

Folsom City Council Staff Report

MEETING DATE:	3/25/2025
AGENDA SECTION:	Public Hearing
SUBJECT:	Resolution No. 11341 – A Resolution of the City Council of the City of Folsom Declaring Results of the Natoma Station Maintenance Assessment District No. 2025-1 Ballot Proceeding, Approving the Final Engineer’s Report, Confirming the Diagram and Assessments, and Ordering the Levying of Assessments for the Maintenance and Servicing of Improvements Within Said District
FROM:	Parks and Recreation Department

RECOMMENDATION / CITY COUNCIL ACTION

Staff recommends the City Council conduct a public hearing to receive testimony and to allow for the submittal of ballots before the close of the public hearing.

Staff recommends following the close of the public hearing, the item be continued to the end of the meeting while the City Clerk canvasses the ballots.

If the majority of the votes as weighted by assessment amount in accordance with Assessment Law are in favor of the proposed district, staff recommends that the City Council adopt Resolution No. 11341 – A Resolution of the City Council of the City of Folsom Declaring Results of the Natoma Station Maintenance Assessment District No. 2025-1 Ballot Proceeding, Approving the Final Engineer’s Report, Confirming the Diagram and Assessments, and Ordering the Levying of Assessments for the Maintenance and Servicing of Improvements Within Said District.

If the majority of the votes as weighted by assessment amount in accordance with Assessment Law are opposed to the proposed district, the City Council shall not adopt the resolution.

BACKGROUND / ISSUE

On January 14, 2025, the City Council approved Resolution No. 11321 - A Resolution Initiating Proceedings for the Formation of a Landscaping and Lighting Assessment District to be known as the Natoma Station Maintenance Assessment District No. 2025-1.

On January 28, 2025, the City Council approved Resolution No. 11323 - A Resolution Approving the Preliminary Engineers Report, Declaring the Intention to Order the Formation of the Natoma Station Maintenance Assessment District No. 2025-1, to Levy and Collect Assessments, to Provide Notice of Public Hearing and Direct the Mailing of Assessment Ballots Within the Proposed District in the City of Folsom.

Pursuant to Government Code Section 53753, ballots were mailed to all current property owners within the proposed district. Along with the ballot, the property owners received a postcard describing the purpose of the new district. For Fiscal Year 2025-2026 the proposed Natoma Station Maintenance Assessment District No. 2025-1 annual assessment will be \$78.32 per Special Benefit Point as described in the Final Engineers Report as well as an escalator not to exceed 3% that would allow yearly adjustments if needed in the future. There are a total of 5,535.36 benefit points in the district. The assessment range is based on the benefit received by each parcel and the range of rates for a single-family home is between \$185.47 and \$360.15 with an average single-family home rate of \$258.45 annually.

Under the provisions of Proposition 218, a public hearing must be held on the levy of new assessments at least 45 days after notice of the proposed assessment was mailed to record owners of each parcel in the new district. The public hearing was set in Resolution No. 11323 on January 28, 2025, and the notice of public hearing was mailed to record owners on February 6, 2025, and published in the Folsom Telegraph on March 14, 2025. The public hearing was set for March 25, 2025, at 6:30 p.m. in the City Council Chambers, 50 Natoma Street, Folsom, California 95630.

At the public hearing, ballots will be counted and, in the absence of a majority protest of the votes as weighted by assessment amount in accordance with Assessment Law against the imposition of a new assessment, the City Council may consider approving this resolution to approve the Final Engineer's Report, form the district, and authorize the levy and collection of the new assessments. The proceeding for the formation of a new assessment district shall be abandoned if a majority protest exists.

As part of the formation process, and in order to levy the annual assessment should the district be formed, an Engineer's Report must be prepared in accordance with the requirements of Article XIID, Section 4 of the California Constitution (also known as Proposition 218) and Article 4 of the Landscaping and Lighting Act of 1972 (Sections 22565 through 22574 of the Streets and Highways Code).

The attached Final Engineer's Report for Fiscal Year 2025-2026 (Attachment 2) is submitted for City Council review and approval. Included within the report are the following:

- A. Plans and specifications for the maintenance of the improvements.
- B. Estimate of the cost of maintaining the improvements.

- C. Diagram of the assessment district.
- D. Assessment of the estimated costs for maintaining the improvements.

POLICY / RULE

The City Council is required to approve, or modify and approve, the Engineer's Report as part of the formation process pursuant to the Landscaping and Lighting Act of 1972 (Streets and Highways Code Section 22586). The City Council shall comply with the majority protest and hearing procedures pursuant to Section 22588 of the Streets and Highways Code.

ANALYSIS

The original Natoma Station Landscaping and Lighting District (“District”) was formed by Resolution No. 3024 on June 18, 1990, to maintain improvements within the district. These improvements include landscaping and associated improvements along Iron Point, Blue Ravine, Turnpike, Black Diamond, and Natoma Station, as well as the subdivision’s streetlights, landscape lighting, irrigation systems, open space, monument entry signage, soundwalls, mini parks, and art. This district was formed prior to Proposition 218 and therefore does not have an escalator built into the annual rate.

