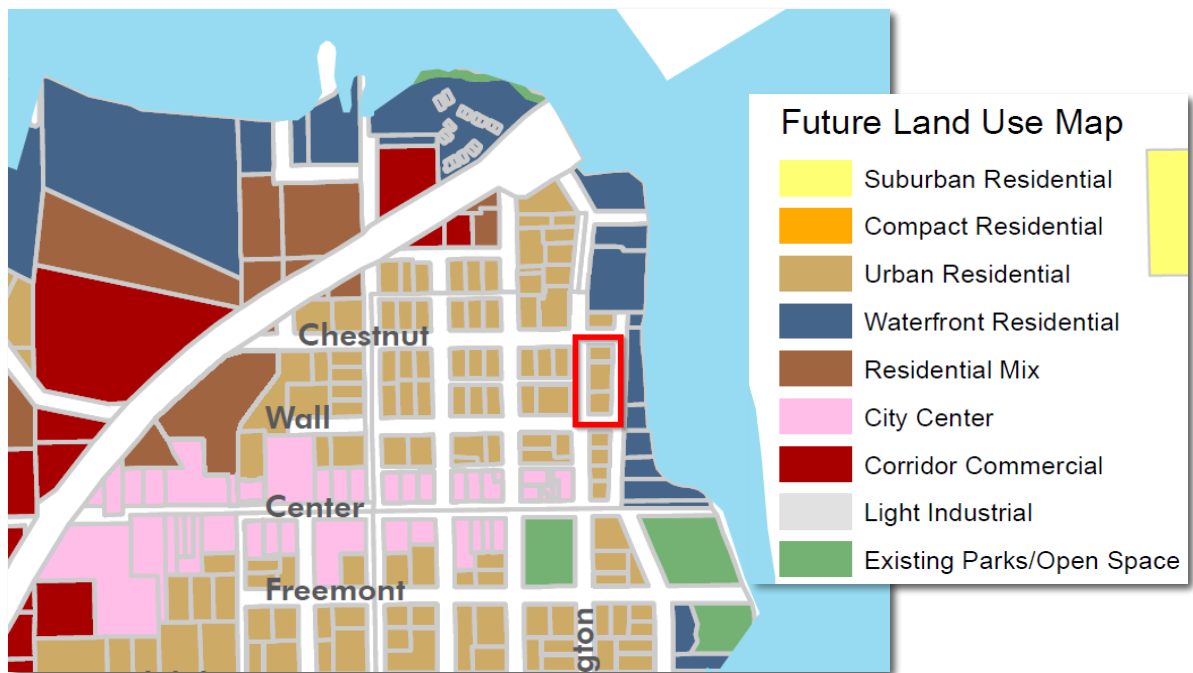

Remarks: In the response to this question on the rezoning application, the applicant cites the dates of adoption of the zoning map and the future land use map in the 2016 Master Plan. While the Zoning map was updated in 2014, and this is the official zoning map for the City, the R-3, Neighborhood Conservation district was not established or created in 2014. The 1998 zoning map depicts the subject parcels and surrounding area as R-3, so we know that it's been R-3 since at least 1998.

The proposed rezoning from R-3 to R-4 *may* be viewed as a step in the right direction as it relates to combating the housing shortage since the R-4 district allows multifamily developments as a special land use. A multifamily development would add to the housing stock and may be more affordable than single-family. However, as explained in Factor e. below, the rezoning request requires that the Planning Commission consider the *range* of land uses that would be permitted in R-4, since the straight rezone to R-4 is not required to be tied to a site plan that must later be adhered to, and there is no guarantee that the property owner will pursue a multifamily development. Further, a rezoning to Harbor Residential may not make sense for property that does not have any water frontage, particularly since there is no guarantee that the other property owned by the applicant would be incorporated into a cohesive project that aligns with the purpose and intent of the R-4 district.

The Planning Commission will need to determine if the changes that have occurred within the community since the earliest known establishment of the R-3 zoning district (1998) would warrant the rezone from R-3 to R-4.

b. *What are the precedents and the possible effects of such precedents that might result from the approval or denial of the petition?*

Remarks: Factor f. below describes in greater detail the importance of using the City’s Master Plans as policy guides for making decisions on rezoning requests. The Future Land Use chapter in the Master Plan contains a zoning plan, which provides guidance on compatible zoning districts for each future land use designation. Figure 2 provides the future land use (FLU) designation and zoning plan recommendation for the subject parcels. The 2016 Master Plan designates the subject parcels as *urban residential* and the associated zoning plan names R-2 as the primary compatible zoning district and C-1 as the potentially compatible zoning district. The parcels located at 27 and 31 Water Street are FLU-designated as *waterfront residential* which does align with the primary compatible zoning district of R-4, however, they are not included in the rezoning request, and the City does not have reasonable assurance that they will be tied to any future development of the subject

Future Land Use Designation	Primary Compatible Zoning District(s)	Potentially Compatible Zoning District
Suburban Residential	R1	R1, R2
Compact Residential	R3	R1, R2
Urban Residential	R2	C1
City Center	C1	None*
Residential Mix	R5	C1
Waterfront Residential	R4	R5
Corridor Commercial	C2	C1
Light Industrial	L1	C2
Existing Parks and Open Space	Any	Any

* A zoning district which completely supports the vision of these land use categories does not currently exist; and should be included in a future form based code.

Figure 2 – 2016 Master Plan, Future Land Use Map and Zoning Plan

parcels. The waterfront parcels are shallow, in the floodplain and may contain wetlands, so they could be nearly unbuildable without variances. Even if they were totally unencumbered by these factors, it would be inadvisable to develop the property with the amenities envisioned by the applicant without any assurance that they will be used for the multi-family project over the long term. If they were included in the rezoning request along with the subject parcels and somehow tied to their future development, the perception of whether the request may be viewed as “spot zoning” would perhaps be diminished.

This factor asks the Planning Commission to determine whether a precedent would be set by the approval of the zoning from R-3 to R-4. The Planning Commission may wish to consider whether the approval of a rezone to R-4 without the alignment of the FLU designation and the recommendations of the zoning plan, or the fact that no other parcels in the vicinity are zoned R-4, would risk setting a precedent of “spot zoning”.

- c. What is the impact of the amendment on the ability of the City and other governmental agencies to provide adequate public services and facilities, and/or programs that might reasonably be required in the future if the proposed amendment is adopted?***

Remarks: The amendment is not anticipated to negatively impact the City’s ability to provide utilities or other public services such as fire and police services. It should be noted that Water Street is a sub-standard public street and was not included in the inventory of roads marked for improvements in the most recent rounds of road improvements within the City. Further detail is provided in Factor e. regarding the range of uses that would be permitted in the R-4 zoning district. The width of the road should be taken into consideration as it relates to some of the uses that are permitted by right, and whether its substandard width would be problematic in supporting those land uses.

- d. Does the petitioned district change adversely affect environmental conditions or the rights of a neighboring property owner?***

Remarks: The neighborhood contains a mix of historic and modern homes. Many have a view of Wade’s Bayou and Kalamazoo Lake. The R-4 district is intended “to preserve the visual integrity of the District including the preservation of important harbor views”. This intent is further supported by the height restrictions in Article 7, Harbor Residential District, for buildings constructed within 150’ of the water’s edge. Regardless of the zoning district, the “rights” to the view are only perceived, as the Zoning Ordinance does not contain provisions for required view preservation.

Therefore, we do not believe that any rights of neighboring property owners would be infringed upon with the approval of the rezone.

Figure 3 – Area views of Kalamazoo Lake

The range of uses must be considered when determining whether any adverse effects, such as environmental, would be anticipated. Because the properties do not have frontage on the water, a marina (which involves dredging), would not be a feasible land use on the subject parcels. It should be noted that a minor marina is permitted in the current R-3 zoning district. We do not foresee any adverse effects on the environment as a result of a rezoning.

e. *Is the class of uses permitted in the district appropriate for the location proposed to be rezoned?*

Remarks. Figures 4 and 5 provide the uses that are permitted by right and permitted by special land use approval in R-4 and R-3, respectively. The range of land uses permitted in R-4 comes with a range of intensity, with the more intense uses being permitted only with special land use approval. The zoning plan from the 2016 Master Plan, as shown in Figure 2, indicates the compatible and potentially compatible zoning districts for parcels with a future land use designation of *urban residential*. The potentially compatible zoning district listed is C-1, which would allow similarly intense land uses as R-4 and *could* be considered in a rezoning request of any R-3 zoned parcels.

The Planning Commission must determine whether any of the uses in the R-4 zoning district are not appropriate for this particular location.

<u>A. Permitted Uses</u>
<ul style="list-style-type: none"> ◆ Accessory Use, when accessory to permitted use ◆ Child Family Day Care Home ◆ Conservation areas public or private including, wetlands, sand dunes, and similar uses ◆ Dwelling, One Family ◆ Dwelling, Two Family ◆ Essential Public Services ◆ Neighborhood Parks ◆ Outdoor Public Recreation
<u>B. Special Land Uses (cont.)</u>
<ul style="list-style-type: none"> ◆ Home Occupation, major subject to Section 26.19 ◆ Marina including Marina Hardware and Retail Sales, subject to Section 26.20 ◆ Multiple Family Development, subject to Section 26.24 and the City of Douglas Design Guidelines for Multifamily Development ◆ Place of Public Assembly, small subject to Section 26.29 ◆ Private Recreation Facility, subject to Section 26.27 ◆ Professional Service Establishment, subject to Section 26.28 ◆ Residential Use of an Accessory Building, subject to Section 26.30 ◆ Schools subject to Section 26.31 ◆ Studio for Performing/Visual Arts, subject to Section 26.33 ◆ Adult Foster Care/Child Foster Family Facility, subject to Section 26.01 ◆ Bed & Breakfast, subject to Section 26.05 ◆ Buildings associated w/ Public Facilities, subject to Section 26.29 ◆ Cemeteries/Mausoleum, subject to Section 26.07 ◆ Child Care Center/Adult Day Care Facility, subject to Section 26.08 ◆ Convalescent or Nursing Home, subject to Section 26.11

Figure 4 – Section 7.02, District Summary: Uses Permitted by Right and by Special Land Use in R-4, Harbor Residential.

<u>A. Permitted Uses</u>
<ul style="list-style-type: none"> ◆ Accessory Use, when accessory to permitted use ◆ Conservation areas public or private including, wetlands, sand dunes, and similar uses ◆ Dwelling, One-Family ◆ Dwelling, Two-Family ◆ Essential Public Services ◆ Child Family Day Care Home ◆ Home Occupation, Minor (See 16.04) ◆ Neighborhood Parks ◆ Outdoor Public Recreation
<u>B. Special Land Uses</u>
<ul style="list-style-type: none"> ◆ Bed & Breakfast, subject to Section 26.05 ◆ Buildings associated w/ Public Facilities, subject to Section 26.29 ◆ Cemeteries/Mausoleum, subject to Section 26.07 ◆ Home Occupation, Major, subject to Section 26.17 ◆ Marina, Minor, subject to Section 26.20 ◆ Residential Use of an Accessory Building, subject to Section 26.30

Figure 5 – Section 6.02 District Summary: Uses Permitted by Right and by Special Land Use in R-3, Neighborhood Conservation District

f. Does the petitioned district change generally comply with the Tri-Community Comprehensive Plan or a subsequent document that guides land use and development decisions in the City of the Village of Douglas?

