

City of Dyersville Notice: Utility Extension Discussion for Olde Castle Road Area

The Dyersville City Council met on November 3, 2025, to consider whether to move forward with extending water and sewer utilities in your neighborhood. City staff have prepared preliminary plans to extend a 12-inch water main and an 8-inch sanitary sewer main to the south side of Olde Castle Road, near 31600 Old Castle Road.

If the City decides to proceed, this extension could make it possible to bring water and sewer service to your property in the future. The Council is seeking your input before making any decisions.

A public work session will be held on **Monday, November 17, 2025, at the Memorial Building, 340 1st Avenue East, in the City Council Chambers, starting at 7:00 p.m.** or immediately following the regular City Council meeting.

City Engineer John Wandsnider has prepared a memo showing the locations of properties that may be affected. If you have questions about the project, you're welcome to contact Mr. Wandsnider at 563-875-7724 or by email at jwandsnider@cityofdyersville.com.

Since this is a work session, the Council cannot take formal action at that meeting. Any decision to move forward will be made at a future City Council meeting.

What changes for you

No changes are happening yet. This meeting is your chance to learn more and share your thoughts before the city makes any decisions.

Where to get help

Call or email City Engineer John Wandsnider with questions. You're also welcome to attend the **City of Dyersville Notice: Discussion on Utility Extension for Olde Castle Road Area**.
