DYERSVILLE IA 52040

SUBJECT: Reminder – Service Line Material Public Notice Required under the Lead and Copper Rule Revisions by November 15th

Dear DYERSVILLE MUNICIPAL WATER CO [PWS ID 3130091],

This letter serves as a reminder of the **Lead and Copper Rule Revisions (LCRR)** requirement related to customer notification of service line materials. Under the LCRR, all community and non-transient, non-community water systems must provide **public notice** to customers whose service lines are identified in their inventory as:

- Lead
- Galvanized Requiring Replacement (GRR)
- Unknown (could be lead)

Your water supply has reported one or more service lines that fall into these categories. Therefore, you are required to send the appropriate public notice to each home or building with a lead, GRR, or unknown service line.

You are *not required* to provide notices for service lines that are fully identified as **non-lead** (e.g., copper, plastic, or other confirmed non-lead materials).

To assist you, templates for the required notices, the certification form, and a Frequently Asked Questions document are available at the following link:

<https://www.iowadnr.gov/Environmental-Protection/Water-Quality/Drinking-Water-Compliance/Lead-Service-Line-Inventories#Public-Notice-Templates-595>

Please contact your permit writer if your inventory has changed since 10/16/2024 and you need to submit an updated inventory to correct the number and type of public notices needed.

Next Steps for Compliance:

1. Distribute the appropriate notices to all customers with service lines identified as lead, GRR, or unknown. **Deadline: November 15, 2025**
2. Complete and submit the certification form, including one example of the notice that was sent.
 - By Mail - Send to:
Water Supply Operations
6200 Park Ave Ste 200
Des Moines, IA 50321

- Online - Upload directly through your **Iowa Drinking Water Portal Dashboard**:
<https://programs.iowadnr.gov/iowadrinkingwater/>

Failure to complete these steps by the deadline may result in a reporting violation.

If you need assistance with corrections or updates to your service line inventory, please contact Preston Kizer with the Iowa Association of Municipal Utilities at leadserviceline@iamu.org or 515-289-5203, or reach out directly to the DNR Lead and Copper Program at LCRR@dnr.iowa.gov.

If you have public notice or other questions, please contact your permit writer John Warren at 515-725-0283 or john.warren@dnr.iowa.gov.

Sincerely,

Handwritten signature of Corey Meloid in blue ink.