Remarks: The Planning Commission should take into consideration the goals and vision of the 2016 Master Plan. As noted in previous sections of this memorandum, the Master Plan guides as it relates to land use decisions. The proposed R-4 zoning district does not align with the zoning plan, however, the Planning Commission does have the discretion and authority to recommend approval on a rezone that does not align exactly with the zoning plan, particularly when property directly adjacent to the subject properties are within a compatible future land use designation.

The Future Land Use map and zoning plan are not the only areas within the Master Plan that the Planning Commission should consider. The text that describes the future land use designation is also valuable in aiding in the decision-making process.

Urban Residential (up to 6 du/ac)

Intent: To address the need for denser housing options that help to protect open space by utilizing higher densities while providing a mix of housing for families of varying income levels. These uses are typically located just outside of the city center.

Desired Building Types:

- Single-family detached house
- Accessory dwelling units

Waterfront Residential (Density Varies)

Intent: To address single-family and multi-family residential uses which abut Kalamazoo Lake and Wade's Bayou. These uses may also be adjacent to or in close proximity to the marina, accommodating single-family residences and resort or tourist lodging consistent with the natural, waterfront setting of the area. Marina and other waterfront uses may be considered as special land uses. Development in these areas will be encouraged to preserve views of the water bodies and restricted from disturbing any environmentally-sensitive areas.

Desired Building Types:

- Frontage south of Wade's Bayou, single-family detached
- Frontage along Kalamazoo Lake, single-family, large and small multi-plexes

g. What is the ability of the property in question to be put to a reasonable economic use in the zoning district in which it is presently located?

Remarks: This factor asks the Planning Commission to consider whether the subject parcels can be reasonably used as zoned and whether those uses would be of economic value. A single-family home is a permitted use and has economic

value. The applicant's response to this factor seems to point to the *financial* feasibility of the subject parcels being developed under R-3 zoning stating that, "the number of units allowed would not support the costs of development." Economic value and financial return, while related, have different meanings in the context of a rezoning request. Economic value considers a wider range of variables, one of them being financial return, as it relates to the benefits to the community, potential environmental impacts, and the priorities of the community. Financial return relates primarily to the profitability of an investment, not necessarily tied to the same community-specific variables that economic value is.

We would consider the subject parcels capable of supporting a reasonable economic use under the current R-3 zoning district.

Final Thoughts. This rezoning request is somewhat tricky. While the City would like to see improvements in this area, we are concerned that absent a comprehensive plan to develop the land owned by the applicant, there is no guarantee that the land will be developed in a thoughtful, cohesive manner. While the applicant's conceptual plans for land uses on the group of parcels under common ownership sound appealing, the City does not have any reasonable assurance that these ideas will come to fruition. Factors can change. The land could be sold. Other plans may become more attractive. Without somewhat of a "master plan" for the remainder we are hard-pressed to recommend the approval of the rezoning as presented. The applicant has indicated that the subject parcels would be proposed for a multifamily development that has access to the waterfront through the Water Street parcels, where a swimming pool, dock and private boat slips, and other private amenities for the residential development. In order for all these pieces to come together, several other approvals would need to be sought, all with specific requirements and standards that must be met. Seeking these approvals in a disconnected and uncoordinated manner offers no benefits and invites future complications for the City.

The Planning Commission has made favorable recommendations in the past on rezoning proposals for a zoning district that does not align with the primary compatible zoning district as recommended in the Master Plan's zoning plan. However, those decisions were made with all variables being taken into consideration and with a desire to see positive change in a specific area within the City. As a reminder, the Master Plan is a guide that sets policies for future uses, residential and non-residential growth, and preservation of uses and lands within the City. It is not a law, which means that the Planning Commission has some discretionary authority as it relates to making decisions on rezoning requests.

We have expressed our general support for the conceptual development ideas that the applicant has conveyed to us. Unfortunately, in a rezoning request for three of the parcels that are not assuredly connected to the other parcels under common ownership in a unified development plan, we would rely on the Planning Commission's determination of whether the

rezoning standards are met. Given the totality of the information presented, we are not convinced that they are.

Recommendation. At the March 14th, 2024 meeting, the Planning Commission should carefully consider the comments expressed by the public, the applicant, and fellow Commissioners in making its decision on a recommendation to the City Council for the request to rezone the subject parcels located at 57 Chestnut St., 69 Washington St., and 67 Washington St. from R-3, Neighborhood Conservation District to R-4, Harbor Residential district. We recommend that the Planning Commission rely on the findings stated in this report, along with other factors deemed relevant in its decision to forward a recommendation to the City Council. It should be noted that, procedurally, the applicant has the right to move forward with the first and second reading of the rezoning request at the City Council, even if the recommendation made by the Planning Commission is not favorable.

As always, please feel free to contact us with any questions or comments.

**ARTICLE 7:
R-4 HARBOR RESIDENTIAL DISTRICT**

Section 7.01 Intent

It is the intent of the R-4 Harbor Residential District to provide for residential development densities and uses consistent with the Tri Community Comprehensive Plan and the character of the area. The R-4 District is intended to provide higher density housing opportunities in close association with the City's harbor area while also permitting limited nonresidential land uses, which are fundamental components of the harbor area and which play significant roles in supporting the desired character of the harbor area and its residential neighborhoods. It is the intent of this District to stabilize, protect, and encourage the residential character of the District, prohibit activities not compatible with the current and future intended harbor character, and preserve the visual integrity of the District including the preservation of important harbor views. It is further intended that new buildings be aesthetically compatible in design and appearance with the general character of buildings in this district.

The R-4 Harbor Residential District is intended to implement the planned residential and recreational character of the City's harbor area as presented in the TriCommunity Comprehensive Plan.

Section 7.02 District Summary

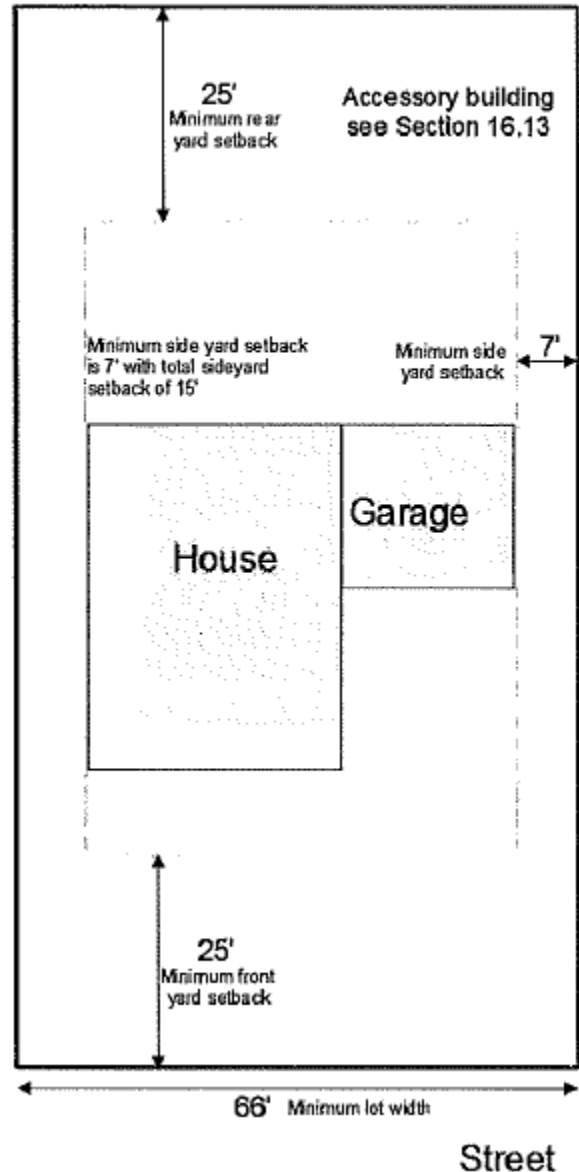

<u>A. Permitted Uses</u>
<ul style="list-style-type: none">◆ Accessory Use, when accessory to permitted use◆ Child Family Day Care Home◆ Conservation areas public or private including, wetlands, sand dunes, and similar uses◆ Dwelling, One Family◆ Dwelling, Two Family◆ Essential Public Services◆ Neighborhood Parks◆ Outdoor Public Recreation
<u>B. Special Land Uses</u>
<ul style="list-style-type: none">◆ Adult Foster Care/Child Foster Family Facility, subject to Section 26.01◆ Bed & Breakfast, subject to Section 26.05◆ Buildings associated w/ Public Facilities, subject to Section 26.29◆ Cemeteries/Mausoleum, subject to Section 26.07◆ Child Care Center/Adult Day Care Facility, subject to Section 26.08◆ Convalescent or Nursing Home, subject to Section 26.11

<u>B. Special Land Uses (cont.)</u>
<ul style="list-style-type: none">◆ Home Occupation, major subject to Section 26.19◆ Marina including Marina Hardware and Retail Sales, subject to Section 26.20◆ Multiple Family Development, subject to Section 26.24 and the City of Douglas Design Guidelines for Multifamily Development◆ Place of Public Assembly, small subject to Section 26.29◆ Private Recreation Facility, subject to Section 26.27◆ Professional Service Establishment, subject to Section 26.28◆ Residential Use of an Accessory Building, subject to Section 26.30◆ Schools subject to Section 26.31◆ Studio for Performing/Visual Arts, subject to Section 26.33

C. Site and Building Placement Standards

Minimum Lot Area:	One family	7,920
(square feet)	Two family	10,000
	Multi-Family	20,000
Minimum Lot Frontage:	One family	66 ft.
	Two family	80 ft.
	Multi-Family	100 ft
Maximum Lot Coverage:		35%
Minimum Setbacks:		
Front:		25 ft
Side:		7 ft min/15ft total
Rear:		25 ft.
Minimum Floor Area:		
One Family		1,000 sq. ft.
Two Family		
One Bedroom		650 sq. ft.
Two Bedroom		750 sq. ft.
Three Bedroom		900 sq. ft.
Each additional		+100 sq. ft.
Maximum Principal Building Height:		28 ft.
		(See 7.03 A.)
Floor Area Ratio		0.4
		(See Schedule of Regulations)

R-4 Residential

Section 7.03 Notes

- A. Shoreline Structures (Exclusive of Single Family Dwellings): Any portion of a building or structure, exclusive of one family dwellings, constructed or established within 150 feet of the shore or bulkhead, as defined under Chapter 62 of the General Ordinances of the City of the Village of Douglas, shall not exceed a maximum height of twenty-four (24) feet. Maximum height is to be measured from finished grade to the highest point of the roof structure. All construction within 150 feet of a shoreline or the river's edge shall be subject to the standards of the Waterfront Construction Ordinance (Chapter 151 of the Douglas Code of Ordinances)

- B. Multiple Family structures and related uses and structures shall be designed in accordance with the standards of Section 26.24 of this ordinance as well as the City of Douglas Design Guidelines for Multi-Family Development.
- C. Multiple Family Building and Court Dimensions
 - 1. The front and rear of the multiple family building shall be considered to be the faces along the longest dimension of said building or the front of the multiple building shall be considered to be the direction indicated on the drawings by the designer provided it is not inconsistent with the floor plan of the individual unit; and the side of the multiple family building shall be considered to be the face along the narrowest side of said building.
 - 2. No multiple family building shall exceed one hundred twenty (120) feet in length along any one face of the building.
 - 3. Any court shall have a width equal to not less than fifty (50) feet for the front yard and sixty (60) feet for the rear yard. The depth of any court shall not be greater than three (3) times the width.
- D. Each multi-family dwelling unit shall contain the same minimum total floor area as two-family dwellings (listed above) except for efficiency/studio units which shall have a minimum of four hundred (400) square feet.
- E. Multiple family dwellings shall not exceed a density of six (6) dwelling unit per buildable area on the site. Buildable area is defined as that area of the site exclusive of right-of-way, wetlands, floodplain, steep slopes (over 20%), or other areas of the site rendered unbuildable due to environmental conditions.
- F. The distance between buildings shall be a minimum of thirty (30) feet.

