Analysis of Comprehensive Plan/Future Land Use Request (Ordinance Number 25-14)

In Accordance with Florida Statutes Chapter 163.3177.9.:

Discourage Urban Sprawl: Primary Indicators of Sprawl:

The future land use element and any amendment to the future land use element shall discourage the proliferation of urban sprawl. The primary indicators that a plan or plan amendment does not discourage the proliferation of urban sprawl are listed below. The evaluation of the presence of these indicators shall consist of an analysis of the plan or plan amendment within the context of features and characteristics unique to each locality in order to determine whether the plan or plan amendment:

Review of Indicators

1. Low Intensity Development:

Promotes, allows, or designates for development substantial areas of the jurisdiction to develop as low-intensity, low-density, or single-use development or uses.

This indicator does not apply. The requested future land use will provide for a higher density (12 du/acre) than the county FLU (7 du/acre) allows. The area is already primarily single-family development on existing platted lots.

2. Urban Development in Rural Areas:

Promotes, allows, or designates significant amounts of urban development to occur in rural areas at substantial distances from existing urban areas while not using undeveloped lands that are available and suitable for development.

This indicator does not apply. The subject properties are located in an urbanizing area. The annexation and land use assignment apply to vacant land that are not designated as rural or used in a manner denoting rural or agricultural practices or endevours.

3. Strip or Isolated Development:

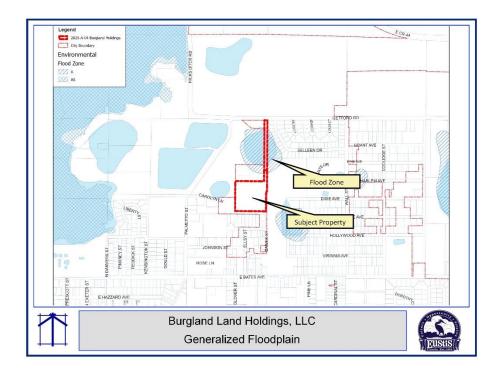

Promotes, allows, or designates urban development in radial, strip, isolated, or ribbon patterns generally emanating from existing urban developments.

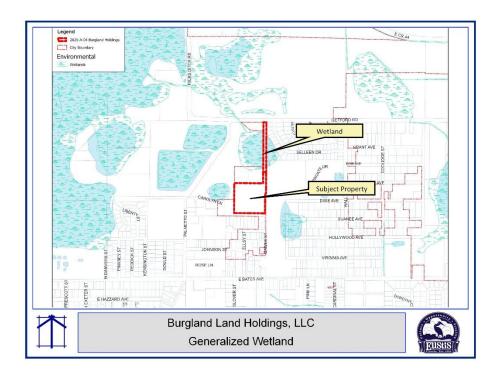

This indicator does not apply. There are existing residential development patterns established in the area with urban facilities available.

4. Natural Resources Protection:

Fails to adequately protect and conserve natural resources, such as wetlands, floodplains, native vegetation, environmentally sensitive areas, natural groundwater aquifer recharge areas, lakes, rivers, shorelines, beaches, bays, estuarine systems, and other significant natural systems.

This indicator does not apply. The majority of the subject property is not in a floodplain and does not contain wetland areas. The proposed development of this property is intended as residential and will follow the appropriate permitting procedures. The narrow strip of property subject to this annexation and FLUM assignment is the only area impacted by the floodplain and wetland.

5. Agricultural Area Protection:

Fails to adequately protect adjacent agricultural areas and activities, including silviculture, active agricultural and silvicultural activities, passive agricultural activities, and dormant, unique, and prime farmlands and soils.

This indicator does not apply. This site and adjacent areas do not support active agricultural or silvicultural activities. The site is within an existing developed and further developing area.

