INVESTMENT POLICY

I. Policy

It is the policy of the City of Fair Oaks Ranch Municipal Development District (the "District") to invest funds in a manner which will provide the highest, reasonable investment return with the maximum security of principal while meeting the daily cash flow demands of the District and conforming to all federal, state, and local statutes governing the investment of public funds. It is also the policy of the District that the administration of its funds and the investment of those funds shall be handled as its highest public trust.

~~(Moved Sections) The Investment Policy shall be adopted by Resolution as part of the Financial Management Policies. The policy shall be reviewed and adopted by Resolution annually by the Board of Directors.~~

II. Purpose

The purpose of this policy is to comply with ~~Chapters 2256 and 2257~~ of the Texas Government Code, Chapter 2256, the Public Funds Investment Act (the "Act"), and Texas Government Code, Chapter 2257, the Public Funds Collateral Act, which requires the adoption of a written investment policy regarding the investment of funds. The investment policy addresses the methods, procedures and practices that must be exercised to ensure effective and judicious fiscal management of the District's funds.

III. Scope

This investment policy applies to all financial assets and funds of the District. Funds are defined in the District's audited Annual Financial Report. Funds are created by the Board unless specifically exempted by the Board and this policy.

Investments are being pooled into a pooled group fund that consists of balances from the District's funds. The strategy of pooling investments is subject to change as deemed appropriate by the Investment Officer, and subject to the provisions of this Policy.

IV. General Objectives

The primary objectives, in priority order, of the District's investment activities shall be safety, liquidity, diversification, and yield.

Safety - Safety of the principal is the foremost objective of the District. Investments shall be undertaken in a manner that seeks to ensure the preservation of capital in the overall portfolio guarding against security defaults or erosion of market value.

Liquidity - The investment portfolio will remain sufficiently liquid to meet all operating requirements which might be reasonably anticipated. To the extent possible, this will be achieved by matching investment maturities with forecasted cash flow liabilities and maintaining additional liquidity for unexpected liabilities.

Diversification - Diversification of the portfolio will include diversification by maturity and market sector to manage market risk.

Yield - The investment portfolio shall be designed with the objective of attaining a market rate of return, taking into account the investment risk constraints and liquidity needs. Market rate of return may be defined as the average yield of the current six-month US Treasury Bill. Return on investment is of secondary importance compared to the safety and liquidity objectives described above.

Effective cash management is recognized as essential to good fiscal management. Cash Management is defined as the process of managing monies in order to ensure maximum cash availability. The District will effectively collect account receivables, practice prudent investment of its available cash, disburse payments

EXHIBIT A

in accordance with invoice terms and manage banking services.

V. Prudence Standards of Care

Prudence - The standard of prudence to be used by investing officials shall be the "prudent person" rule and shall be applied in the context of managing ~~an~~ the District's overall portfolio with the objectives and priority of preservation of safety of principal, liquidity, and yield. This rule states:~~that~~

"Investments shall be made with judgment and care, under circumstances then prevailing, which persons of prudence, discretion and intelligence exercise in the management of their own affairs, not for speculation, but for investment, considering the probable safety of their capital as well as the expected income to be derived." Prudence of an investment officer's decisions shall be exercised and measured by considering the investment of all funds under the District's authority, which the investment officer had a responsibility, rather than a consideration to the prudence of a single investment, and whether the investment decision was consistent with the written investment policy.

Limitation of Personal Liability - Investment officials acting in accordance with this policy and in accord with the Prudent Person Rule shall be relieved of personal liability in the management of the portfolio provided that deviations from expectations for a specific security's credit risk or market price change is reported in a timely fashion and the appropriate action is taken to control unfavorable developments.

~~(Moved Sections) **Ethics and Conflicts of Interest** - Officers and employees involved in the investment process shall refrain from personal business activity that could conflict with proper execution and management of the investment program, or that could impair their ability to make impartial investment decisions. Employees and investment officials shall disclose any material interests in financial institutions that conduct business with the District.