HOUSING AND NEIGHBORHOODS

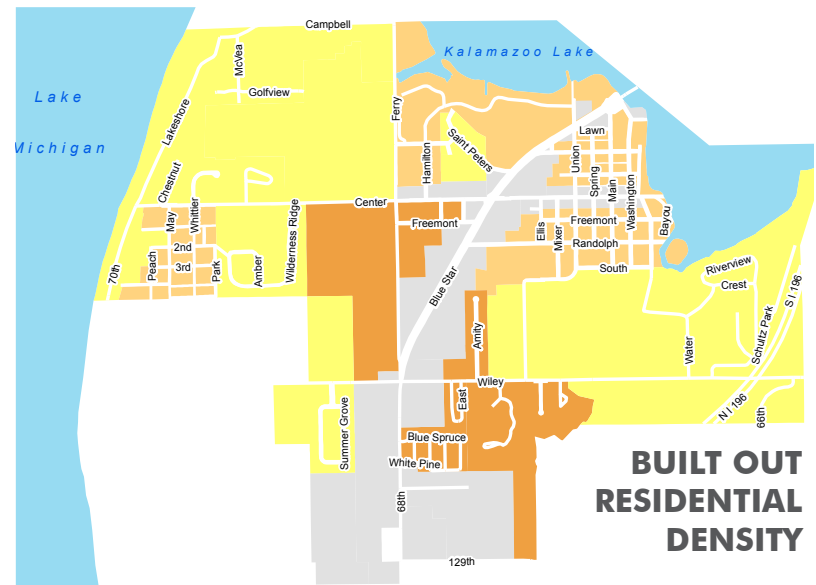

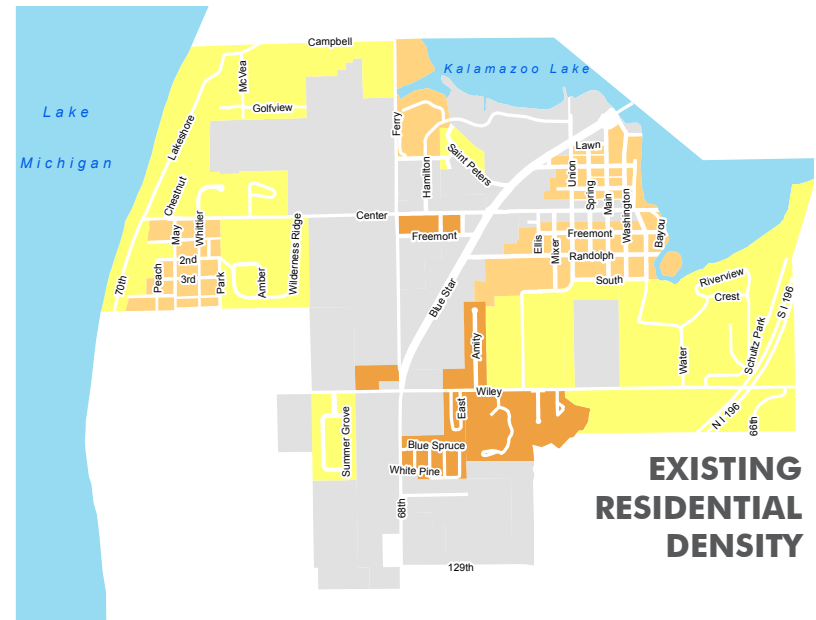

Existing Conditions

There is an underlying need for more year-round residents to support strong neighborhoods, schools and a robust economy. Existing neighborhood character types range from high density single-family development, medium density residential in some of the older residential districts downtown, and low density, primarily seasonal homes along the waterfront. Residents see the potential of the Miro Property to accomplish a variety of housing goals, including mixed housing types of condos/stacked flats, live/work space, mixed use, rowhouses and single-family detached units.

The maps shown at right display the current and potential build-out densities of residential areas. The map at top shows displays current residential density, while the map at right shows the capacity of full build out, based upon the Douglas Zoning Ordinance. High density residential zoning districts are shown in dark orange, medium density is shown in orange and low density is shown as yellow.

* Areas shown in gray are non-residential

Existing Conditions

While home types in the region vary, single family detached housing is the most prominent in the region.

In the west portion of the city, land uses consist primarily of large lot residential housing. In areas closer to downtown, home types consist of small lot single family residential and duplex housing.

- Low Density Residential (examples at top-right) is characterized by large lot, single family homes located primarily west of downtown and along the Lake Michigan waterfront
- Medium Density Residential (examples at middle-right) is characterized by midsize lot, single family homes and duplex homes located in close proximity to downtown and near the Kalamazoo Lake waterfront. A number of these lots include accessory units behind the principle living units.
- High Density Residential (example at bottom-right) is characterized by multifamily apartment units, lofts, live-work units and condominium units located primarily downtown along Center Street.

Strategic Direction

HOUSING AND NEIGHBORHOODS

Create inclusive and inviting residential areas for seasonal and permanent homeowners and renters.

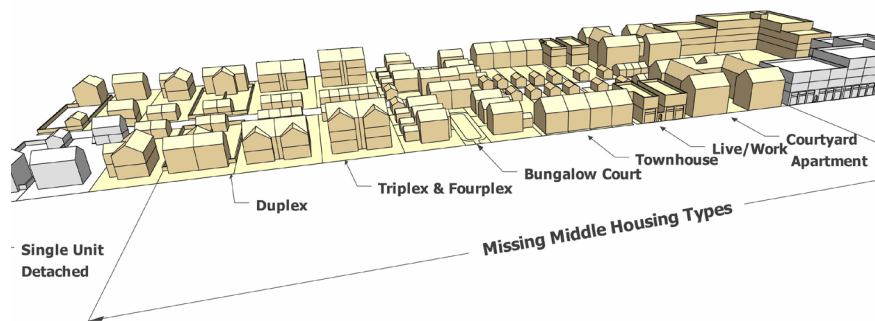

Community Values

- We value connected, walkable, neighborhoods that feature a variety of housing types.
- We value people of all ages, backgrounds and lifestyles who wish to reside in our community.
- We seek to build our community through strong neighborhoods reflecting a diversity of housing types and opportunities for all.
- We value parks and recreation amenities, located within close proximity to neighborhoods, and connected to those neighborhoods via bike trails and sidewalks.

Goal 1

Douglas will facilitate the development of a diversity of housing types to meet the needs of current and projected future populations.

Objectives

1. Integrate mixed-use live/work spaces into existing buildings in Downtown Douglas, provided that ground floor uses remain active.
2. Ensure that owner-occupied and rental housing is available and affordable in new master-planned development projects.
3. Encourage housing communities for “aging in place” and housing communities that are LGBTQ+ friendly, featuring a range of lifestyle amenities.
4. Ensure housing stock is inclusive of all age groups and attractive to the younger demographic.
5. Amend the non-conforming section of the zoning ordinance to allow rebuilding on existing footprint as administrative approval.

Goal 2

Douglas will diversify its housing stock to encourage more people to seek long term, permanent residency within the City.

Objectives

1. Explore opportunities for a senior housing complex featuring services and amenities geared towards active adults including: recreation, arts and health services, along with banking, shopping and other service-based industries.
2. Allow accessory dwelling units by right in R-1, R-2 and R-4 zoning districts.
3. Facilitate infill housing through density standards and unit size allowances.
4. Ensure existing housing stock is adequately served by utilities, and water pressure is sufficient to maintain public safety requirements.
5. Allow for “missing middle” housing types within walking distance to the city center and Douglas Elementary school to facilitate walkability.

Goal 3

Douglas will be a connected community through safe off-street walking and biking facilities and through the provision and maintenance of parks and recreation facilities.

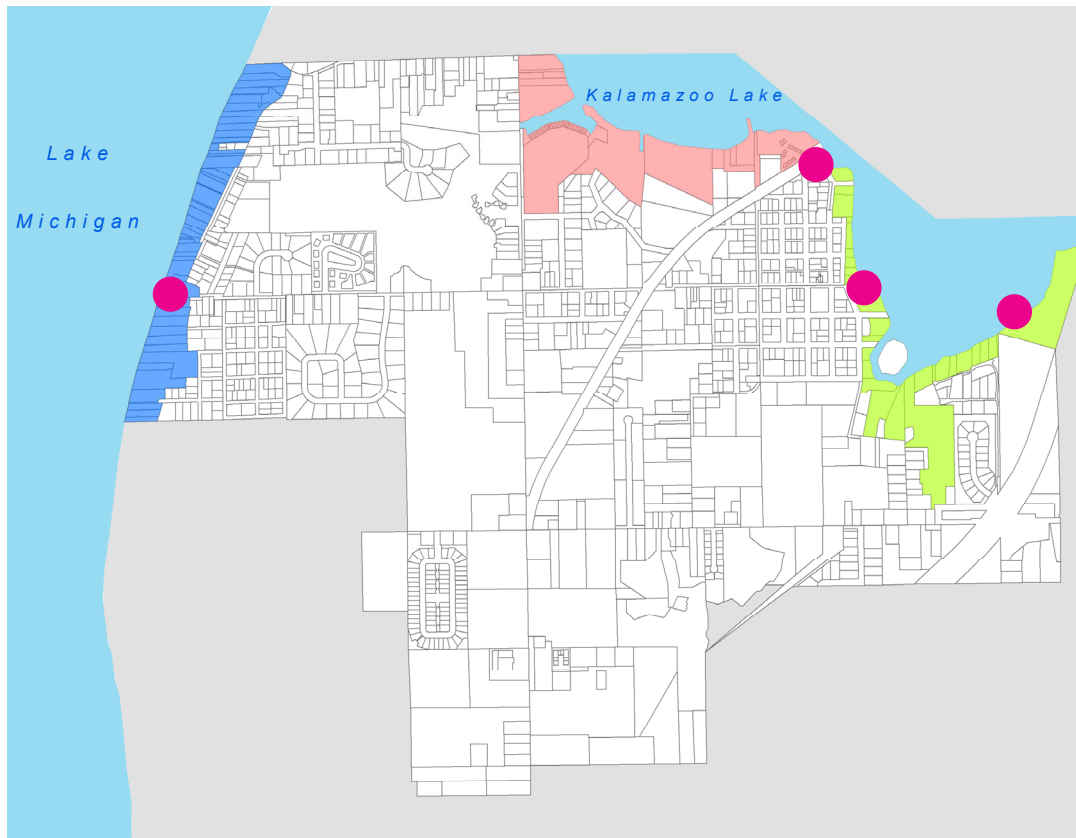

Objectives

1. Require sidewalks for all new development within the City.
2. Consider a sidewalk installation and maintenance strategy for streets within 1/2-mile of downtown Douglas and Douglas Elementary School.
3. Complete the Beach to Bayou trail and Blue Star Highway pathway.
4. Enhance Washington Street to accommodate a marked pedestrian route from Downtown Douglas/Center Street north to Blue Star Highway.
5. Continue to invest in and maintain parks and recreation facilities.

