Description	Qty	Rate	Total
As of right now, the parks electrical is very much so unsafe. If someone try's to turn on a CB someone can get shocked, hurt, or even electrocuted. To make safe (16) 20amp GFCI's must be installed. All receptacles present are all broken, and shorts within the MC. All lighting is needed for safety. One floor electrical box that I opened had swollen insulation which meant water damage to wire due to improper installation. Recommend all panels at Park to be locked out until made safe. This bid includes replacing all (16) bell boxes, GFCI's, and installing in use covers. Replacing (8) lights with (8) LED flood lights with PE cells. Electrical Labor Material