6. Public Facilities:

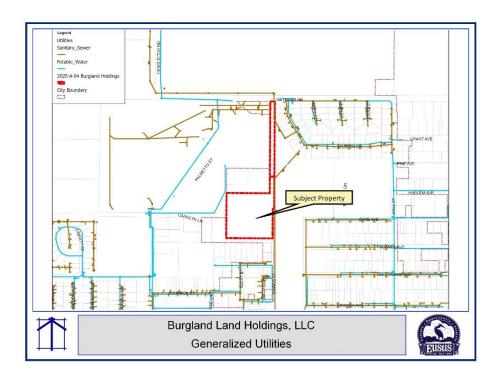

Fails to maximize use of existing public facilities and services.

This indicator does not apply. City water is available to the property. Development of this parcel will maximize the use and efficiency of the City's water service. City sewer service is also available.

7. Cost Effectiveness and Efficiency of Public Facilities:

Allows for land use patterns or timing that disproportionately increase the cost in time, money, and energy of providing and maintaining facilities and services, including roads, potable water, sanitary sewer, stormwater management, law enforcement, education, health care, fire and emergency response, and general government.

This indicator does not apply. Adequate capacity is available to serve the existing and future development consistent with the requested Urban Residential (UR) future land use designation. The City provides these services to other properties in the area, which will improve efficiency.

8. Separation of Urban and Rural:

Fails to provide a clear separation between rural and urban uses.

This indicator does not apply. No nearby properties contain active agricultural activities or uses. The surrounding area is developed or has development

entitlements attached to the land. These developments have densities and intensities that are clearly suburban uses.

9. Infill and Redevelopment:

Discourages or inhibits infill development or the redevelopment of existing neighborhoods and communities.

This indicator does not apply. This property is a logical extension of the city boundaries and begins to eliminate the enclave that exists in the area.

10. Functional Mix of Uses:

Fails to encourage a functional mix of uses.

This indicator does not apply. The site is surrounded by single-family development on the adjacent properties, which is consistent with permitted uses in the area. A variety of other uses are evident, including various commercial uses, within .25 to .5 miles of the subject property.

11. Accessibility among Uses:

Results in poor accessibility among linked or related land uses.

This indicator does not apply. The Land Development Regulations include provisions to provide adequate accessibility and linkages between related uses. Development Services will ensure compliance with these standards during the development review process. The property overall is within walking distance of existing commercial uses.

12. Open Space:

Results in the loss of significant amounts of functional open space.

This indicator does not apply. The site lacks functional open space and is not connected to regionally significant open space.

13. Urban Sprawl:

The future land use element or plan amendment shall be determined to discourage the proliferation of urban sprawl if it incorporates a development pattern or urban form that achieves <u>four</u> or more of the following:

a. Direction of Growth:

Directs or locates economic growth and associated land development to geographic areas of the community in a manner that does not have an adverse impact on and protects natural resources and ecosystems.

The site is adjacent to existing urban/suburban development patterns and is a logical extension of the urban development boundary. The Comprehensive Plan and Land Development Regulations have provisions to protect natural resources and ecosystems at the time of site plan approval. b. Efficient and Cost-Effective Services:

Promotes the efficient and cost-effective provision or extension of public infrastructure and services.

Water and Sewer connectivity are available.

c. Walkable and Connected Communities: Promotes walkable and connected communities and provides for compact development and a mix of uses at densities and intensities that will support a range of housing choices and a multimodal transportation system, including pedestrian, bicycle, and transit, if available.

At the time of development, the site must meet the City's Land Development Regulations relating to connection and sidewalks.

d. Water and Energy Conservation: Promotes the conservation of water and energy.

The development of the site must meet City development and Florida Building Code standards, which will require energy and water-efficient appliances.

e. Agricultural Preservation:

Preserves agricultural areas and activities, including silviculture, and dormant, unique, and prime farmlands and soils.

Not applicable; this site and adjacent areas do not support active agricultural or silvicultural activities. The site is within an existing developed residential area.

f. Open Space:

Preserves open space and natural lands and provides for public open space and recreation needs.

This is not applicable. The site does not provide functional open space or natural areas.

g. Balance of Land Uses:

Creates a balance of land uses based upon the demands of the residential population for the nonresidential needs of an area.