WATERFRONT

Existing Conditions

The map shown shows all lakefront property in the City of Douglas by parcel layer. The majority of the parcels shown along the waterfront are private, with the exception of Douglas Beach on Lake Michigan and Wade's Bayou Park, Veterans Park and Shultz Park on Kalamazoo Lake (shown as pink dots).

It is most likely that public property can be acquired and eventually developed for commercial waterfront used in the area marked in pink along Kalamazoo Lake, while more passive recreation uses are desired in the areas marked by green, along Douglas Harbor.

- Parcel Location
- Wade's Bayou Park / Shultz Park
 - Kalamazoo Lake / Veteran's Park
 - Lake Michigan / Douglas Beach

Douglas thrives as a Lake Michigan coastal community, and also has ample shoreline along Kalamazoo Lake; however, both water bodies are heavily privatized. There is a strong desire for more opportunities to connect Douglas residents and visitors with new waterfront public spaces to relax, recreate and enjoy.

Strategic Direction

THE WATERFRONT

Incorporate mixed-use development with public and private spaces to create a dynamic, user-friendly waterfront.

Community Values

- We value our waterfront resources and seek to preserve their natural beauty while fully utilizing their presence for transportation, recreation, economic sustainability and tourism.
- We value public spaces where people can enjoy the natural surroundings that Douglas has to offer.
- We value the consideration and thought that goes into our land use and water resource decisions, and encourage transparent dialogue to occur around our community's decisions impacting the waterfront.

Goal 1

Douglas will enable balanced preservation, enhancement and redevelopment of the waterfront for business, housing and recreational uses.

Objectives

1. Preserve views and access to the waterfront.
2. Allow a mix of medium density commercial and residential development on North Kalamazoo Harbor integrated with public space and access to the waterfront.
3. Re-envision Douglas Harbor by improving the entry through signage and landscaping, enhance parking by designating spaces and using pervious paving materials, build a focal point at the terminus of Center Street and connect the Bayou other community parks and public spaces through a waterfront perimeter trail.
4. Maintain the quiet, non-motorized recreation use of South Kalamazoo Harbor and Veteran's Park by encouraging passive recreation such as fishing docks, picnicking, public boat docks and kayak/canoe boat launches.

Goal 2

Douglas will require the provision of public spaces and public access to the North Kalamazoo Harbor and along Douglas Harbor as conditions of potential future redevelopment.

Objectives

1. Treat the waterfront as a public frontage, requiring public access easements and trail (or boardwalk) with any new development or redevelopment project.
2. Enhance the public parking area adjacent to the Blue Star Highway underpass at Washington as a community gathering space for access to the water through underpass lighting, seating, landscaping and pervious paving.

Goal 3

Douglas will focus on the environmental remediation of the waterfront and protect the shore for passive recreation uses.

Objectives

1. Douglas will utilize a thoughtful mix of public and private investment to generate long term sustainable revenues and funding sources to address environmental remediation, dredging and expansion of public access to the waterfront.

Waterfront Plan

In 2008 the Kalamazoo Lake Harbor Authority Harbor Committee was formed, consisting of local leaders in Douglas and Saugatuck, and charged with the task of reviewing, evaluating and making recommendations regarding possible harbor dredging and maintenance issues, as well as what actions could be taken to fund these activities.

Edgewater Resources has been working with the Harbor Committee since 2011 on identifying cost effective strategies for long term harbor maintenance, and was asked to work with Douglas to prepare a Waterfront Master Plan for all waterfront properties and key adjacent parcels within the City limits.

The primary purpose of the effort was to work with the community, through a series of stakeholder workshops to identify a financially viable strategy to achieve the community's goals of expanded public waterfront, economic development and a viable long-term funding source for harbor maintenance.

The goal of the Master Plan is to create a waterfront environment that is authentic to the history and character of the Douglas community and attracts locals and tourists alike through its beauty and unique amenities.

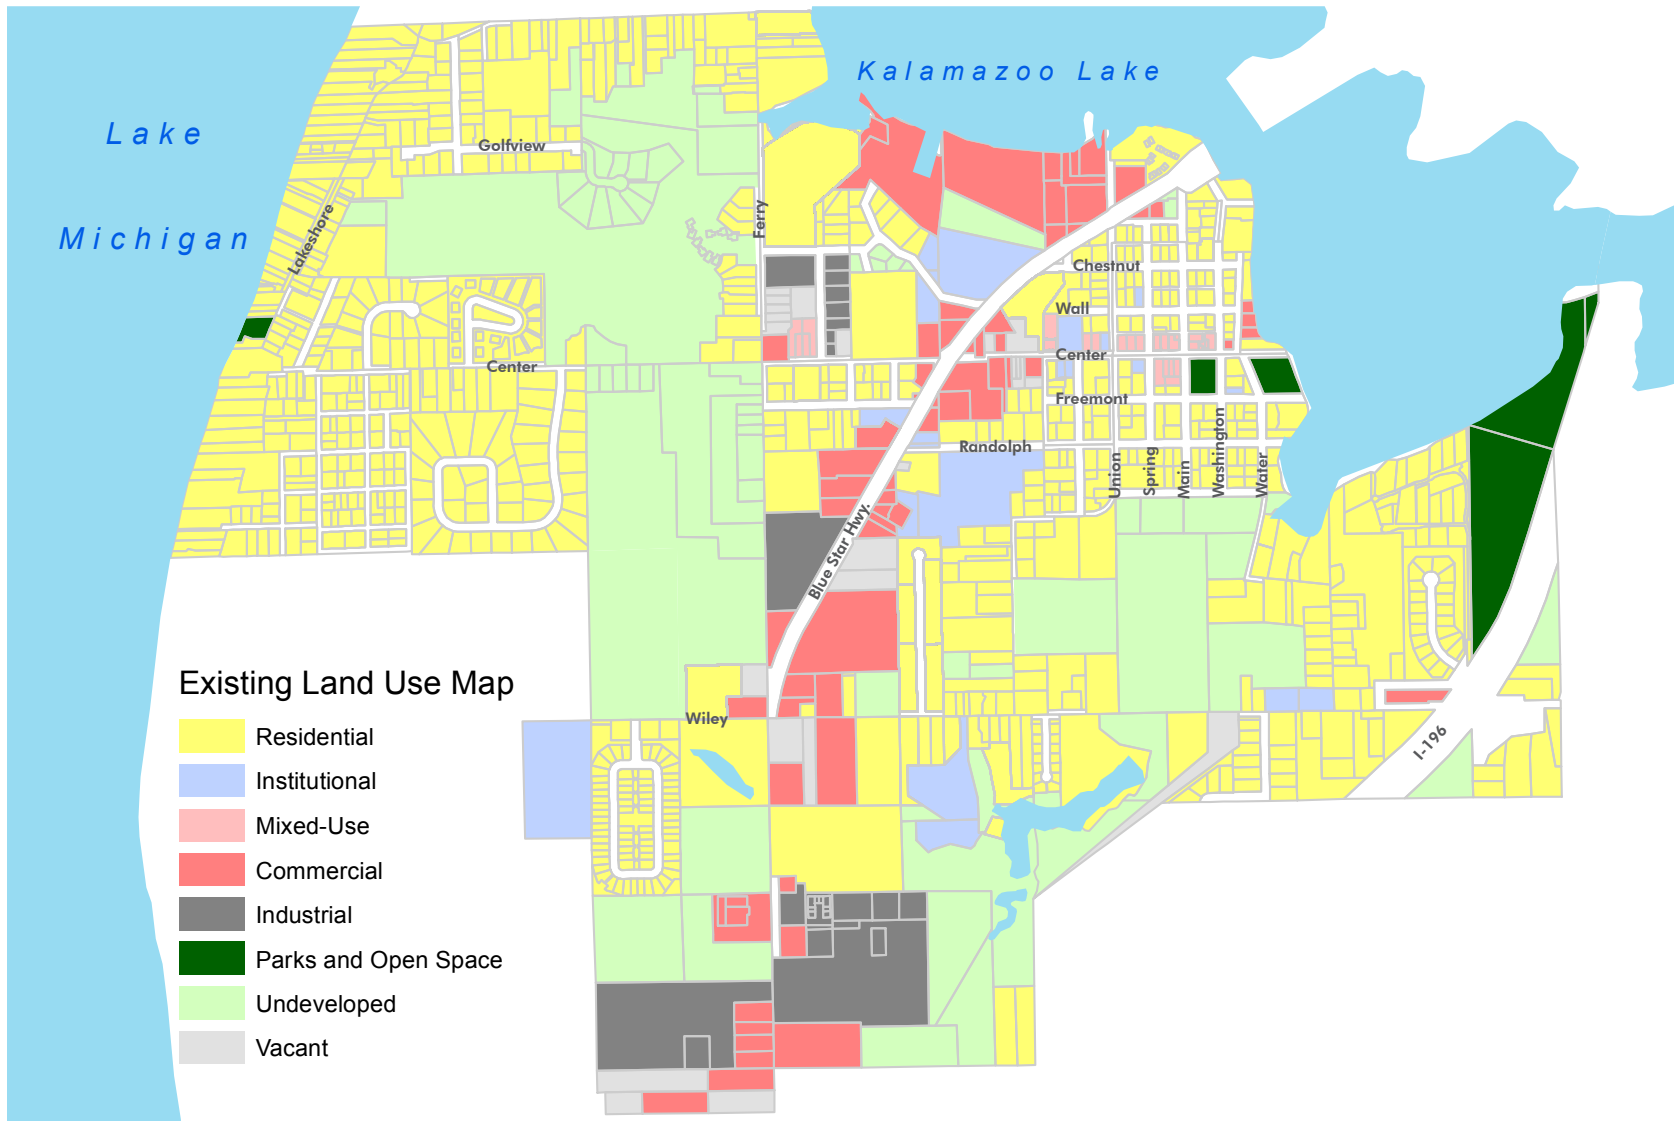

The following objectives were identified:

- Establish a community-supported vision for the future of the harbor.
- Ensure consensus with permitting agencies.
- Outline the most cost effective strategy for achieving that vision.
- Review funding alternatives for making it happen.

Tasks to Help Achieve Objectives

- Prepare an existing conditions analysis of the waterfront.
- Assess existing properties to identify the condition and likely lifespan of site features.
- Develop a land use plan, with written descriptions of uses and building types that will correlate to a future form based code.
- Establish a framework plan outlining alternative potential partnership scenarios.
- Outline a range of potential acquisition scenarios, including high level assessment of value, assessment of economic feasibility and potential funding and/or grant strategies.
- Develop an illustrative plan of the waterfront on which the future form based code will be based.

