

Proposed Annual Budget

Fiscal Year 2024-2025

MISSION

THE MISSION OF THE
SAUGATUCK TOWNSHIP FIRE DISTRICT
IS TO MINIMIZE COMMUNITY RISKS AND
IMPROVE THE QUALITY OF LIFE
FOR ALL PERSONS WITHIN
SAUGATUCK TOWNSHIP FIRE DISTRICT.

From the Board...

The Saugatuck Township Fire District (Fire District) Board proposes the following budget for the Fiscal Year 2024/2025 to the City of Saugatuck, Saugatuck Township, and the City of the Village of Douglas. The budget, consisting of a millage of 2.50 mills, is levied against the real property taxable value within the Fire District. The millage of 2.50 mills will remain the same and shall not be increased.

The Fire District endeavors to forge relationships with our ever-changing communities and remain strong with community involvement. This strong connection does not form in a vacuum, it requires embracing diversity, collaboration, anticipating change, and preparing ourselves to meet the ever-evolving needs of our communities by providing exceptional fire and life safety services. The Fire District continues to focus on one of its essential core values - Community Risk Reduction. This process identifies and prioritizes our community risks, which is followed by an integrated and strategic investment of resources (emergency response & prevention) to reduce their occurrence and impact .

Included in the packet is a copy of the Fiscal Year 2024/2025 budget adopted unanimously by the Fire Board.

The Fire Board will hold a public presentation and briefing on the budget at Saugatuck Township Fire District, 3342 Blue Star Highway, Saugatuck, MI 49453 on June 17, 2024, at 5:00 PM. The Council members of Saugatuck and Douglas as well as the Township trustees are strongly encouraged to attend. The joint meeting is designed for the local units of government as well as the public to become familiar with the hard work of the Fire District to continually improve efficiency and services. The Fire Board and Fire District personnel will be available to answer questions. We look forward to seeing you on June 17th, at 5:00 PM. The Fire District Board is requesting the City of Saugatuck, Saugatuck Township, and the City of the Village of Douglas to review and adopt this proposed budget *during their next scheduled board meeting or before.*

Saugatuck Township Fire District Board:

- Jane Verplank - Chairperson, City of Saugatuck Representative
- Eric Beckman - Vice Chair, Saugatuck Township Representative
- Dan Fox - Secretary, City of Saugatuck Representative
- Scott Phelps - Vice Secretary, At Large Member
- Tarue Pullen - City of the Village of Douglas Representative
- Cathy North - City of the Village of Douglas Representative
- Stacey Aldrich - Saugatuck Township Representative

From the Chief...