There are 1,272 single-family dwelling units within the district, and it is one of the older districts in the City. In addition, this district has not already gone through the Proposition 218 process to address the gap that exists from increased costs to maintain its intended level of service. The district maintains the aforementioned improvements along the frontages and medians of Iron Point, Blue Ravine, Turnpike, Black Diamond, and Natoma Station. In addition to maintaining these areas, the district is also responsible for servicing costs for irrigation water and electricity to the street and landscape lights.

Revenue from the existing district assessment (approximately \$170,000 annually) is allocated yearly to maintain the district’s features. The existing per unit rate of \$91.70 has not been increased since the district was established over 34 years ago. Approximately 37% of the budget currently covers scheduled and unscheduled landscape maintenance; 9% to streetlight maintenance and supplies; 23% to water and electricity; and 29% to incidental cost (non-landscape contract services, electrical repairs, vandalism response/repairs, hazard tree removal, sidewalk repair, yearly backflow testing, preparation of Engineer’s Reports, publications/mailings, staff, overhead, and county auditor fee).

Historically Expenses Have Exceeded Revenues

The existing revenue from the collected assessments has been unable to fund the expected day-to-day unscheduled costs such as irrigation repairs and plant/tree replacements, as well as not being able to set aside funds for life-cycle costs in the district. As a result, when the current fiscal year closes on June 30, 2025 the District is projected to have a negative fund balance of \$620,194. Expenses have exceeded revenues for several years which highlights the need for the additional assessment.

Revenues vs. Expenditures:

	Actual	Actual	Actual	Estimate	Projected
	2020-21	2021-22	2022-23	2023-24	2024-25
Revenues	173,249	174,372	174,084	176,817	174,000
Expenditures	274,656	246,858	338,710	222,312	248,032
	(101,407)	(72,486)	(164,626)	(45,495)	(74,032)

The primary objective of forming a new district to replace the existing district is to specifically provide the level of service originally intended, address deferred maintenance of the improvements within the district, plan for life-cycle replacements and repairs for years into the future and provide for an annual inflationary adjustment as needed. Such deferred items include outdated and un-centralized irrigation systems, replacement of missing landscaping, addressing tree care and implementation of water conservation measures such as replacing dead/dying trees and shrubs with water wise plantings, and LED streetlight retrofits. Should the new landscaping and lighting district be formed, it is proposed to complete many of the deferred maintenance improvements over the first few years as well as embark on the phased replacement plan for the older landscape areas.

As part of the process to form a new assessment district, staff initiated a public outreach program for the Natoma Station community with two public meetings that were held on June 17, 2022, and March 13, 2024. The intent of the meetings was to discuss the options and ideas for addressing the district's financial condition and develop a viable option that would ultimately be voted on and approved (or denied) by the property owners within the district. Staff presented four potential options for this district that are as follows: 1) reduce level of service based on current funding; 2) create a new district that would just cover budget deficit; 3) create a new district to address budget deficit and address some deferred maintenance; and 4) create a new district to cover deficit and address all deferred maintenance and provide some enhancements. There was thoughtful discussion to ensure those in attendance had their questions answered. As a result of these two public meetings, those in attendance were supportive of Option 4. As such, this was the option to appear on the ballot for property owners in the district to vote on.

In addition, the City's website includes information about the proposed assessment and staff have spoken with numerous residents via phone calls and emails about the proposed measure. City staff have distributed information about the new district via mail, the City Website, and social media.

This staff report and Council resolution are being submitted for City Council review and approval. The Final Engineer's Report is prepared in accordance with Proposition 218 and the Streets and Highways Code and includes the following: plans and specifications, estimated costs and budgets, method of apportionment, the assessment for Fiscal Year 2025-2026, and the assessment diagram.

The residents of the Natoma Station Landscaping and Lighting District were sent a ballot to vote on the proposal to form a new assessment district in early February, meeting the 45-day period for the district property owners to consider the proposed assessment. At the public hearing, ballots will be counted and, in the absence of a majority protest of votes as weighted by assessment amount in accordance with Assessment Law against the imposition of a new assessment, the City Council

may consider approving this resolution to approve the Final Engineer's Report, form the district, and authorize the levy and collection of the new assessments. The formation of a new assessment district shall be abandoned if a majority protest exists.

If no majority protest exists, and the new assessment district is formed pursuant to the aforementioned procedure, the original Natoma Station Landscaping and Lighting District will be consolidated with the newly formed Natoma Station Maintenance Assessment District No. 2025-1. Pursuant to Section 22611 of the Streets and Highways Code, all assets, liabilities, revenues, expenses and installments of the original Natoma Station Landscaping and Lighting District will be transferred to, and assumed by, the Natoma Station Maintenance Assessment District No. 2025-1 for the continued maintenance and servicing of the improvements.