Existing Land Use Map

FUTURE LAND USE

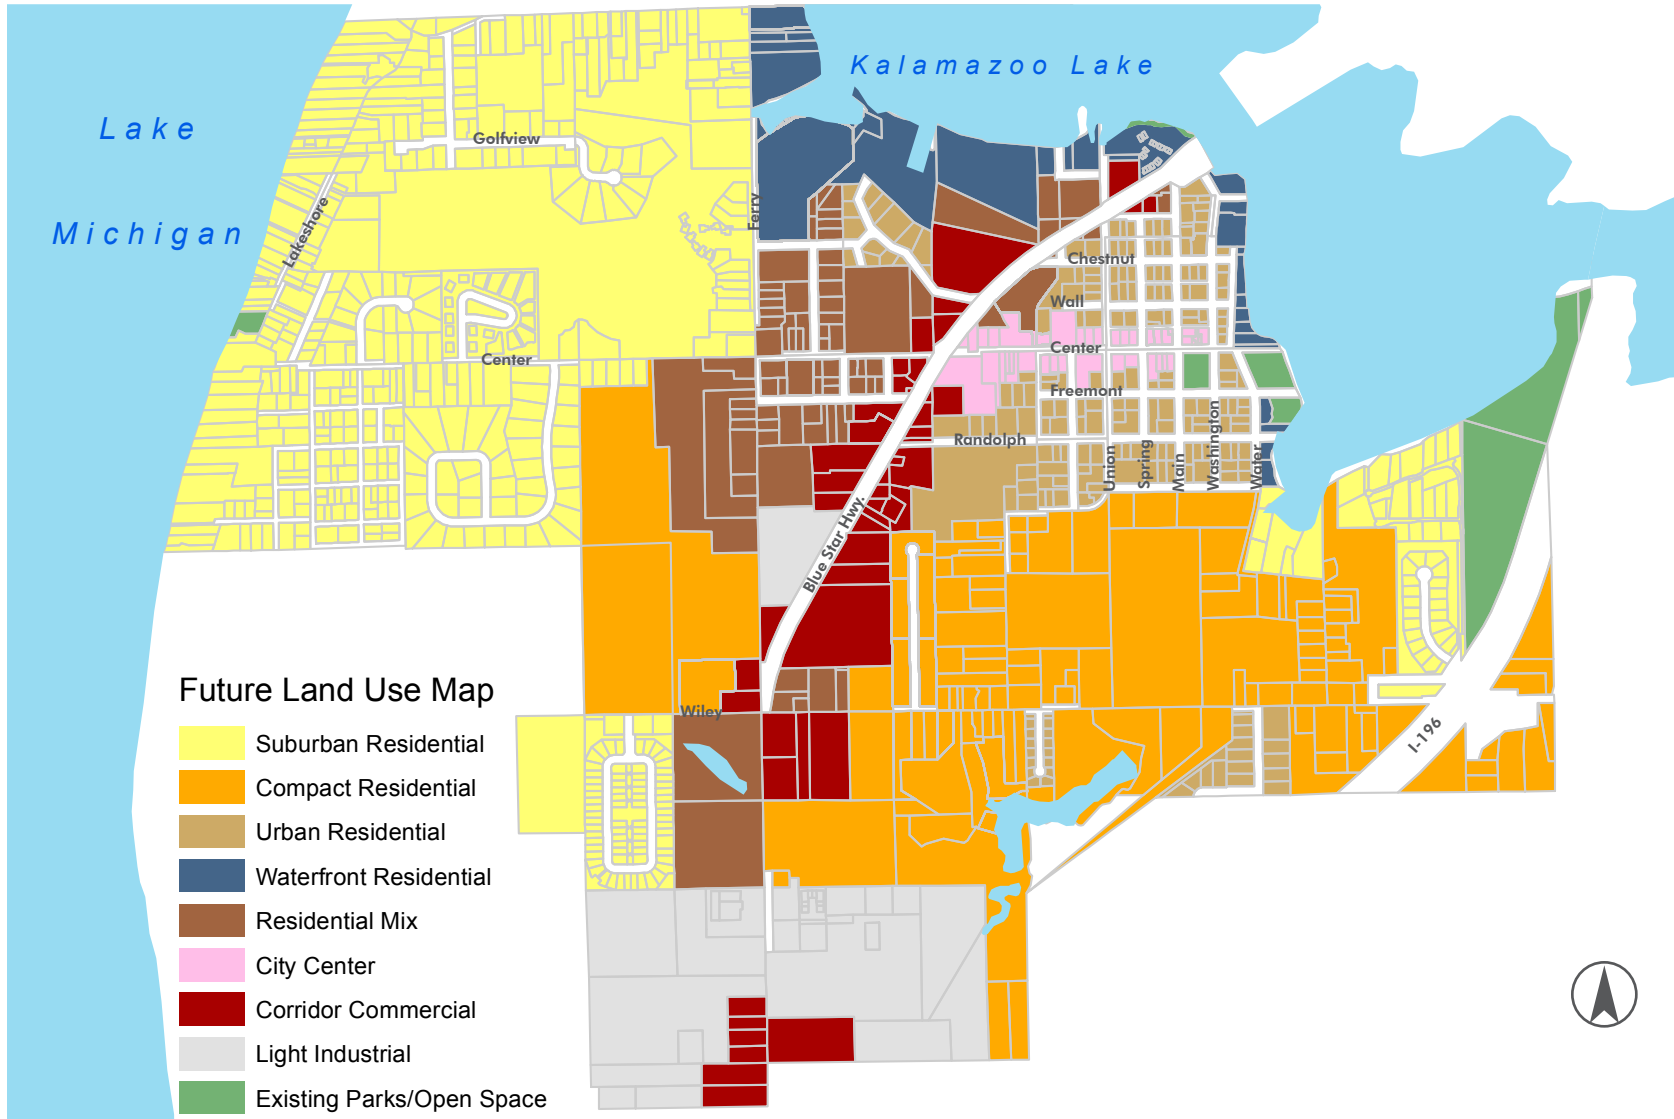

Our Douglas Vision establishes desirable land use patterns to guide growth in the City for the next decade. The future land use plan is a compilation of descriptions and recommendations for future development and green space preservation. It serves as an overall framework for the management and regulation of future development and also serves as the basis for evaluating rezoning requests.

Nine future land use designations have been created and represent the future vision of land use in the City. Each of the designations are described in detail and are organized into one of three land use contexts: RESIDENTIAL, COMMERCIAL and INDUSTRIAL.

The most recent aerial photography of the City was used in combination with site visits and tours of the community to determine the most suitable future land use development pattern. Additionally, the locations of natural features were considered, along with the location of publicly owned lands, parks and nature preserves. The Douglas community values is green space and parks, and it is anticipated that as the community grows, new public parks and open space will be provided.

Finally, the land use vision implements the goals and objectives of the five master plan themes of Economic Development, Housing and Neighborhoods, People, Arts and Culture, Waterfront and Transportation and Mobility.

Future Land Use Map

Residential

Suburban Residential (up to 4 du/ac)

Intent: To address the need and desire for single-family development in a low density suburban pattern. Lakeshore properties should maintain views by having generous setbacks and low building heights.

Desired Building Type:

- Single-family detached house
- Civic buildings (schools, churches, etc.)

Compact Residential (up to 8 du/ac)

Intent: To address the need for walkable, mixed-density and mixed-income neighborhoods in close proximity existing commercial corridors.

Desired Building Types:

- Single-family detached house
- Two-unit
- Courtyard house
- Townhouse
- Apartment house

Residential

Urban Residential (up to 6 du/ac)

Intent: To address the need for denser housing options that help to protect open space by utilizing higher densities while providing a mix of housing for families of varying income levels. These uses are typically located just outside of the city center.

Desired Building Types:

- Single-family detached house
- Accessory dwelling units

City Center (up to 15 du/ac)

Intent: To address the desire for an identifiable focal point of the City, and provide a walkable mixed-use development pattern where residents from adjacent neighborhoods can obtain goods and services as well as provide for a place to attract those from outside the City. Upper floor residential is encouraged.

Desired Building Types:

- Mixed-use buildings
- Flex buildings
- Retail buildings
- Note that active ground floor uses are required for buildings and lots with frontage on Center Street

Residential

Residential Mix (up to 10 du/ac)

Intent: To provide goods and services for adjacent neighborhoods and industrial areas as well as provide for additional housing opportunities via live-work buildings. Residential Mix uses may include small-scale retail, small contractor's offices, eating and drinking establishments, personal service establishments, professional and support offices and medical facilities.

Desired Building Types:

- Single-family detached house
 - Courtyard house
 - Two-unit
 - Live-work
 - Townhouse
 - Apartment house
- Flex
Retail building

Waterfront Residential (Density Varies)

Intent: To address single-family and multi-family residential uses which abut Kalamazoo Lake and Wade's Bayou. These uses may also be adjacent to or in close proximity to the marina, accommodating single-family residences and resort or tourist lodging consistent with the natural, waterfront setting of the area. Marina and other waterfront uses may be considered as special land uses. Development in these areas will be encouraged to preserve views of the water bodies and restricted from disturbing any environmentally-sensitive areas.

Desired Building Types:

- Frontage south of Wade's Bayou, single-family detached
- Frontage along Kalamazoo Lake, single-family, large and small multi-plexes

Commercial

Corridor Commercial

Intent: To provide goods and services to meet the needs of the larger Tri-Community Area, typically located along Blue Star Highway. Parking areas should be placed behind new development when possible and buildings shall be built out to the street with limited setbacks to encourage the calming of traffic and pedestrian safety. Uses may include large-scale retail, eating and drinking establishments, personal service establishments, professional and support offices, and medical facilities.

Light Industrial

Light Industrial

Intent: To provide employment opportunities for area residents as well as manufactured goods for the Greater Tri-Community Area. The designation is also intended to provide for small-scale industrial activities, research and development operations, shipping establishments, offices, business incubators, educational institutions, or other similar light industrial uses. Light Industrial areas may include retail, eating and drinking establishments, office condominiums, and other such uses that may support employment and workers. These uses would best be suited for areas along Blue Star Highway in the south portion of the city.

ZONING PLAN

Section 33, (2), (d), of the Michigan Planning Enabling Act (Act 33 of 2008) requires that Master Plans adopted after September 1, 2008 include a Zoning Plan that explains how future land use categories in a Plan relate to the zoning districts incorporated in a community's Zoning Ordinance. The following table relates to the Our Douglas Vision future land use categories with the City's zoning districts.

Zoning Plan

In considering a request to rezone property in Douglas, the Planning Commission shall consider the future land use map and the future land use descriptions provided in this plan. The Zoning Plan table shall be used to evaluate the degree to which the proposed rezoning is consistent with this plan, together with an evaluation of the specific request. The Planning Commission will also consider whether the proposed site may be reasonably used as it is currently zoned, whether the proposed site is an appropriate location for any and all of the land uses that may be permitted within the requested zoning district, and any potential detrimental impacts on the surrounding properties that could result from the proposed rezoning.

Future Land Use Designation	Primary Compatible Zoning District(s)	Potentially Compatible Zoning District
Suburban Residential	R1	R1, R2
Compact Residential	R3	R1, R2
Urban Residential	R2	C1
City Center	C1	None*
Residential Mix	R5	C1
Waterfront Residential	R4	R5
Corridor Commercial	C2	C1
Light Industrial	L1	C2
Existing Parks and Open Space	Any	Any

* A zoning district which completely supports the vision of these land use categories does not currently exist; and should be included in a future form based code.

Due to the structure of the Zoning Ordinance, the Planning Commission and City Council should pay particular attention to any and all uses permitted in a zoning district as well as any uses that may be permitted in a less restricted or intense zone. In all cases, the Zoning Plan shall be applied as a guideline for the Planning Commission subject to the appropriate application of the discretionary authority permitted to the Planning Commission and the City Council by statutory authority, case law, and good planning practice. Nothing in the Zoning Plan will preclude the Planning Commission and the City Council from considering amendments to this Master Plan to better serve the public interests of the community.

RE: Water Street – Rezone Application
Allegan County, Michigan

Dear Ms. Anderson:

Per your conversation with Max Nykerk at Lakewood construction, the application for Re-Zoning at 57 Chestnut Street, 69 Washington Street, and 67 Water Street has been revised to a proposed zoning district of R-4. Attached you will find the following documents:

- Application
- Proof of Ownership
- Survey & Legal Description
- Rezone Plan

If you have any questions or require additional information, please feel free to call me at (616) 575-5190 or via email at choyt@nederveld.com.