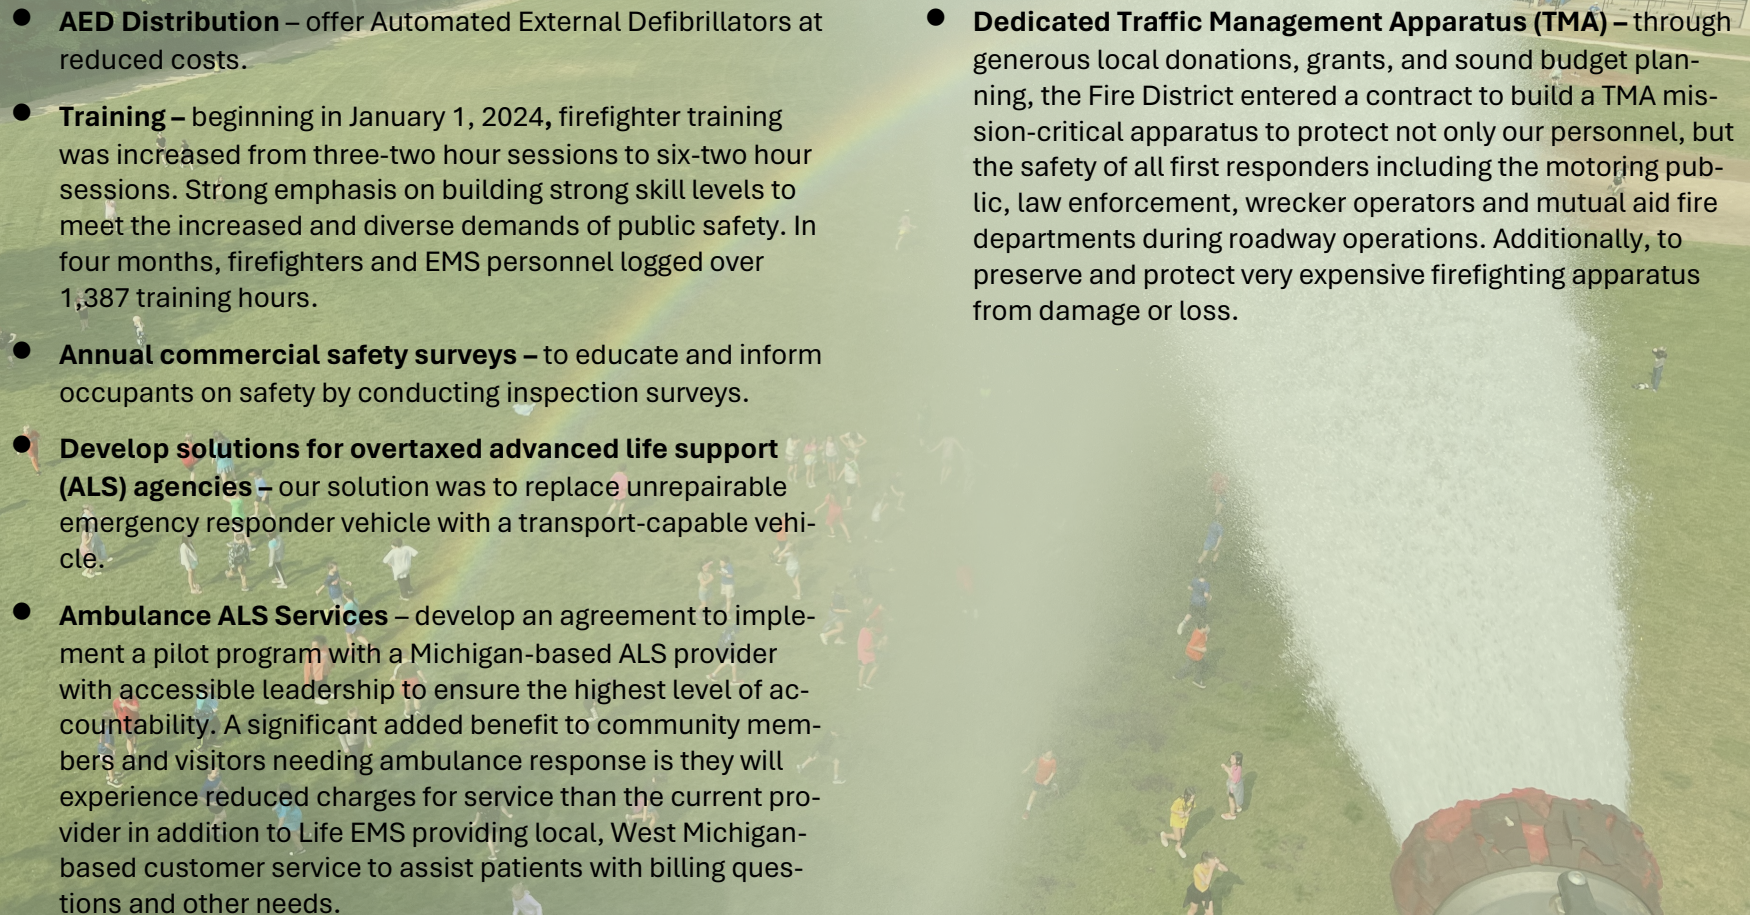

Prioritized Strategic Planning

The Fire Board and the Chief would like to share the following projects as part of our Community Risk Reduction Programs.

School Safety – the focus of the Fire District involves four areas of school safety.

1. Designated School Resources Officers for our students at Douglas Elementary & the Saugatuck High/Middle Schools.
2. Support the BeSMART campaign – to promote responsible gun ownership and reduce child gun deaths.
3. Fire Prevention & Life Safety Education – bi-monthly lessons taught by STFD instructors at Douglas Elementary School.
4. Public Safety Radio Communications *inside* our schools – ensuring effective radio communications and interoperability not only in SPS schools, but every Michigan school.

From the Chief continued

- 
- An aerial photograph of a baseball field with a fire hydrant in the foreground spraying water. The hydrant is labeled 'COMATIC 2' and '500-200'. The field is green with a dirt infield, and there are people scattered across it. In the background, there are trees and a blue building.
- **AED Distribution** – offer Automated External Defibrillators at reduced costs.
 - **Training** – beginning in January 1, 2024, firefighter training was increased from three-two hour sessions to six-two hour sessions. Strong emphasis on building strong skill levels to meet the increased and diverse demands of public safety. In four months, firefighters and EMS personnel logged over 1,387 training hours.
 - **Annual commercial safety surveys** – to educate and inform occupants on safety by conducting inspection surveys.
 - **Develop solutions for overtaxed advanced life support (ALS) agencies** – our solution was to replace unrepairable emergency responder vehicle with a transport-capable vehicle.
 - **Ambulance ALS Services** – develop an agreement to implement a pilot program with a Michigan-based ALS provider with accessible leadership to ensure the highest level of accountability. A significant added benefit to community members and visitors needing ambulance response is they will experience reduced charges for service than the current provider in addition to Life EMS providing local, West Michigan-based customer service to assist patients with billing questions and other needs.
 - **Dedicated Traffic Management Apparatus (TMA)** – through generous local donations, grants, and sound budget planning, the Fire District entered a contract to build a TMA mission-critical apparatus to protect not only our personnel, but the safety of all first responders including the motoring public, law enforcement, wrecker operators and mutual aid fire departments during roadway operations. Additionally, to preserve and protect very expensive firefighting apparatus from damage or loss.

