Whereas, the RNS is a computer-based system that uses phone numbers and addresses maintained by the 9-1-1 system, as well as a cell phone registration system, to warn people in a given area of threats posed by wildfires, floods, chemical releases, criminal activity and other emergency incidents.

Whereas, the RNS also uses other databases, provided by both the vendor and the jurisdiction using the system to provide notification of people within a specified area or contained on a notification list of information that may impact them.

Whereas, this Agreement is authorized by the Interlocal Cooperation Act, Chapter 791 of the Texas Government Code. Each party's monetary obligations, if any, are for the performance of governmental functions or services and are payable only from the current revenues appropriated and available for the performance of those functions or services.