The proposed land use allows for existing and future residential uses. The property is part of an existing residential area and does not lend itself to commercial or mixed uses. Existing commercial development exists in close proximity to serve the residential population.

h. Urban Form Densities and Intensities:

Provides uses, densities, and intensities of use and urban form that would remediate an existing or planned development pattern in the vicinity that constitutes sprawl or if it provides for an innovative development pattern such as transit-oriented developments or new towns as defined in s. <u>163.3164</u>.

Not applicable.

In Accordance with the Comprehensive Plan Future Land Use Element Appendix:

All applications for a Plan amendment relating to the development patterns described and supported within the Plan including, but not limited to, site specific applications for changes in land use designations, are presumed to involve a legislative function of local government which, if approved, would be by legislative act of the City and shall, therefore, be evaluated based upon the numerous generally acceptable planning, timing, compatibility, and public facility considerations detailed or inferred in the policies of the Plan. Each application for an amendment to the Map #1: 2035 Future Land Use Map by changing the land use designation assigned to a parcel of property shall also be reviewed to determine and assess any significant impacts to the policy structure on the Comprehensive Plan of the proposed amendment including, but not limited to, the effect of the land use change on either the internal consistency or fiscal structure of the Plan.

Major Categories of Plan Policies:

This Plan amendment application review and evaluation process will be prepared and presented in a format consistent with the major categories of Plan policies as follows:

1. General Public Facilities/Services:

Since the Plan policies address the continuance, expansion and initiation of new government service and facility programs, including, but not limited to, capital facility construction, each application for a land use designation amendment shall include a description and evaluation of any Plan programs (such as the effect on the timing/financing of these programs) that will be affected by the amendment if approved. This analysis shall include the availability of, and actual and anticipated demand on, facilities and services serving or proposed to serve the subject property. The facilities and services required for analysis include emergency services, parks and recreation, potable water, public transportation, if and when available, sanitary sewer, schools, solid waste, stormwater, and the transportation network.

a. Emergency Services Analysis:

Eustis emergency services already provide emergency response to other properties in the area. Any development consistent with the Urban Residential (UR) future land use designation would not have a significant negative impact on Eustis' emergency services operations.

b. Parks & Recreation:

In 2010, the City prepared a Park Inventory and Level of Service Demand and Capacity analysis as part of the Comprehensive Plan Evaluation and Appraisal Report. The results show that a surplus of park area exists up to and beyond the City's population of 20,015. The current population is 24,500. Pursuant to the comprehensive plan policy and Land Development Regulation, residential development will be required to provide on-site park amenities as part of the development as a subdivision.

c. Potable Water & Sanitary Sewer:

Water and sewer are available to the subject property. Both the water and sewer systems should have adequate capacity to serve the development of the property.

d. Schools:

The proposed change should not have a negative impact on schools. During development, verification of capacity will be required from Lake County Schools.

e. Solid Waste:

The City contracts with Waste Management for the hauling of solid waste. The company already services properties in the general area of the subject property. Serving this property will increase efficiency in the delivery of services.

f. Stormwater:

The Comprehensive Plan and Land Development Regulations include the level of service standards to which new development must adhere. Projects designed to meet these standards will not negatively affect the existing facilities and services.

g. Transportation Network Analysis:

This potential added residential development is considered to have no negative impacts on the existing transportation system.

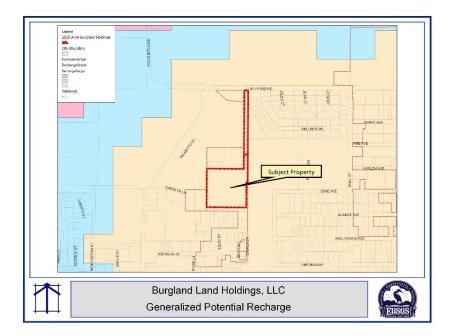

2. Natural Resources/Natural Features:

The policies of the Plan also contain general regulatory guidelines and requirements for managing growth and protecting the environment. These guidelines will be used to evaluate the overall consistency of the land use amendment with the Comprehensive Plan. Specifically, each amendment will be evaluated to 1) determine the existence of groundwater recharge areas; 2) the existence of any historical or archaeological sites; 3) the location of flood zones and the demonstration that the land uses proposed in

flood-prone areas are suitable to the continued natural functioning of flood plains; and 4) the suitability of the soil and topography to the development proposed.

a. Groundwater recharge areas:

The site may be within a medium-high (8-12 inches/year) recharge area. Site-specific studies for recharge may be required for permitting by applicable state agencies. Source: Lake County Comprehensive Plan 2030, Floridian Aquifer Recharge Map.