FINANCIAL IMPACT

There will be a small fiscal impact on the general fund to provide for the proportion of the district that provides a general benefit, which is calculated as 7.56% of the total district costs, or \$28,475.91 in FY 2025-2026. Most of the costs associated with this district will be borne by the district and for the benefit of the district residents.

ENVIRONMENTAL REVIEW

The formation of a landscaping and lighting district creates a financing mechanism to service existing landscaping and lighting improvements is not a project under the California Environmental Quality Act. No environmental review is required.

RESOLUTION NO. 11341

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF FOLSOM DECLARING RESULTS OF THE NATOMA STATION MAINTENANCE ASSESSMENT DISTRICT NO. 2025-1 BALLOT PROCEEDING, APPROVING THE FINAL ENGINEER'S REPORT, CONFIRMING THE DIAGRAM AND ASSESSMENTS, AND ORDERING THE LEVYING OF ASSESSMENTS FOR THE MAINTENANCE AND SERVICING OF IMPROVEMENTS WITHIN SAID DISTRICT

WHEREAS, City Council, on January 14, 2025, initiated the proceeding to form the proposed "Natoma Station Maintenance Assessment District No. 2025-1" (the "District") by adopting Resolution No. 11321, to which resolution reference is made for further particulars; and

WHEREAS, City Council, on January 28, 2025, declared its intention to order the formation of the District by adopting Resolution No. 11323, to which resolution reference is made for further particulars; and

WHEREAS, notices of such hearing accompanied by assessment ballot materials were mailed to each record property owner in the time, form and manner required by the Assessment Law, a full hearing has been given, and at this time all assessment ballots submitted pursuant to the Assessment Law have been tabulated by the City Clerk pursuant to the terms and provisions of the Landscaping and Lighting Act of 1972 (Streets & Highways Code Section 22500 and following) (the "1972 Act"), Article XIIID of the Constitution of the State of California ("Article XIIID") and the Proposition 218 Omnibus Implementation Act (Government Code Section 53750 and following) ("Proposition 218" and, together with the 1972 Act and Article XIIID, the "Assessment Law"); and

WHEREAS, the City Clerk has prepared and submitted to this legislative body a Certificate of Tabulation Official and Statement of Assessment Ballots Submitted (the "Certificate of the Tabulation Official"), a copy of which is attached as Exhibit A hereto and incorporated herein by this reference, which reflects the results of the tabulation of the assessment ballots; and

WHEREAS, the City of Folsom is now satisfied with the assessment and all matters contained in the Engineer's Report as submitted.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF FOLSOM that:

1. The Final Engineer's Report for the Natoma Station Maintenance Assessment District No. 2025-1 is hereby approved.
2. The canvassing of the ballots cast at the assessment ballot proceeding held on March 25, 2025, is hereby approved and confirmed.
3. The Natoma Station Maintenance Assessment District No. 2025-1 is hereby formed and established with the following findings:

- A. The assessment ballots were mailed, as required by the Assessment Law, to the record owners of all properties proposed to be assessed within the District.
 - B. The assessment ballots were received by the City Clerk until the close of the Public Hearing conducted on March 25, 2025.
 - C. The assessment ballots that were completed and received by the City Clerk, prior to the close of the Public Hearing, have been tabulated in accordance with the procedures established under the Assessment Law and the results of such tabulation have been submitted to this City Council.
 - D. The assessment ballots submitted in favor of the levy of assessments exceed the assessment ballots submitted in opposition to such levy as weighted by assessment amount in accordance with the Assessment Law.
 - E. Majority protest does not exist to the levy of assessments within the District.
-
- 4. The diagram and assessments as set forth in the Final Engineer's Report for the Natoma Station Maintenance Assessment District No. 2025-1 are hereby confirmed and approved.
 - 5. The maintenance and servicing of improvements as set forth in the Final Engineer's Report for the Natoma Station Maintenance Assessment District No. 2025-1 are hereby approved and ordered.
 - 6. The assessments set forth in the Final Engineer's Report shall now constitute liens upon the lots or parcels of land described in said Report.
 - 7. Pursuant to Section 22605(d) of the Streets and Highways Code, the original Natoma Station Landscaping and Lighting District is hereby consolidated with the Natoma Station Maintenance Assessment District No. 2025-1.
 - 8. Pursuant to Section 22611 of the Streets and Highways Code, all assets, liabilities, revenues, expenses and installments of the original Natoma Station Landscaping and Lighting District shall be transferred to, and assumed by, the Natoma Station Maintenance Assessment District No. 2025-1 for the continued maintenance and servicing of the improvements.
 - 9. The City Clerk shall file a certified copy of the diagram and assessments with the Auditor of Sacramento County no later than the second Monday in August 2025.
 - 10. The Auditor of Sacramento County is requested to enter on the Sacramento County Assessment Roll the assessment for each lot or parcel of land in the amount indicated in the Final Engineer's Report.