Sincerely,

A handwritten signature in blue ink that reads "Charles Hoyt".

Charles Hoyt
Project Manager

Application to Rezone Parcels

The Village of Friendliness - Since 1870

PART 1

Property Information:

Address(es) of Parcel(s) to be rezoned: 57 Chestnut Street, 69 Washington Street, 67 Washington Street

Parcel Number(s): 59-100-003-00, 59-100-004-00, 59-100-005-00 Property Size (in acres): 0.15 Ac, 0.22 Ac, 0.25 Ac

Current Zoning of Parcel(s): R-3 Proposed Zoning District(s): R-4

Existing Use of Property: Residential & Vacant Proposed Use of Property: Multi-family Residential Building

Property Owner Information:

Name: AMK Holdings LLC

Phone Number: _____ Email Address: _____

Address / PO Box 6971 N Maple Road City: Saline State: MI Zip: 48176

Applicant Information (if different than owner):

Name: Max Nykerk Company: Lakewood Construction Inc.

Phone Number: 616-392-6923 Email Address: mnykerk@lakewoodinc.com

Address / PO Box 11253 James Street City: Holland State: MI Zip: 49424

Rezone Application Requirements (Section 28.05):

- Certified boundary survey with dimensions, boundaries, rights-of-way, and easements and general location.
- Legal description of the subject parcel(s)
- Applicant's interest in the property:
 - Purchase Agreement or Deed
 - Proof of Ownership
- Detailed Response to Rezoning Criteria (Part 2 of this Application)
- PDF of application and supplemental documentation
- Escrow Policy Acknowledgement
- Yes, I have read the City of the Village of Douglas Zoning Ordinance Article 28, Amendments
- Fees paid (\$300 non-refundable fee + \$2,000 refundable escrow deposit)
- Complete Rezoning application (incomplete applications will not be processed)

PART 2

Please provide responses to the following rezoning criteria outlined in Section 28.06:

- a) What, if any, identifiable conditions related to the application have changed since the existing zoning district was established which justifies the proposed amendment? The existing zone district (R-3) was established, as shown on the Zoning Map, on July 16, 2014. The Future Land Use Map, which identifies this site as "Urban Residential", was created by the City of the Village of Douglas Master Plan dated Fall 2016.
- b) What are the precedents and the possible effects of such precedent which might result from the approval or denial of the petition? The precedent set by the approval of this application would be that the City of the Village of Douglas is committed to following the recommendations outlined within the Master Plan. A denial would set the precedent that the Master Plan and its proposed Future Land Use is not the guide for growth that it is described to be.
- c) What is the impact of the amendment on the ability of the City and other governmental agencies to provide adequate public services and facilities, and/or programs that might reasonably be required in the future if the proposed amendment is adopted? Approval of this rezone request will have little to no impact on the City or any other governmental body's ability to provide public services. Public utilities service the site currently and the properties are located within a well populated area.
- d) Does the petitioned district change adversely affect environmental conditions, or the rights of a neighboring property owner? The rezone request will not adversely affect any environmental conditions within the immediate area. The requested rezone to R-4 allows for permitted uses which are low-impact to the surrounding environment. The rights of the neighboring properties are currently similar to those of the R-4 zone district as there are several multi-tenant buildings.
- e) Is the class of uses permitted in the district appropriate for the location proposed to be rezoned?
 Yes No
- f) Does the petitioned district change generally comply with the Tri-Community Comprehensive Plan, or a subsequent document that guides land use and development decisions in the City of the Village of Douglas?
 Yes No If , no, explain: _____
- g) What is the ability of the property in question to be put to a reasonable economic use in the zoning district in which it is presently located? The current zoning only allows for single family or two family homes on the site. This limits the economic viability of the site significantly as the number of units allowed would not support the costs of development.

PROJECT NARRATIVE

AMK Properties has a mission to create a positive impact in the communities where it develops real estate by having a 'people-first' mentality to transform properties.