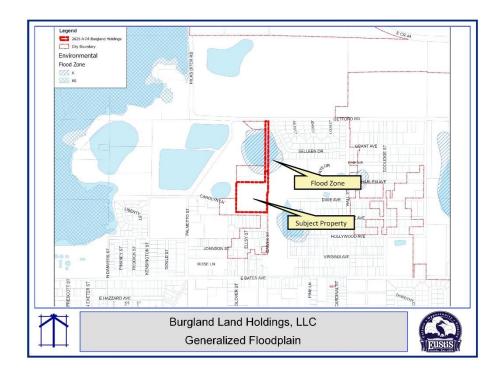

b. Historical or archaeological sites:

The City does not have any record of Florida Master Site Files related to this property, and no known historical or cultural resources exist.

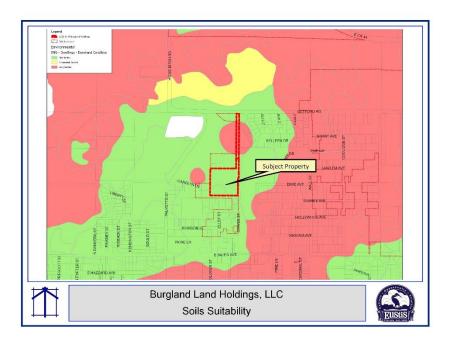

c. Flood zones:

The subject property is not negatively impacted by a 100-year flood zone area. Source - Lake County GIS - 2012 Flood Zones.

d. Soil and topography:

The site soils are suitable for residential development.

3. Comprehensive Plan Review:

Additional criteria and standards are also included in the Plan that describe when, where, and how development is to occur. Plan development policies will

be used to evaluate the appropriateness of the compatibility of the use, intensity, location, and timing of the proposed amendment.

Existing Land Use According to the Lake County Comprehensive Plan:

"The Urban Medium Density Future Land Use Category provides for a range of residential development at a maximum density of seven (7) dwelling units per one (1) net buildable acre, in addition to civic, commercial, and office uses at an appropriate scale and intensity to serve this category. Limited light industrial uses may only be allowed as a conditional use, unless permitted as an Economic Development Overlay District use.

This category shall be located on or in close proximity to major collectors and arterial roadways to minimize traffic on local and minor collector roadways and to provide convenient access to transit facilities. This category may serve as an effective transition between more intense and less intense urban land uses.

Within this category, any residential development in excess of 10 dwelling units shall be required to provide a minimum of 20% of the net buildable area of the entire site as common open space. The maximum intensity in this category shall be 0.35, except for civic uses and Economic Development Overlay District uses, which shall be 0.50. The maximum Impervious Surface Ratio shall be 0.70."

Proposed Land Use According to the Eustis Comprehensive Plan:

Urban Residential (UR)

This designation is intended to provide higher-density residential options for the areas near the downtown core of the city.

<u>General Range of Uses</u>: Includes single-family detached, patio homes, townhouse dwellings, and apartments. Additional uses include adult congregate living facilities (ACLF), other group housing facilities, manufactured residential dwelling units, limited neighborhood commercial uses, parks and recreation facilities, and schools. Public and utility services and facilities that are 2 acres or less in size are also permitted.

<u>Maximum Density</u>: Urban residential densities may be developed at a minimum density of six dwelling units per net buildable acre up to a maximum of 12 dwelling units per net buildable acre, except where existing conditions require a density less than six dwelling units per net buildable acre. The maximum density may be exceeded through an affordable housing density bonus as provided in

the Special Provisions below.