PASSED AND ADOPTED this 25th day of March 2025, by the following roll-call vote:

AYES: Councilmember(s):

NOES: Councilmember(s):

ABSENT: Councilmember(s):

ABSTAIN: Councilmember(s):

1. Introduction

1.1 District History

The City of Folsom (“City”) desires to fund the operation, maintenance and servicing of certain landscaping, street lighting, and public art as described in Section 2 of this Report through an annual assessment. The proposed assessment is subject to the substantive and procedural requirements described in Section 4, Article XIII D of the California Constitution (“Article XIII D”). The assessment is authorized pursuant to the Landscaping and Lighting Act of 1972 (Streets and Highways Code Section 22500, *et seq.*) (“the “Act”).

The District currently has an assessment which was established in 1990 to provide a source of funding for the ongoing operation, maintenance, and servicing of landscaping, street lighting, public art, and other improvements within the district. However, while costs have continued to increase and the District has continued to build out and add additional trees, landscaping and street lighting, there has not been an increase in the assessment as there is no inflator.

As the existing assessment district does not provide sufficient revenue for the services and improvements, the City proposes to form a new assessment district that is intended to provide sufficient revenue to fund ongoing annual maintenance, operation, and servicing of the landscaping, street lighting, public art, and other improvements; reserve funds for replacement and repair of the improvements; administrative expenses; and an allowance for an annual inflator so the assessment rate may be increased over time as costs increase, without conducting a new Article XIII D balloting proceeding. The proposed assessment district is the Natoma Station Maintenance Assessment District No. 2025-1 (“District”). If approved, the new District will replace the existing assessment district beginning in Fiscal Year 2025-26.

1.2 Legislative Context

In 1996, California voters adopted Proposition 218, known as the “Right to Vote on Taxes Act,” which added Articles XIII C and XIII D to the California Constitution. Article XIII D established new substantive and procedural requirements on agencies for levying assessments, being levies on real property by an agency for a special benefit conferred upon the real property. “Special benefit” is defined in Article XIII D as “a particular and distinct benefit over and above general benefits conferred on a real property located in the district or to the public at large.”

Article XIII D imposes five basic substantive requirements on assessments:

- (1) All parcels that will have a special benefit conferred upon them and upon which an assessment will be imposed must be identified;
- (2) The general benefits must be distinguished from the special benefits conferred on the parcels;
- (3) The proportionate special benefit derived by each identified parcel must be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property-related service being provided;

- (4) The amount assessed to a parcel must not exceed the reasonable cost of the proportional special benefit conferred on that parcel and must not include any costs attributable to the general benefit; and
- (5) Parcels within a district that are owned or used by any agency, the State of California or the United States shall not be exempt from assessment unless the agency can demonstrate by clear and convincing evidence that those publicly owned parcels in fact receive no special benefit.

Article XIII D also imposes procedural requirements on assessments, which include preparing an engineer's report, providing written notice of the proposed assessment and public hearing to property owners, holding a public hearing, and providing for a protest ballot proceeding.

1.3 Court Rulings

Since the initial passage of Proposition 218, several court rulings have helped provide context and direction with respect to the procedures and requirements of Article XIII D for levying assessments. Several of the key concepts from these rulings are summarized below.

GENERAL BENEFIT

Article XIII D requires an agency to separate the general benefits from the special benefits conferred on the identified parcels because only special benefits are assessable.

The Court of Appeal in *Golden Hills Neighborhood Assn., Inc. v. City of San Diego* (2011) ("Golden Hills") clarified this concept by stating, "*Separation and quantification of general and special benefits must be accomplished by apportioning the cost of a service or improvement between the two and assessing property owners only for the portion of the cost representing special benefits.*"

The Court of Appeal in *Beutz v. County of Riverside* (2010) ("Beutz") noted that the trial court took judicial notice of the Legislative Analyst's Office pamphlet titled "Understanding Proposition 218" which states an agency must "*estimate the amount of special benefit landowners would receive from the project or service, as well as the amount of 'general benefit.' This step is needed because Proposition 218 allows local government to recoup from assessments only the proportionate share of cost to provide the special benefit.*"

The Court in Beutz furthered this idea stating, "*Separating the general from the special benefits of a public improvement project and estimating the quantity of each in relation to the other is essential if an assessment is to be limited to the special benefits.*"

The Court of Appeal in *Silicon Valley Taxpayers' Association Incorporated v. Santa Clara County Open Space Authority* (2008) clarified that general benefits are not restricted to benefits conferred only on persons and property outside the assessment district but can include benefits both conferred on real property located in the district or to the public at large. The court defined the "public at large" as comprising all members of the public, including those who live, work, and shop within the district, and not simply transient visitors.

