Learn how the flood risks to Delaware communities can be addressed and mitigated. This course covers basic risk and hazard concepts; Federal Emergency Management Agency (FEMA) mapping; the Delaware flood insurance program; tools to prevent hazards in a cost-effective manner; and strategies for reducing exposure. Examples presented will include:

- New National Oceanic and Atmospheric Administration (NOAA) sea level rise mapping information
- Local government perspectives on successfully mitigating flood risks
- Recommended strategies for reducing vulnerability and exposure
- Resilience hubs
- Resilient Community Partnership Program

This session qualifies for credit toward the Certificate in Local Government Leadership and the Certificate for Planning Education.