Special Provisions:

- (1) Density bonuses are permitted for the provision of affordable housing, including opportunities for a bonus increase between 5-15 percent in density in the Urban Residential (UR) classification where at least 20 percent of the dwelling units are affordable to families having incomes less than 80 percent of the Orlando Metropolitan Statistical Area median, or where at least 50 percent of the dwelling units are affordable to families having incomes less than 120 percent of the Orlando Metropolitan Statistical Area median. Affordability is based on a housing cost-to-family income factor of 30 percent. A density bonus may also be allowed for energy conservation or green certification as provided for in the LDRs. The combined density bonus for affordable housing and energy conservation/green certification is limited to a total increase of 15%.
- (2) Permit the placement of residential units manufactured off site which otherwise meet all applicable federal and state regulations and standards, provided that:
 - a. all such housing is attached to foundations as in the case of conventional site-built construction; and
 - b. all such housing otherwise meets applicable lot, yard, and related residential classification as set forth in the Land Development Regulations.

Comparison of Lake County Development Conditions

The existing Lake County future land use designation of the property is Urban Medium, which provides for a range of residential development in addition to civic, commercial, and office uses at an appropriate scale and intensity to serve this category. Allowable density and intensity in Urban Medium is a maximum of 7 dwelling units per acre and intensity of 0.25 to 0.35 floor area ratio, with the sum of residential density and non-residential intensity not exceeding 100%.

Residential: Lake County limits residential development to 7 dwelling units/acre, while the Urban Residential (UR) would allow up to 12 dwelling units/acre and provide opportunities for alternative housing types such as multi-family or townhomes.

Proposed Residential Land Uses.

The City shall limit these uses adjacent to incompatible commercial or industrial lands unless sufficient mitigation, such as buffering and setbacks, is provided and available, which lessens the impact on the proposed residences.

Not applicable. The area encompasses both single-family residential and commercial properties. This proposed development would be adequately distanced from the commercial area to the south.

Proposed Non-Residential Land Uses.

The City shall generally not permit new industrial uses to be located adjacent to existing or planned residentially designated areas.

Not applicable. The proposed future land use assignment is for Urban Residential (UR), which is a residential district to be located in an area that is residential in nature.

1. Transportation:

Each application for a land use designation amendment will be required to demonstrate consistency with the Transportation Element of the adopted Comprehensive Plan.

At the time of development plan approval the applicant must provide appropriate studies to demonstrate and mitigate impacts on the existing transportation system.

2. Water Supply:

Each application for a land use designation amendment will be required to demonstrate that adequate water supplies and associated public facilities are (or will be) available to meet the projected growth demands.

City water service and other services are available. The City's adopted Water Supply Plan anticipated additional growth consistent with this development, so supply and capacity are available.

In Accordance with Chapter 102-16(f), Land Development Regulations

Standards for Review:

In reviewing the application of a proposed amendment to the comprehensive plan, the local planning agency and the city commission shall consider:

a. Consistent with Comprehensive Plan:

Whether the proposed amendment is consistent with all expressed policies the comprehensive plan.

The proposed amendment is consistent with the Comprehensive Plan.

b. In Conflict with Land Development Regulations:

Whether the proposed amendment is in conflict with any applicable provisions of these land development regulations.

The proposed amendment is not in conflict with the Land Development Regulations. At the time of development, there will be further review for compliance with planning and building standards and regulations.

c. Inconsistent with Surrounding Uses:

Whether, and the extent to which, the proposed amendment is inconsistent with existing and proposed land uses.

City commercial uses are located to the south within 1,300 feet of the property, and residential uses are located in the surrounding area with varying densities. The proposed Urban Residential Future Land Use is consistent.

d. Changed Conditions:

Whether there have been changed conditions that justify an amendment.

