

Exhibit D

June 5, 2025

Hi Neighbors,

Ramey and I have initiated the process through the City of Fair Oaks Ranch to request the speed limit on Rolling Acres Trail be reduced from 35 mph to 30 mph to improve public safety on Rolling Acres and to be consist with the current speed limits on Meadow Creek Trail and Keenland Drive. However, since this change would affect all of us on Rolling Acres Trail, we would like your feedback on whether you support or oppose this proposed change. As we move forward to the next steps, we'd like to present transparent, balanced information to the Transportation Safety Advisory Committee and the City council. We are requesting your help by providing feedback on this proposal. Please return this survey form to our mailbox at 7320 Rolling Acres Trail or provide a text message or email message stating your support or opposition to this proposed change. If you provide feedback via text message or email, please also provide your address on Rolling Acres Trail. Including your name is completely optional.

As part of the city evaluation process, radar signs were recently installed on Rolling Acres Trail near Meadow Creek to gather speed information for vehicles on Rolling Acres Trail. Following the traffic study, the Transportation Safety Advisory Committee and the City Council will consider the speed data and public opinion before rendering a final decision on this proposal.

Thank you in advance for providing your feedback on this proposed change.

Doug Miller

Survey:

☐ - I/we support reducing the Rolling Acres speed limit to 30 mph.

☐ - I/we oppose reducing the Rolling Acres speed limit to 30 mph.

Name: (optional) _____

Address: _____