The Court of Appeal again reiterated the need to separate, quantify and apportion costs to general benefits from the improvements in *Broad Beach Geologic Hazard Abatement District v 31506 Victoria Point LLC*

(2022), stating, “*The District cites no authority, and we are aware of none, suggesting that an agency’s subjective intent determines the need to account for general benefits.*”

BENEFIT-BASED NOT COST-BASED

In *Town of Tiburon v. Bonander* (2009) (“*Tiburon*”), the Court of Appeal clarified the idea that assessments must be apportioned based upon benefit rather than cost. The Court stated, “*Proportionate special benefit is the basis upon which a project’s total assessable costs are apportioned among parcels within an assessment district.*”

The assessment on a particular property cannot be based on the relative cost of the improvements to the property, but rather on the special benefit conferred on such property. The Court in *Tiburon* also stated, “*an assessment represents the entirety of the cost of the improvement or property-related service, less any amount attributable to general benefits (which may not be assessed), allocated to individual properties in proportion to the relative special benefit conferred on the property.*”

MEASURING AND APPORTIONING SPECIAL BENEFIT

The Court in *Tiburon* acknowledged the difficulty of trying to precisely assign and measure special benefit, stating, “*Any attempt to classify special benefits conferred on particular properties and to assign relative weights to those benefits will necessarily involve some degree of imprecision.*”

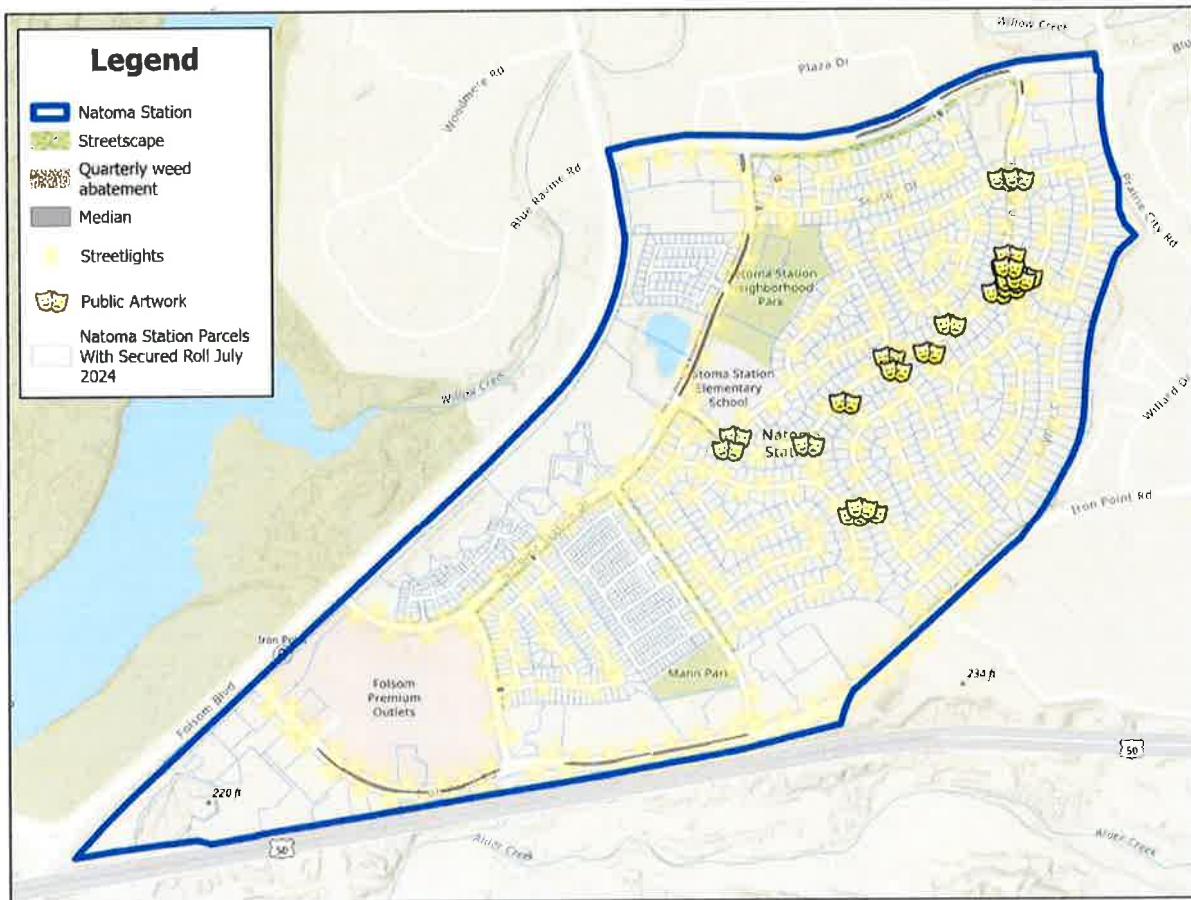

The Court in *Tiburon* went on to say that a formula assigning equal weight to different special benefits “*may be a legally justifiable approach to measuring and apportioning special benefits, [but] it is not necessarily the only valid approach. Whichever approach is taken to measuring and apportioning special benefits, however, it must be both defensible and consistently applied.*”

2. Improvements

The assessments will fund the following maintenance, operation, and servicing activities related to the following improvements:

- Landscaping
- Street Lighting
- Public Art

The maintenance, operation, and servicing activities listed above are collectively referred to as the "Improvements." A general illustration of the location of the Improvements is shown below, and the Assessment Diagram can be found in Section 8.