The applicant wishes to annex the property into the City limits of Eustis. Assignment of a City of Eustis future land use designation is required. Upon annexation, the subject property will have a full array of municipal services, including central water and potentially central sewer service. These changed conditions warrant a change in the land use designation.

e. Demand on Public Facilities:

Whether, and the extent to which, the proposed amendment would result in demands on public facilities, and whether, or to the extent to which, the proposed amendment would exceed the capacity of such public facilities, infrastructure and services, including, but not limited to police, roads, sewage facilities, water supply, drainage, solid waste, parks and recreation, schools, and fire and emergency medical facilities.

City water and sewer services are available and near the site. Adequate capacity is available for future development consistent with the requested Urban Residential future land use designation.

Upon annexation, the City will also provide other services such as fire and police protection, library services, parks, and recreation. The City provides these services to other properties in the area, so efficiency will improve.

f. Impact on Environment:

Whether, and the extent to which, the proposed amendment would result in significant impacts on the natural environment.

The site contains no apparent natural resources and is not connected to significant open space.

g. Orderly Development Pattern:

Whether, and the extent to which, the proposed amendment would result in an orderly and logical development pattern, specifically identifying any negative effects on such a pattern.

The site is contiguous to the City limits. The annexation would create a logical development pattern as it "fills in" the City limits to a more natural boundary in this area. This would further the eventual goal of a City of Eustis area under one local government jurisdiction.

The requested UR future land use designation, coupled with a Suburban Neighborhood design district designation, provides for a consistent development transect.

h. Public Interest and Intent of Regulations:

Whether the proposed amendment would be consistent with or advance the public interest, and in harmony with the purpose and intent of these land development regulations.

The purpose and intent of the Land Development Regulations is as follows:

"The general purpose of this Code is to establish procedures and standards for the development of land within the corporate boundaries and the planning area of the city, such procedures and standards being formulated in an effort to promote the public health, safety and welfare and enforce and implement the city's comprehensive plan, while permitting the orderly growth and development with the city and Eustis planning area consistent with its small-town community character and lifestyle."

The requested designation of Urban Residential (UR) land use will provide for orderly growth and development. This designation would advance the public interest by potentially providing additional housing options, and the application of the LDRs to future development will ensure consistency with the city's community character and lifestyle.

i. Other Matters:

Any other matters that may be deemed appropriate by the local planning agency or the city commissioners, in review and consideration of the proposed amendment.

No other matters.

Analysis of Design District Request (Ordinance Number 25-15):

Form-Based Code:

The City's Land Development Regulations are a form-based code. Design districts are unique to form-based codes. Lake County still uses traditional Euclidean zoning, so there are no design districts for parcels in unincorporated Lake County. When a parcel annexes into the City of Eustis, the City must assign a consistent design district that follows the urban, suburban, and rural transect

1. Standards for Review:

The Land Development Regulations include the following standards for review of an amendment to the Design District Map. In approving a change in the designation, the City Commission shall consider: Whether the amendment conflicts with any applicable provisions of the Code.

a.Section 102-17(a) "...Section 109-3 Design Districts:

Identifies the definition, structure, and form of each design district. The assignment of the design district must follow the district pattern and intent."

The requested amendment assigns a newly annexed parcel a designation that meets the district pattern and intent (Suburban Neighborhood). The Suburban development pattern and intent, and the Suburban Neighborhood definition, structure, and form description are stated below. The assignment of a Suburban Neighborhood design district designation is appropriate due to the established and proposed development patterns in the area.

b.Sec. 109-3.4. Suburban development pattern intent statements:

Intent. Suburban development pattern...relies primarily on a pattern of residential development that provides the majority of property owners with substantial yards on their own property. The street layout, comprised of streets with fewer vehicular connections, helps to reduce cut-through traffic and establishes distinct boundaries for residential communities/subdivisions. Each land use provides for pedestrian and bicycle connections.

Design districts – Suburban Neighborhood.

a. Definition. Predominately residential uses with some neighborhood scale commercial services.

b. Structure. Interconnected trails, bikeways and walkways with a street framework comprised of a range of blocks permitted throughout the neighborhoods.

c. Form. Mix of detached residential uses with some neighborhood supporting retail, parks and civic spaces as focal points in the neighborhoods.

