## **South Regional Water Reclamation Facility Operations Report.**

The South Regional Water Reclamation Facility operated within permit parameters for the month of June.

National Works continues to work on the WWLA manhole rehab. This will rehab 46 manholes and add vented lids along the route. 27 have been completed so far.

First Phase of SCADA System completed.

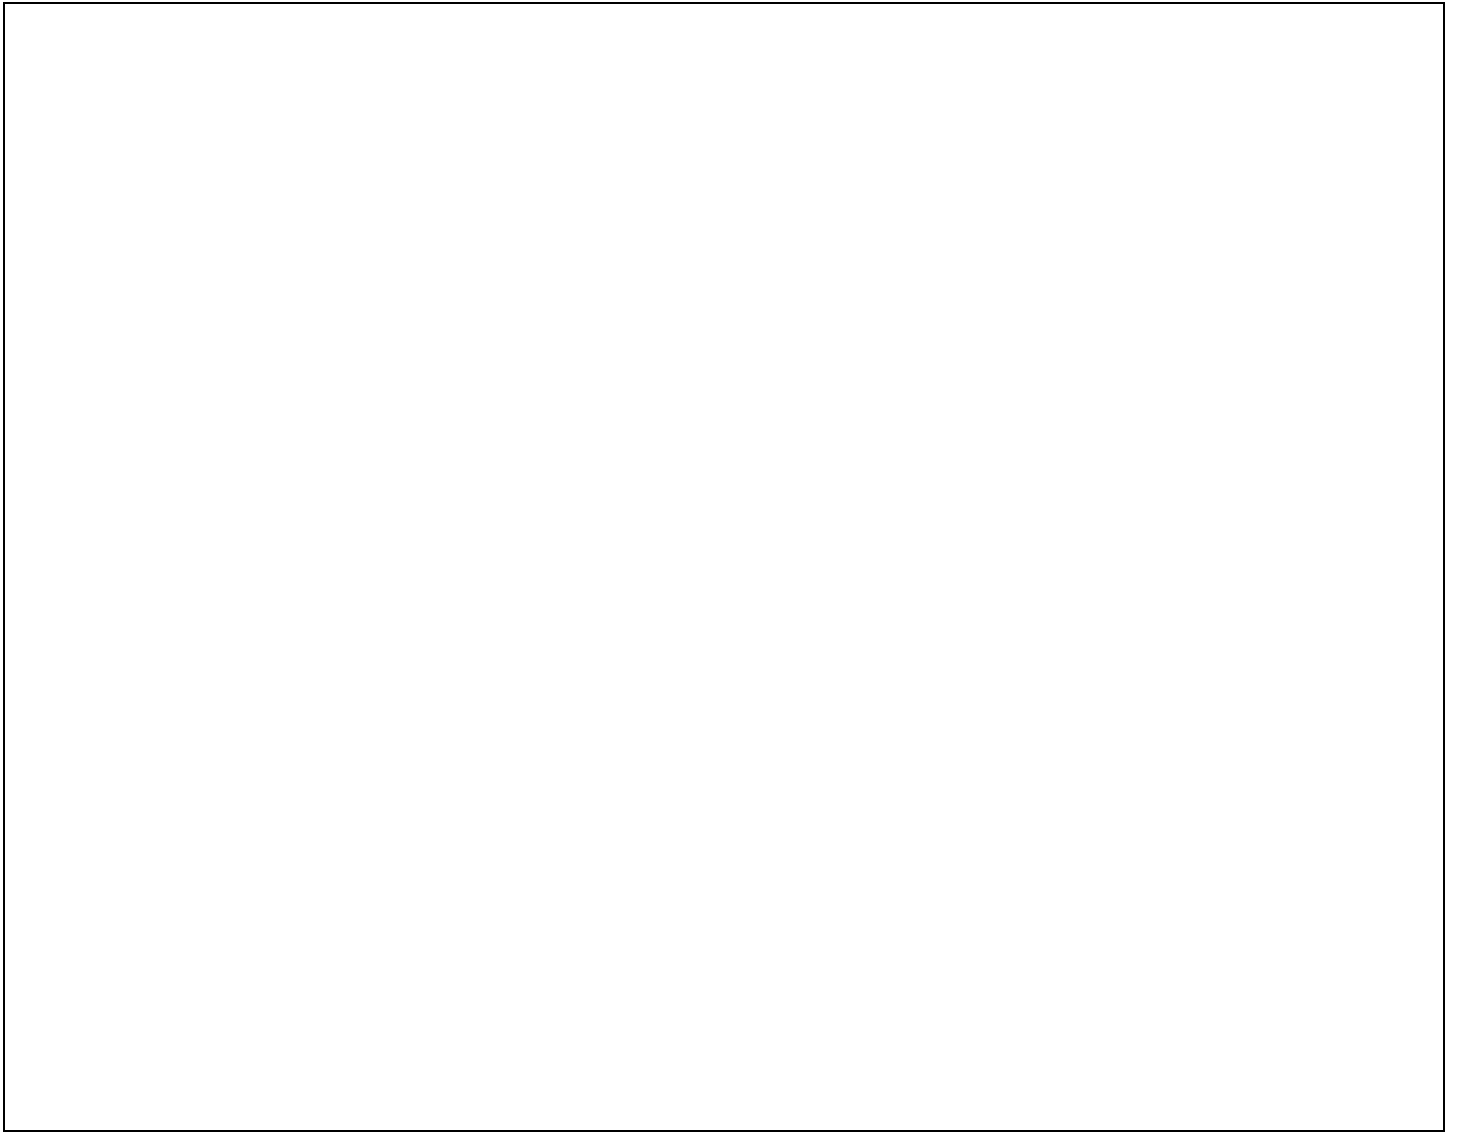

### **Arrowhead Wastewater Plant Update:**

The city is working with AUC on the plant expansion. Construction started on 6/10. We are currently finishing electrical additions and yard piping. Construction should be completed in late-July. The GST and the drip fields have not gone out for bid yet. We need these to come into compliance, however from an operation standpoint the additional capacity in the plant is what is needed to improve effluent quality.

We had one reportable violation for the month of June on the 11th. The BOD concentration was 32 mg/l.

### **Update on Reclaimed Water:**

We have started billing for Reclaimed water. Construction of the irrigation amendments to Sports and Rec Park have started and should be completed by Mid-July.