For illustration purposes only, not an official map.

2.1 Landscaping

The Improvements include the maintenance, operation, and servicing of street trees and other landscaping throughout the boundary of the District including but not limited to: groundcover, turf, trees, weed and pest management; shrubs, planters, street medians in the public right of way as well as open space, trails

and green belt areas dispersed throughout the District; and may also include sidewalk and hardscape Improvements, entry monuments and associated appurtenant facilities. Eligible District costs may include, but are not limited to, personnel, furnishing electrical energy, utilities such as water, refuse and gas, materials, contracting services, and other items necessary for the satisfactory operation of these services.

The general location of the Improvements within the District is shown in the illustration above. The maintenance, operation and servicing of the landscaping generally includes the following:

1. 9.37 acres of streetscapes
2. 7 large entry monument signs
3. 10,200 linear feet of 6' sound wall
4. 1,045 linear feet of iron fencing
5. 9.1 acres of open space
6. 2 mini parks
7. 16 irrigation controllers
8. 37 backflows
9. 27 corner pillars (between fences)
10. Redwoods on Black Diamond Drive
11. Open space/basin maintenance
12. Overall maintenance of sidewalks (pressure washing, crack filling, etc.)
13. Tree maintenance
14. Painting, replacing light poles
15. Replacing obsolete, inefficient, and aging infrastructure with new industry-standard equipment
16. Sufficient funding for current and future maintenance and replacement costs

2.2 Street Lighting

The Improvements include the maintenance, operation, and servicing of street lighting, including theme light poles, ornamental lighting and other appurtenant facilities in the public right of way areas throughout the boundary of the District. The Improvements are generally described as: maintenance, operation, and servicing of public street lighting facilities, including all works or improvements used or useful for the lighting of any public places, including ornamental standards, luminaires, poles, supports, tunnels, manholes, vaults, conduits, pipes, wires, conductors, guys, stubs, platforms, braces, transformers, insulators, contacts, switches, capacitors, meters, communication circuits, appliances, attachments, and appurtenances. Maintenance, operation, and servicing includes, but is not limited to, personnel, furnishing utilities, electrical energy and timing/switching, lamp changing, emergency services, pole painting, fixture cleaning, glassware replacement, and rehabilitation, which includes modernization and replacement of systems; repairs including poles, conduit, wiring and fusing, and fixtures repair and replacement; contracting services and other items necessary for the satisfactory operation of these services. Currently, there are 296 total streetlights within the District.

2.3 Public Art

The Improvements include the maintenance of public art pieces found in the boundary of the District. The City has 28 public art pieces, 21 of which are located within the District. The District will fund costs in

connection with the maintenance of the public art pieces including, but not limited to, personnel, supplies, contracting services, and other expenses necessary for the satisfactory maintenance of these art pieces located at village entries and mini parks.

3. Special Benefits

The Improvements will confer special benefits upon certain parcels within the proposed District based upon the parcel characteristics described in Section 5. This section provides a description of those special benefits.

Improvement	Benefit(s)
Landscaping, Public Art and Street Lighting	Improved Aesthetics and Improved Safety

3.1 Improved Aesthetics

The aesthetic benefit relates to the increase in the overall aesthetics as a result of the ongoing maintenance, operation, and servicing of the Improvements within the District. Specifically, the landscaping and public art are believed to create a more beautiful, aesthetically pleasing environment within the District, and they enhance the overall image and desirability of the properties within the District. A study by the University of Georgia found "People's preferences for locating areas of social interactions in calming, beautiful, and nature-dominated areas revolve around the presence of community trees and forests" (Coder, 1996). The same study noted "Large old street trees were found to be the most important indicator of attractiveness in a community" (Coder).

Conversely, "appeal decreases when Improvements are not well maintained, unsafe, or destroyed by vandalism" (The Victoria Transportation Institute, 2011). Streetscapes and public art have a significant effect on how people view and interact with their community. With streetscapes that are safe and inviting, and public art that is well maintained, people are more likely to walk, which can help reduce automobile traffic, improve public health, stimulate local economic activity, and attract residents and visitors to the community. Therefore, the landscaping and public art Improvements will confer aesthetic benefits to properties in close proximity.