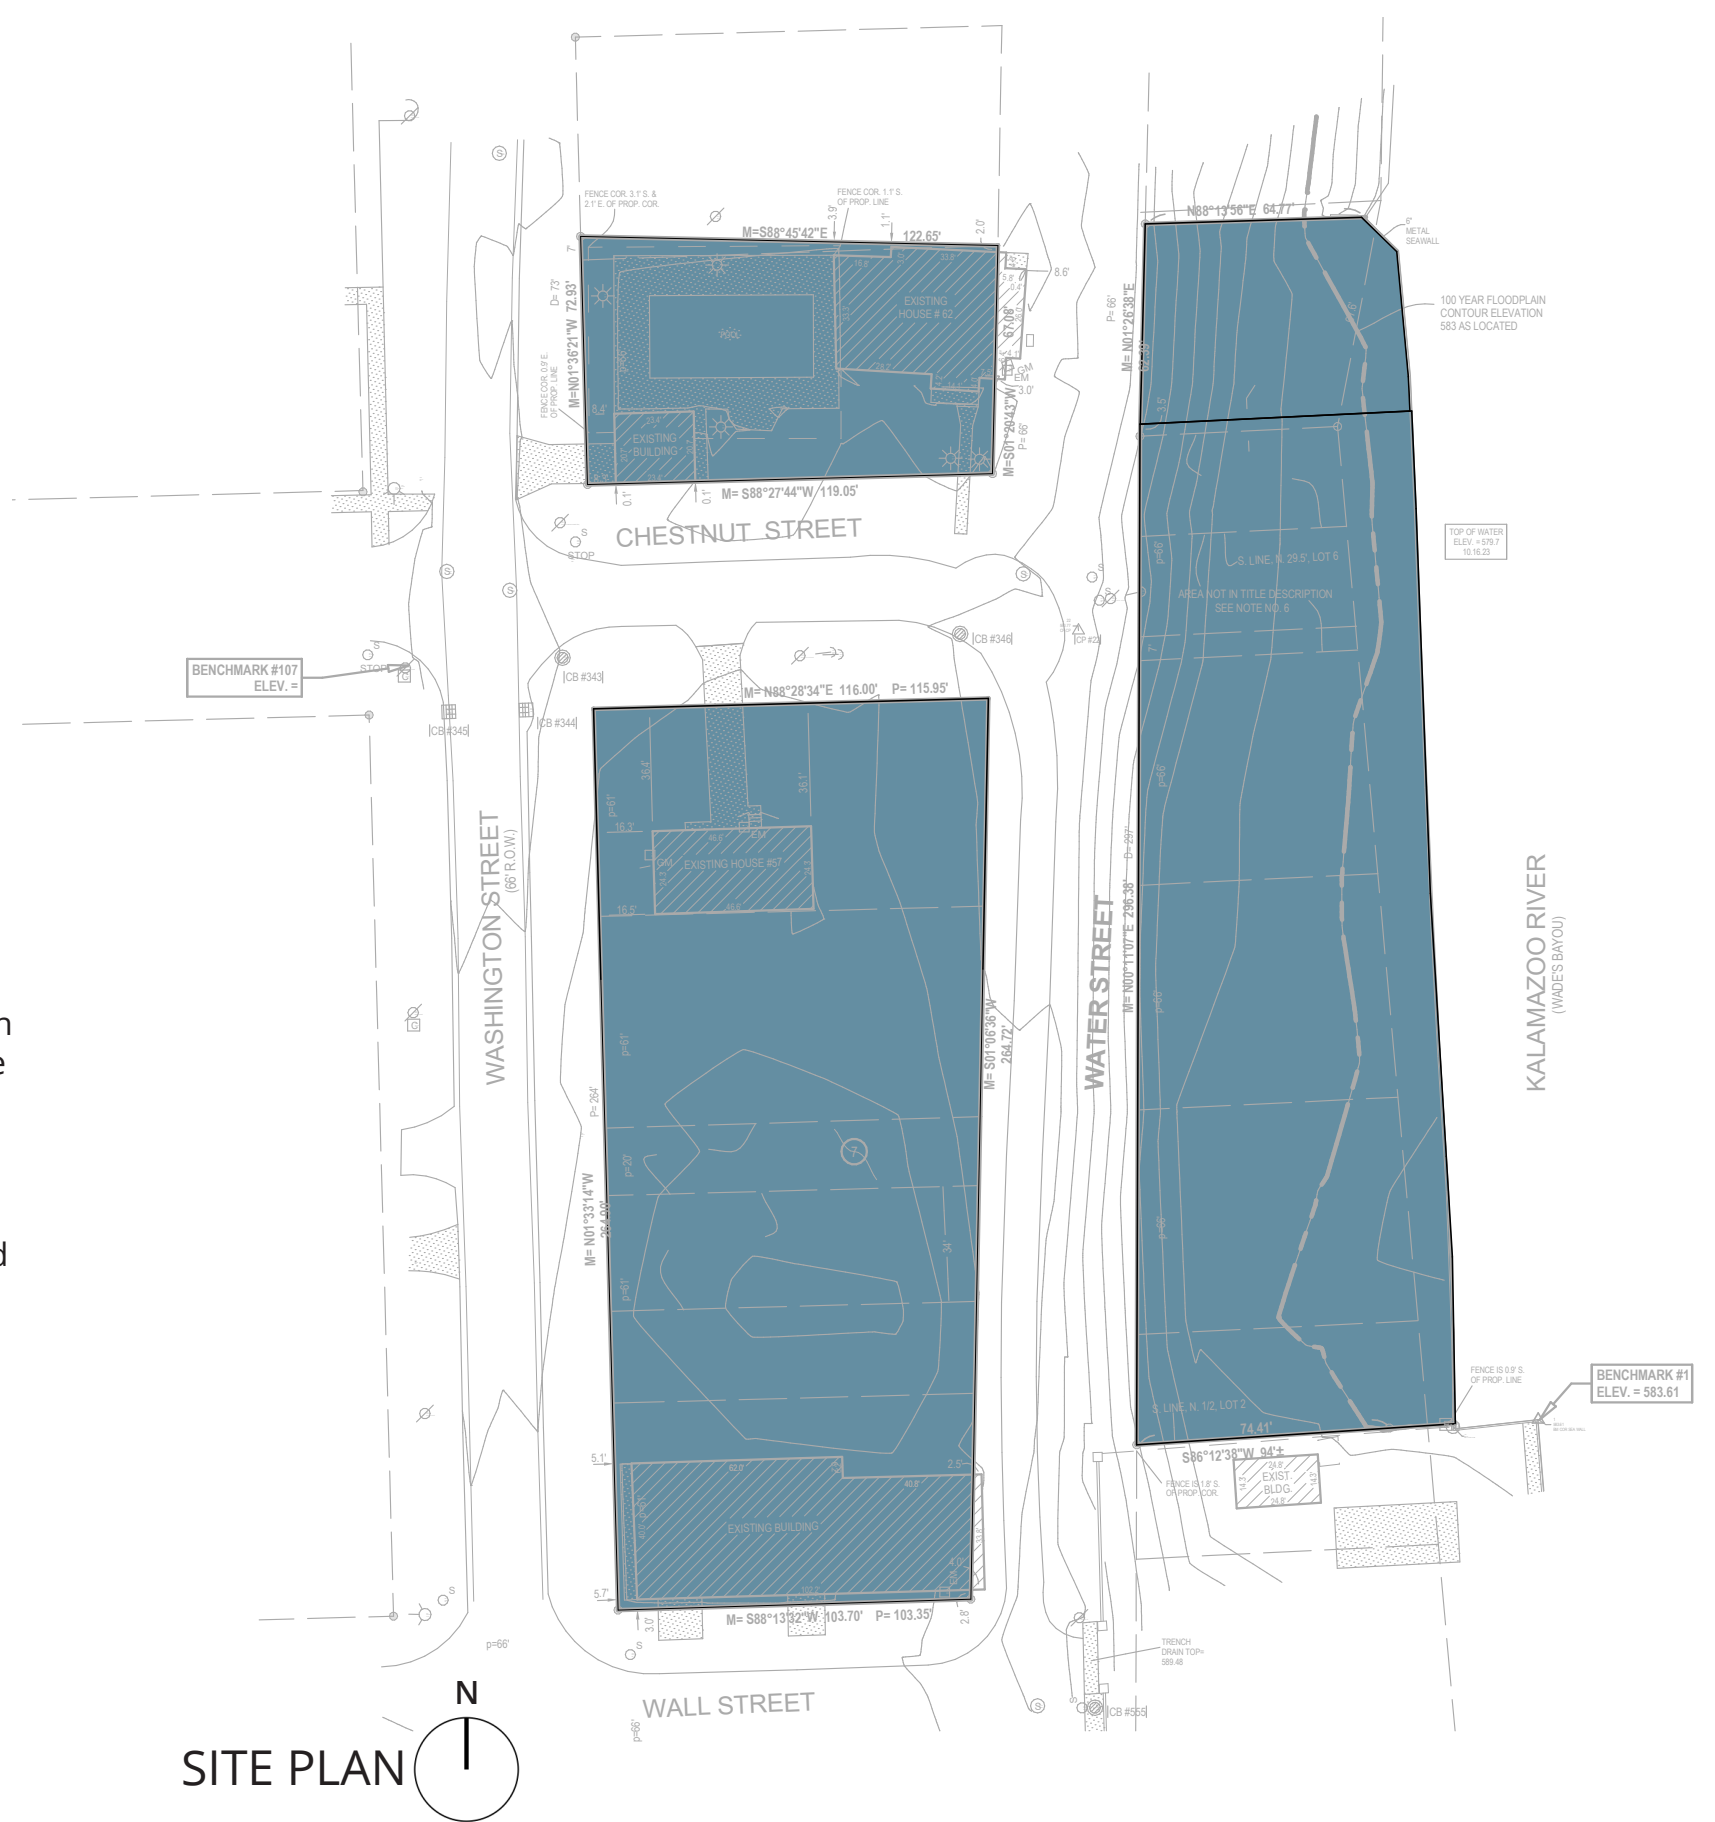

They currently own multiple parcels near the Kalamazoo River and have a vision to propose an innovative and forward-thinking project.

AMK Properties is requesting to rezone the parcels at 57 Chestnut Street, 69 Washington Street, and 67 Water Street. The (3) parcels all share common lot lines and are proposed to be combined.

The current zoning in this area is predominantly R-3, Neighborhood Conservation Residential with future land use as urban residential and waterfront residential. They are proposing to rezone the (3) subject parcels to R-4, Harbor Front Residential. This will, by way of special land use, permit the construction of a multi-family residential project.

The uniqueness about this area is that Water Street currently separates small, non-conforming lots along the Kalamazoo River with the parcels proposed to be rezoned. Due to the limited size of those parcels, the rezone request was only on the parcels nestled between Water Street and Washington. This was a strategic approach to not rezone the non-conforming waterfront parcels as the intent is to preserve the openness, respect the waterfront and create recreation and green spaces. Any potential work on these non-conforming lots most likely requires Zoning Board of Appeals approval for a reduction in setbacks. The decision to not rezone these parcels was due to the fact that R-4 increases the setbacks from the current R-3, and therefore could be looked at as a self-created hardship.

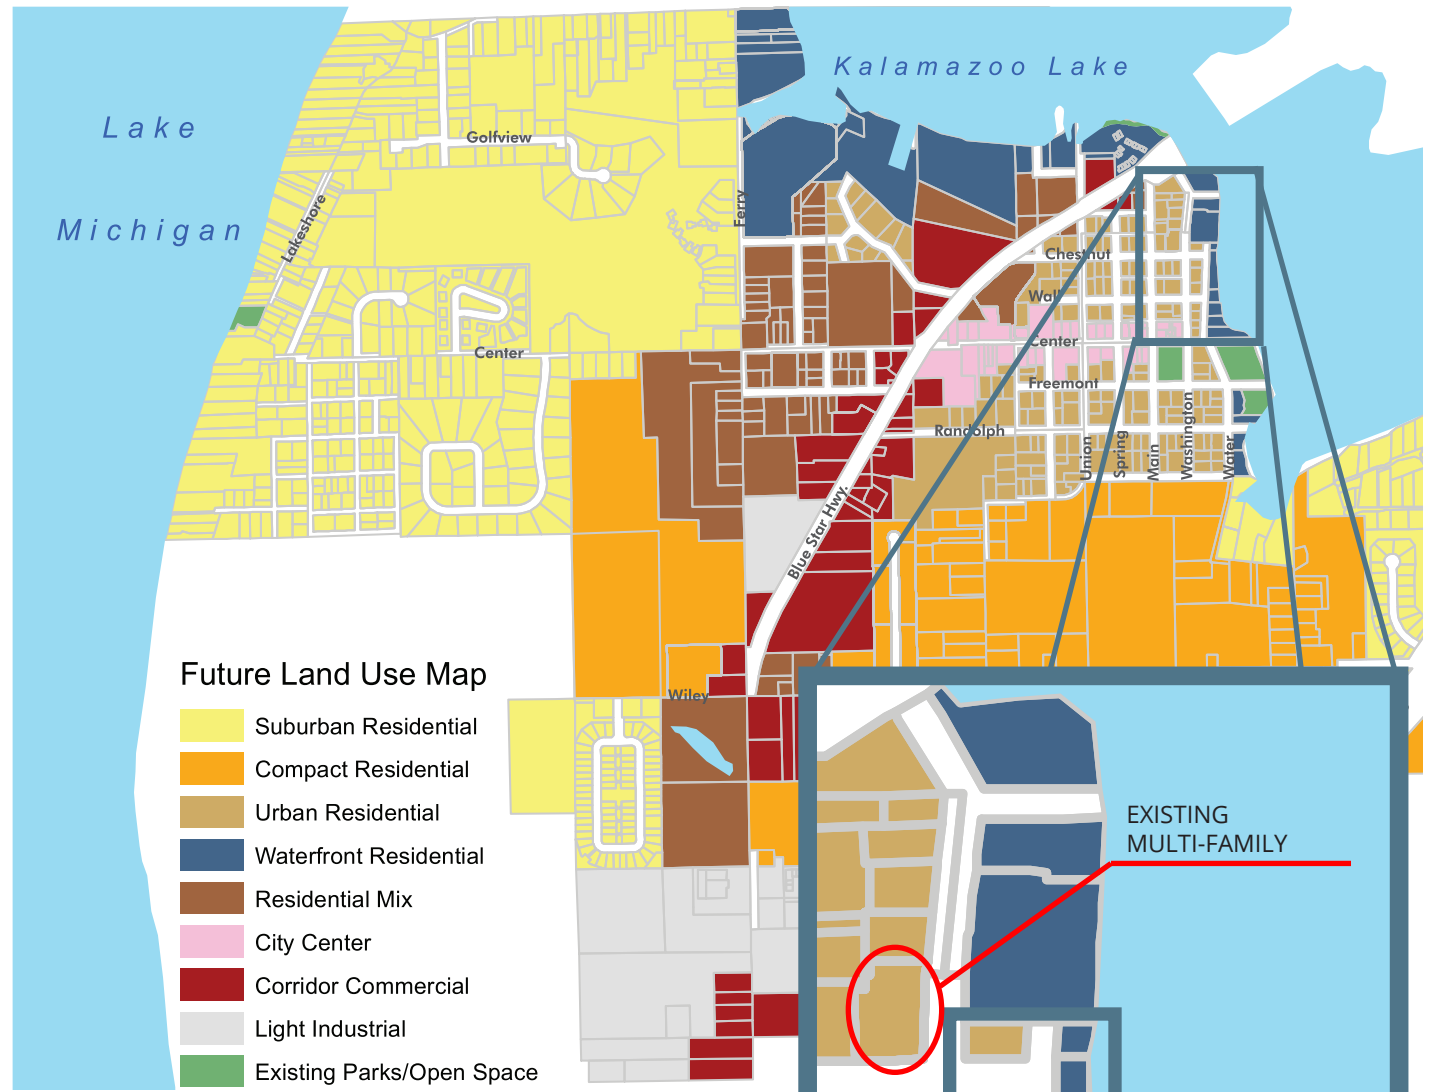

In closing, AMK is committed to creating a project that ignites positive change through creative problem-solving and an unwavering vision. We look forward to working with The City of The Village of Douglas to create a project that positively impact the neighborhood and community.

SURVEYOR'S NOTES

- Flood Zone Classification: An examination of the National Flood Insurance Program's Flood Insurance Rate Map for Community Number 26005C, Panel Number 0164G, with an Effective Date of 06/21/2023, shows this parcel to be located in Zone "X" (area of minimal flood hazard) and Zone "AE" (100 year floodplain).
- Source information from plans and markings has been combined with observed evidence of utilities to develop a view of the underground utilities. However, lacking excavation, the exact location of underground features cannot be accurately, completely, and reliably depicted. In addition, in some jurisdictions, 811 or other similar utility locate requests from surveyors may be ignored or result in an incomplete response. Where additional or more detailed information is required, the client is advised that excavation may be necessary.
- Waters edge as plotted and shown hereon was field located on October 16, 2023. The boundary along the waters edge is subject to change due to natural causes and it may or may not represent the actual location of the limit of title.
- NOTE TO CONTRACTORS: 3 (THREE) WORKING DAYS BEFORE YOU DIG, CALL MISS DIG AT TOLL FREE 1-800-482-7171 FOR UTILITY LOCATIONS ON THE GROUND.
- RIPARIAN DISCLAIMER: The boundary lines shown hereon do not represent the ownership of any riparian rights, littoral rights, bottom lands or submerged land on, beneath or appertaining to the subject property.
- Apparent gaps exists in the provided legal descriptions. Further deed research is recommended.
- Gross land area combined = 1.56 Acres.

