July 6, 2021

Chad Gilpin, PE, City Engineer
City of Dripping Springs
511 Mercer St
Dripping Springs, Texas

Dear Mr. Gilpin:

Subject: Variance Request – Bunker Ranch Extensions Fire Access
CEC Project 304-065

Description of request & reference to section of the Code of Ordinances applicable to request:

The variance request is in regards to Fire Code Section D107.2 “Remoteness” which says the following:

“Where two fire apparatus access roads are required, they shall be placed a distance apart equal to not less than one-half of the length of the maximum overall diagonal dimension of the property or area to be served, measured in a straight line between accesses.” (D107.2)

As interpreted directly by code, the project does not meet the minimum separation distance required between two fire apparatus access roads due to hardships described below. The maximum overall diagonal dimension of the area to be served measures to be 7,083 LF. One-half of that length is 3,541 LF and this would be the minimum distance required between the two fire apparatus access roads provided for the Florio Tract. The distance between the two existing fire apparatus access points for Bunker Ranch Subdivision is 3,005 LF. Therefore, the access points are about 536 LF short of meeting the minimum distance required between the two fire apparatus roads.

However, if interpreted under exception D107.1.2 “The number of *dwelling units* on a single fire apparatus access road shall not be increased unless fire apparatus access roads will connect with future development, as determined by the *fire code official*”, the project may meet the letter of the code as future connectivity has been provided. At this time, future development cannot be assured, but the exception in the code exists and is additional support for this variance.

After discussions with the Hays County Fire Chief and Fire Marshall, we have confirmed that a variance approved by the City of Dripping Springs is the most prudent means to consider the existing access points of Bunker Ranch Subdivision as Fire Access roads for the proposed development at the Florio Tract.

Description of the hardship or reasons the Alternative Standard/Special Exception/Variance/Waiver is being requested:

Chad Gilpin – City Engineer
CEC Project 304-065
Page 2
July 6, 2021

Due to an existing cliff east of Bunker Ranch Subdivision and an existing creek Southeast of Bunker Ranch subdivision, there is no other point through which the Florio Tract could get access to US 290 for Fire Emergency Access lane. These existing environmental features cause a land lock of Bunker Ranch Subdivision. See the **Exhibit** attached which shows the existing creek linework in blue and a light grey dashed lines hatch showing the approximate location of the steep cliff.

Description of how the project exceeds Code requirements in order to mitigate or offset the effects of the proposed alternative standard/special exception/variance/waiver:

The project exceeds Code requirements by providing more than two access points although the minimum required is just two access points. The additional access points are highlighted in green in the **Exhibit** provided. Though two access points are the code required minimum, this project contains 4 access points and additional connectivity as the area near it develops in time.

Sincerely,

CIVIL & ENVIRONMENTAL CONSULTANTS, INC.

Brian Estes, PE
Principal