Additionally, street lighting contributes to the aesthetic appeal of neighborhoods and support local economies by making non-residential areas more inviting. In fact, the streetlights themselves can contribute to the overall aesthetic of an area. According to an American Gas Lamp Works article titled Replacing Street Lights for Brighter and Safer Communities, "Well-lit streets aren't just a convenience – they're essential for a thriving community. Streetlights create a welcoming ambiance that invites people to linger in public spaces, supporting businesses and creating a cozy sense of belonging. Even the look of the streetlights themselves contributes to the overall aesthetic of a neighborhood."

3.2 Improved Safety

The Improvements will provide a measure of safety for pedestrian and vehicular traffic within the District. "Published studies having different methodologies tend to converge on an overall average reported 20% to 30% reduction in nighttime crash risk from lighting" (National Cooperative Highway Research Program Transportation Research Board of The National Academies, 2009). This is of particular importance in a residential area where pedestrians are likely to be present during nighttime hours. The same report also states, "... lighting has a positive effect on reducing crime ..." The increased level of visibility, during these

darker periods of the day, will reduce opportunities for potential vandalism and other property-related crimes. As further detailed, "Lighting has a positive effect on reducing crime and the positive benefits are similar to those observed for roadway lighting reducing crashes." The creation of a cohesive neighborhood is also accomplished by lighting in that "lighting may send a message that goes beyond visibility as a means for providing a community with crime-reducing benefit." (Review of the Safety Benefits and Other Effects of Roadway Lighting, National Cooperative Highway Research Program, Transportation Research Board of the National Academies, 2009).

Additionally, landscaping can improve safety in a community. Well-kept landscapes can help people see and avoid surprises and accidents. And proper drainage can help prevent drivers from losing control of their vehicles in the rain and keep pedestrians dry. According to Comparison of Safety Performance of Urban Streets Before and After Landscaping Improvements, "appropriately landscaped roadside scenes may have influence on travel-related stress recovery. In addition, it was revealed that landscaped center strips or median planting appears to reduce perceived land width and therefore, to discourage speeding. Generally, the discouraged speed is one of the contributing factors of decreases in crash rates or pedestrian accidents on streets." Therefore, the street lighting improvements will confer safety benefits.

4. Separation and Quantification of General Benefits

As described above, only special benefits are assessable; therefore, to assess only special benefits, the general benefits resulting from the Improvements must be separated and quantified. This section describes the process used to separate and quantify the general benefits.

4.1 General Benefit Analysis

As detailed below, it is estimated the Improvements will confer an Overall General Benefit of 7.56%. The amount of general benefit that is provided from the District's maintenance activities cannot be funded via property owners' assessments.

GENERAL BENEFIT: VEHICLES PASSING THROUGH THE DISTRICT

Traffic volume is utilized to help determine special benefits accruing to the District as opposed to the general benefits received by the public at large from the Improvements. As a result of the Improvements, there will be a level of general benefit conferred to pass-through vehicle traffic related to properties outside of the District whose occupants do not intend to access property within the District. As such, the benefit derived by pass-through vehicle traffic needs to be quantified. The percentage of pass-through vehicle traffic is calculated by comparing the estimated daily District generated vehicle trips to the total roadway design capacity, as detailed below.

In order to determine the average daily trips generated by parcels located within the District, the Institute of Transportation Engineer's (ITE) Trip Generation Handbook was utilized to estimate the average daily trip counts by land use classification for each parcel. Per the ITE Trip Generation User's Guide, a "Trip" is defined as a "single or one-direction vehicle movement with either the origin or the destination (exiting and entering) inside a study site. For trip generation purposes, the total trips for a land use over a given period of time are the total of all trips entering plus all trips exiting a site during a designated time period." The ADT rates used in this analysis are shown in the table on the following page and came from ITE Trip Generation Manual (11th Edition). Any future changes to a parcel's land use classification resulting in changes to the parcel's ADT rates will be based on the values found in the 11th Edition of the ITE Trip Generation Manual or the current edition as may be released from time to time, or similar manual in the event the ITE Manual is no longer published at the time of calculation. It should be noted that while Undeveloped/Utility Land Use Classifications may potentially utilize the Improvements on a limited basis, the ITE Manual does not provide ADT rates for these land uses. Therefore, the trip generation for these Land Use Classifications is zero.