The Suburban development patterns statement above indicates that residential uses are primarily located on streets with fewer vehicle connections. A Suburban Neighborhood designation follows the district pattern and intent outlined in the Land Development Regulations and is consistent with the existing transect in the area.

c.Section 102-17(a)

The following guidelines must be followed when proposing the reassignment of design district:

Compatible intensities should face across streets. Changes in design districts should occur along rear alleys or lanes or along conservation edges.

Reassignment is not being proposed. A City of Eustis design district designation must be assigned to annexed property. The proposed design district is compatible with the surrounding design districts.

d.Consistent with Comprehensive Plan:

Whether the proposed amendment is consistent with all elements of the comprehensive plan.

The requested amendment is consistent with the Future Land Use element (including Policy FLU 1.2.4, Development Patterns and FLU 1.3.2. Maintain Residential Compatibility), as well as all other elements of the Comprehensive Plan.

e.Consistent with Surrounding Uses:

Whether, and the extent to which, the proposed design district is consistent with existing and proposed land uses.

The Suburban Neighborhood definition, structure and form are compatible with the existing uses and any proposed uses permitted under the Urban Residential future land use designation.

f.Changed Conditions:

Whether there have been changed conditions that justify amending the design district.

The subject property is proposed for annexation, and a design district assignment is necessary. The conditions have changed from land located in unincorporated Lake County without central services to a site within the City of Eustis with municipal services.

g. Public Facilities.

Whether, and the extent to which, the proposed redistricting would result in demands on public facilities, and whether, or to the extent to which, the proposed change would exceed the capacity of such public facilities, including, but not limited to police, roads, sewage facilities, water supply, drainage, solid waste, parks and recreation, schools, and fire and emergency medical facilities.

A redistricting is not proposed. Assigning a design district to an annexation property will not change the demand impact on public facilities. The Future Land Use designation controls the density and intensity permitted on the site, so the Design District map amendment would not result in impacts beyond that already anticipated. Also, see the analysis of public facilities in the above sections of this report.

h.Impact on Environment:

Whether, and the extent to which, the redistricting would result in significant impacts on the natural environment.

The proposed Design District designation for this property does not change the development potential of the parcel. Design Districts control the form and function of any development that does occur. The Future Land Use designation controls the density, intensity, and minimum open space permitted on the site, so the Design District amendment would not result in additional impacts on the natural environment. As building permit approval must be obtained before development can begin, the Comprehensive Plan and the Land Development Regulations include standards for the protection of environmentally sensitive lands that would apply should conditions at the time of development warrant such protection.

i.Property Values:

Whether, and the extent to which, the proposed redistricting would affect the property values in the area.

Redistricting is not being proposed. A City of Eustis design district designation must be assigned to the annexed property. This request should not affect property values because the proposed Design District designation is consistent with the surrounding development patterns and design districts. j.Orderly Development Pattern:

Whether, and the extent to which, the proposed redistricting would result in an orderly and logical development pattern.

The request is the assignment of a design district to an annexation parcel, not redistricting. However, the proposed Design District designation is consistent with the suburban development pattern identified in Section 109-5.5 of the Land Development Regulations. Assignment of the requested designation will result in a more orderly and logical development pattern, making the designation consistent with the surrounding area designations and established development patterns.

k.Public Interest and Intent of Regulations:

Whether the proposed redistricting would be in conflict with the public interest, and in harmony with the purpose and intent of these regulations.

The request is the assignment of a design district to an annexation parcel, not redistricting. The proposed Design District is not in conflict with the public interest and reflects the purpose and intent of the regulations.

I.Other Matters:

Any other matters that may be deemed appropriate by the city commission, in review and consideration of the proposed redistricting.

The request is the assignment of a design district to an annexation parcel, not redistricting. The City's Land Development Regulations are a formbased code. The Design District designations define the development form, but not the types of land use, densities, intensities, or required open space. The districts, therefore, must be consistent and follow the urban, suburban, and rural transects. This request assigns a Suburban Neighborhood design district designation to an annexation parcel, which is consistent with the existing transect.
