RE: 2023 Ford F150 XLT Cab & Chassis with ambulance body – Total Loss

Greetings Alicia,

The purchase price of this vehicle was \$215,200.00 and purchase was made on 12-05-2024. I have deducted 10 % from the purchase price for the time the county of Effingham has had the unit in service, for normal wear and tear. A copy of the sales invoice is included with the attachments. Deducting 10%, the value drops to \$193,680.00. That is a deduction of \$21,520.00 for the last 16 months. The Total Loss threshold, based on 75 % of the adjusted retail value, is \$145,260.00. Our appraisal of the damage we were able to discern at the time of our inspection exceeds that amount. We also feel strongly that there is a high probability of a good size supplement if repaired.

After receiving the assignment on 03-18-26, I inspected the unit on 04/08/2026. I started writing my appraisal of damages on 04/13/2026 and reached the Total Loss Threshold based on the adjusted value based on the deduction of 10 % for the time the county had the unit. My appraisal of \$146,571.64 this amount exceeds the T /L threshold.

I started looking for retail comparables and sent out our salvage bid request to over ten dealers. We received a high bid of \$21,500.00 from McLeod's Auto Parts as reflected on my ACV Report attached.

After searching the internet for over two months, I only obtained retail comparables of vehicles with values ranging from \$250K to \$265K due to their overall newer condition and much lower mileage, I concluded that using the purchase price and deducting 10% of that price would be the only way of arriving at a fair settlement value. At that point, I contacted the county of Effingham and spoke to Libbie Kessler in the maintenance office who had sent me a copy of their bill of sale for the 2023 Ford F-450 XLT Ambulance they purchased on 12-05-2024 for \$215,200.00.

In addition, I received an e-mail from Libby at the county on 06/02/2026 reflecting how much the approximate cost of the unit was above the invoice of \$215,200.00 which was for the cab and chassis and the ambulance medical box. The additional equipment that added value was the main stretcher and the loading system as well as the medical supplies. The stretcher and loading system will have to be recertified and then be put in other units. Most of the supplies have already been reallocated into other units. These items combined have an approximate value of \$104,800.00 above the unit's purchase price.

Because I was unable to find anything as a comparison in the current market now and for the last two months that was close to the purchase price, my only recourse was to take 10% off the purchase price for normal wear and tear, reflecting a settlement value of \$193,680.00. Our usual way of coming to an average value for vehicle like this one is to obtain four retail comps of like kind and quality and divide them by four to arrive at a fair average market settlement value. In today's market there was nothing for us to use.

I recommend allowing settlement for this vehicle \$193,680.00 less the counties deductible if any apply. My ACV report is attached for your review and a copy of the J.D. Power report that only reflects the value of the truck's cab and chassis of the vehicle but also does not take into consideration the fit out of the cab to match up with the box.

This concludes my report, thank you for this assignment.

Estimate based on MOTOR CRASH ESTIMATING GUIDE and potentially other third party sources of data. Unless otherwise noted, (a) all items are derived from the Guide DR2MO23, CCC Data Date 05/15/2026, and potentially other third party sources of data; and (b) the parts presented are OEM-parts. OEM parts are manufactured by or for the vehicle's Original Equipment Manufacturer (OEM) according to OEM's specifications for U.S. distribution. OEM parts are available at OE/Vehicle dealerships or the specified supplier. OPT OEM (Optional OEM) or ALT OEM (Alternative OEM) parts are OEM parts that may be provided by or through alternate sources other than the OEM vehicle dealerships with discounted pricing. Tilde sign (~) items indicate MOTOR Not-Included Labor operations. The symbol (<>) indicates the refinish operation WILL NOT be performed as a separate procedure from the other panels in the estimate. Non-Original Equipment Manufacturer aftermarket parts are described as Non OEM, A/M or NAGS. Used parts are described as LKQ, RCY, or USED. Reconditioned parts are described as Recond. Recored parts are described as Recore. NAGS Part Numbers and Benchmark Prices are provided by National Auto Glass Specifications. Labor operation times listed on the line with the NAGS information are MOTOR suggested labor operation times. NAGS labor operation times are not included. Pound sign (#) items indicate manual entries.