SCHEDULE B - SECTION II NOTES

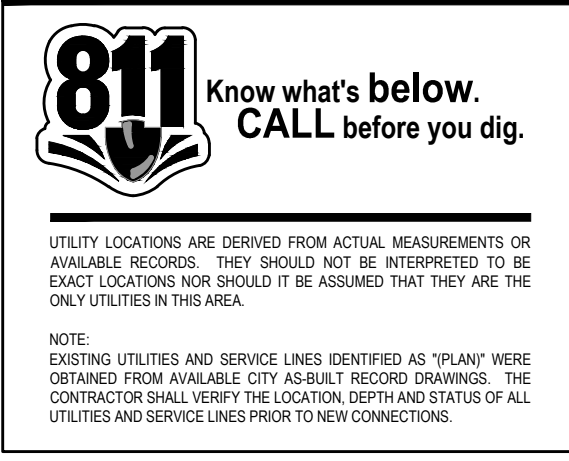

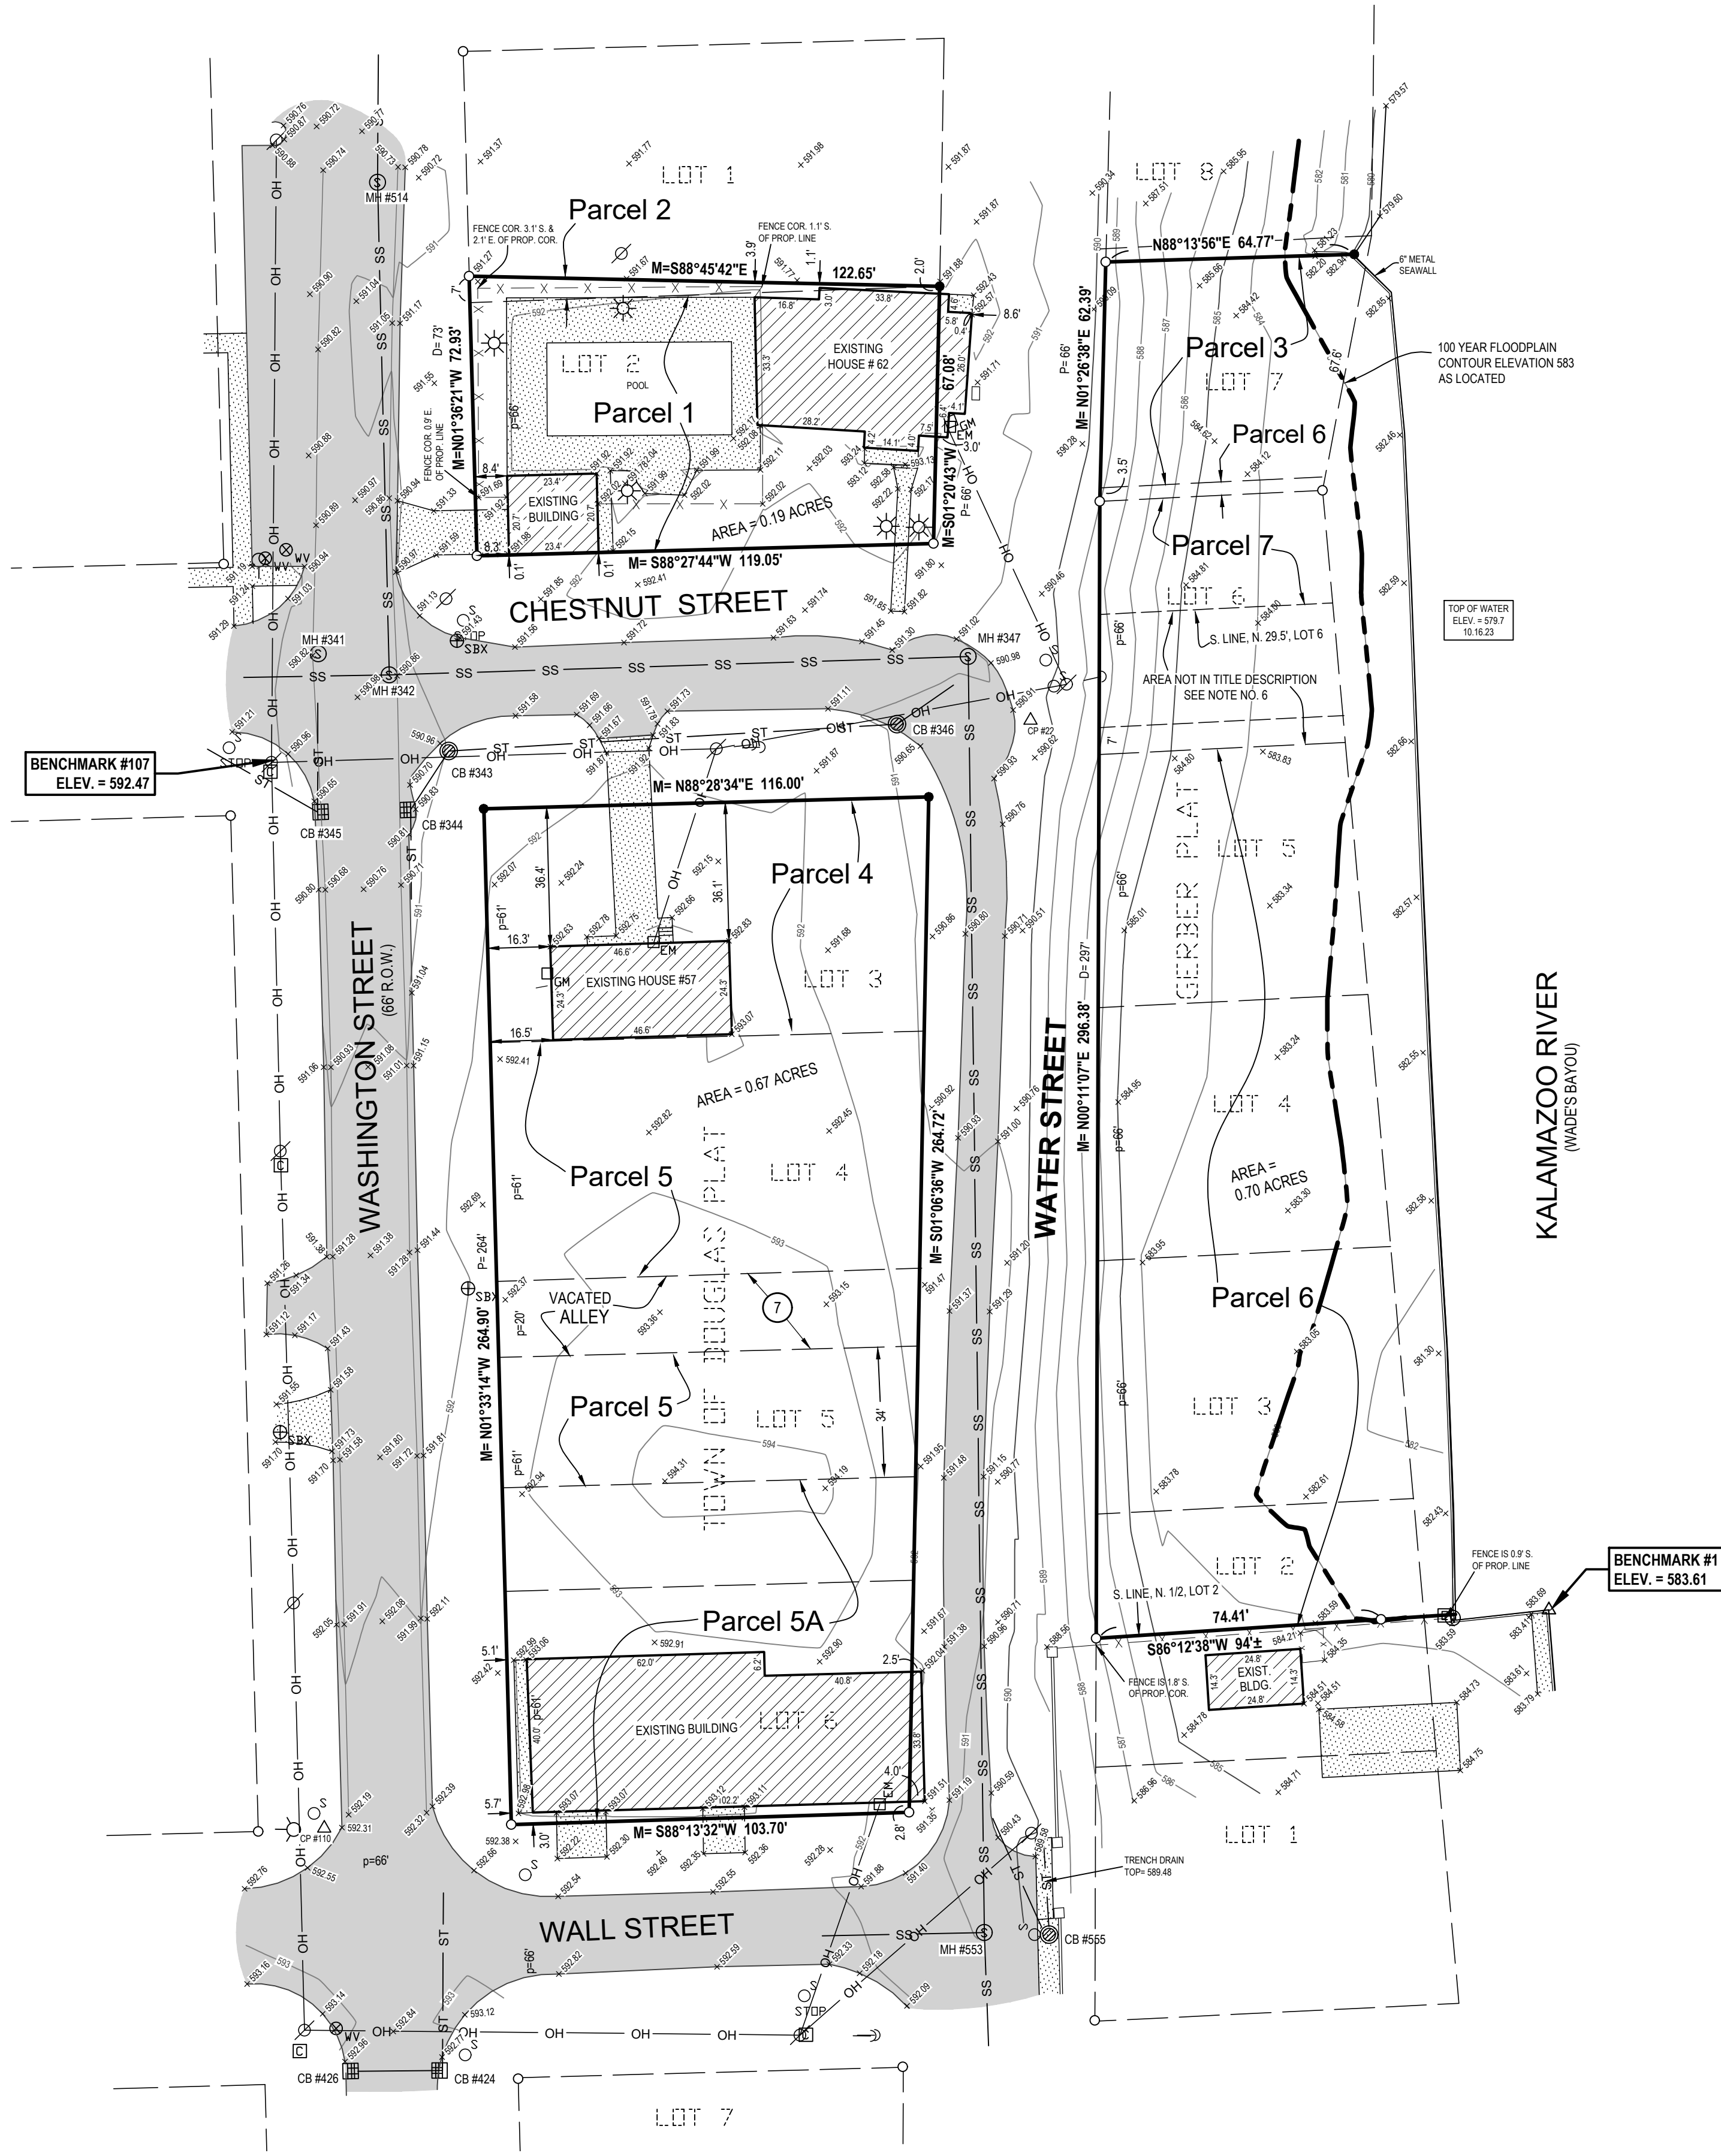

- Terms, Covenants, and Conditions of Resolution to Vacate Public Alleys as set forth in Liber 2303 on page 903. The resolution described in this document is shown on this survey.