Call Volume Trend 2004-2023

Call Volume Trends:

- 32% decrease in Fire Calls
- 97% increase in Total Calls
- 46% increase in Emergency Medical Service Calls

Year	Fire Calls	EMS Calls	Other Calls	Total Calls	Total Calls %

2023	25	566	390	981	(4.1)

2013-2024 Millage

2024 call volume is estimated from April 30 totals. 331, or 16.5% more calls than at the same time in 2023.

The 10.7% increase is related to property tax value increases from the construction, sales and building permits being issued.

Apparatus Addition - Fall 2024 - Traffic control

Truck #2120 – Purchase 2025 Freightliner Royal Truck .

Traffic Management Apparatus (TMA)

Since 2019, our firefighters responded to 207 incidents on highways, exposing them to significant risks due to fast-moving traffic and increased traffic volume. This represents 1,198 personnel who were exposed and at risk on the roadways. A dedicated Traffic Management Apparatus (TMA) will serve as a mission-critical tool to ensure the safety of not only our personnel, but the safety of all first responders, including the motoring public, law enforcement, wrecker operators, and mutual aid fire departments during roadway operations. Our current method of cone deployment involves personnel walking down the roadway protected by a tanker truck & arrow board following them. As distracted driving and other challenges increase, we have had many near-miss incidents where personnel were nearly hit.

Additionally, if one of the tanker/pumpers was hit in a collision and sustained substantial damage beyond repair, a replacement would

currently cost over \$750,000 each and would take 24 months to build. Our insurance carrier, MMRMA, will not provide replacement cost value coverage on our tanker/pumpers because they exceed 15 years old, and coverage is limited to actual cash value. The TMA truck will not only protect all first responders but also our costly apparatus. The Scorpion MASH attenuator is also designed to protect the motoring public if they were to collide with the attenuator. The proposed truck will be equipped with state-of-the-art traffic control devices, emergency lighting, and communication systems to facilitate quick and effective response to incidents on the highway and other roadways.

By investing in this TMA truck, we will be achieving the core mission to significantly reduce the risk of accidents and injuries to our personnel and all first responders during highway incidents. This proactive measure aligns with our commitment to community risk reduction by minimizing risks and improving the for all of the motoring public that transit roadways within the Fire District.

Traffic Incidents Fatalities 2019-2022

On The Highway We've Got Your Back

Cumberland Valley Volunteer Firemen’s Association/Emergency Responder Safety Institute has, for the last several years, worked on different fronts to instigate various organizations, government agencies, and research entities to help us collect, analyze, and share emergency responder struck-by data with other response organizations nationwide. The hope is that the data will help lead to better solutions, strategies, and tactics for protecting emergency responders from being struck by vehicles in secondary crashes.

Over the four years (2019 – 2022), we tracked incidents involving an emergency responder (e.g., law enforcement officer, firefighter, EMT, fire police officer, tow operator, road service technician,) who was struck and killed by a vehicle while working at a roadway incident scene. The results are concerning, as shown.

Year	Law Enforcement Officers	Fire/EMS	Tow Operators	Road Service Technicians
2019	18	9	14	3
2020	17	4	21	1
2021	30	9	22	2
2022	17	11	17	4
Totals	82	33	74	10

Apparatus Addition - 2161 Rescue Truck

- 2009 Spartan Braun
- Spartan Furion Chassis
- Braun Super Chief Body
- In-cab Seating for 4 with 3 SCBA Seats
- In-Body seating for 5
- Cummins ISC 285hp Diesel Engine
- Allison Automatic Transmission
- Air Ride Suspension
- Price tag: \$39,000
- Modifications: \$3,000

Can be used for rehab at a fire to provide a warm/cold environment for personnel to have their vitals checked and drink water.

Has space to get a patient off of the roadway and keep them out of the elements.

Advantage to own 2 trucks with matching chassis, and a 3rd that is same manufacturer and newer. Similar cab operations, similar controls, etc.

Ambulance companies looked at it and didn't know what to do with the SCBA seats. We look at it and have a place to store SCBAs.

Transport Capable Light Rescue Apparatus

Commercial Record, November 1879.

A fire broke out Thursday morning in the Morrison building at the foot of Butler Street. Before the fire Co. could get out it had got under such head way that it was beyond control and the building was burned to the ground. Mr. Morrison estimates his loss at \$2,000! John Francis, who occupied the lower floor as a meat market lost about \$200. No insurance.

Chief Engineer Wilson, there not being firemen enough on hand to work the engine, at the fire last Thursday morning, ordered some of the citizens, who were standing idle, to the brakes. They refused and, he ordered Marshal Pride to arrest them, but the Marshal, who really has no authority in such cases, refused to do so.

“A man who will stand by and see his neighbors, property burn deserves ducking in a horse pond”.
