

SAWS Emergency Interconnect

- Project constructs an emergency interconnect with SAWS to provide a backup water source for Zone C
- Improves resiliency in the event of extended power outage or other event where FORU is unable to provide adequate flow or pressure
- Planned location is near intersection of Fair Oaks Parkway and IH-10 Access Rd.
- Currently in design phase with construction anticipated in FY 2025-26
- **Total Estimated Cost = \$200,000**

Prioritization Score: New project
"Must Do" Project [Resiliency, Regulatory (SB3)]
