Subject: Toters for trash

Mick, I apologize for the late notice on this information regarding placement of toters for the trash in the City of Dymersville, but we are still working on getting these toters for trash out throughout the City of Dymersville in the Month of November if still possible. I wanted to wait until I knew we were ready to go on these before telling you something and then having to change the plan. Our intention would be to deliver the toters on the day of pick up on Tues and Friday on the week that you say we can do it. We would be ready to do it on the last week of November if that can work for you and the City. That would be November 28th for the Tues route and Dec 1st for the Fri route. Let me know if that works for you, please.