TABLE 1. AVERAGE DAILY TRIP GENERATION WITHIN THE DISTRICT

Institute of Transportation Engineer's (ITE) Value(s)	Average Daily Trip Rate	Rate Per	Estimated Daily District Vehicle Trips
210 – SFR Detached Housing	9.43	Dwelling Unit	11,985.53
220 – MF Housing (Low Rise)	6.74	Dwelling Unit	2,412.92
310 – Hotel	7.99	Rooms	799.00
311 – All Suites Hotel	4.40	Rooms	369.60
411 – Park	59.53	Employee	476.24
411 – Park (Acres)	0.78	Acres	7.10
445 – Movie Theater	28.00	1,000 bldg. sq. ft. GFA	1,501.05
520 – Elementary School	2.27	Student	1,041.93
560 – Church	7.60	1,000 bldg. sq. ft. GFA	171.00
565 – Day Care	47.62	1,000 bldg. sq. ft. GFA	974.21
710 – General Office Building	10.84	1,000 bldg. sq. ft. GFA	681.39
720 – Medical-Dental Office Building	36.00	1,000 bldg. sq. ft. GFA	580.97
750 – Office Park	11.07	1,000 bldg. sq. ft. GFA	5,007.16
820 – Shopping Center (>150K)	37.01	1,000 bldg. sq. ft. GFA	10,626.72
822 – Strip Retail Plaza (<40k)	54.45	1,000 bldg. sq. ft. GFA	4,617.74
930 – Fast Casual Restaurant	97.14	1,000 bldg. sq. ft. GFA	1,404.84
932 – High Turnover (Sit Down) Restaurant	107.20	1,000 bldg. sq. ft. GFA	598.82
934 – Fast Food Rest w/ Drive Thru	467.48	1,000 bldg. sq. ft. GFA	3,316.30
945 – Convenience Store/Gas Stations	265.12	Vehicle Fueling Positions	4,241.92
948 – Automated Car Wash	77.50	Car Wash Tunnel	77.50
			50,891.94

Therefore, the number of estimated daily trips generated by the District is 50,891.94. The next step is to estimate the number of pass-through vehicle trips passing through the District.

Roadway design capacity is a critical element that affects trip distribution and was utilized in this analysis to estimate the number of daily vehicle trips passing through the District. From a visual inspection of the District, the primary higher functional classification roadways serving the District parcels are Folsom Blvd, Iron Point Rd. and Blue Ravine Rd. Roadway design capacities were estimated based on the functional classification of the roadway, the number of lanes and consultation with City staff. Roadway design capacity was calculated for the higher functional classification roadways (henceforth referred to as the "Major Roads") identified below in order to estimate the total daily traffic flow through the District.

TABLE 2. ROADWAY DESIGN CAPACITY THROUGH DISTRICT

Street	Roadway Classification	Roadway Design Capacity Through District ⁽¹⁾
Folsom Blvd.	Arterial	57,600
Iron Point Rd.	Arterial	50,400
Blue Ravine Rd.	Arterial	50,400
Total:		158,400

(1) Equals the design capacity of each roadway, reduced by 25% to recognize the City's "C" Level of Service.
Breakdown by street name above.

Therefore, the estimated number of pass-through vehicle traffic related to properties outside of the District is 107,508 of the vehicle trips through the District.

TABLE 3. ESTIMATED PASS THROUGH VEHICLE TRIPS

Roadway Design Capacity Through District	Estimated District- Generated Vehicle Trips	Estimated Pass-Through Vehicle Trips
158,400.00 ⁽¹⁾	-	50,891.94 = 107,508.06

(1) Breakdown by street name in Table 1 above.

However, simply estimating the number of pass-through vehicle trips alone is not an accurate indication of the level of benefit accruing to these vehicles. Estimating the total amount of time these pass-through vehicles spend within the District, as compared to the actual properties permanently within the District, is a better indicator of the temporary benefits accruing to the pass-through vehicles.

To estimate the total time these pass-through vehicles spend within the District on a daily basis, we must take into account the total length of the District along major streets and the average speed limit of these streets (using the local speed limit):

TABLE 4. ESTIMATED TRAVEL TIME THROUGH DISTRICT

Street	Length (in Miles) Within District	Average Speed (MPH)	Travel Time (in Hours) Through District per Vehicle
Folsom Blvd.	1.282	55	0.023
Iron Point Rd	1.087	45	0.024
Blue Ravine Rd.	0.702	45	0.016
Total:	3.071		0.063

Applying the travel time through the District per vehicle of 0.063 hours to each of the pass-through vehicle trips results in a total pass-through time of 6,780 hours per day, in which vehicles passing through the District spend time in proximity to the improvements:

TABLE 5.TOTAL PASS-THROUGH TIME

Travel Time (in Hours) Through District per Vehicle	Estimated Pass-through Vehicle Trips	Total Pass-through Time (in Hours)
0.063 x	107,508.06	= 6,780.46

We now need to relate this total daily pass-through time to the total time the District properties spend in permanent proximity to the improvements provided through the District:

TABLE 6. TOTAL PASS-THROUGH PERCENTAGE

Time Class	Hours	Percentage
Total Pass-Through Time	6,780	16.86%
Total District Property Time ⁽¹⁾	33,432	83.14%
Totals	40,212	100.00%

(1) Equals the number of assessable properties within the District (1,393) multiplied by 24 (hours).

The percentage of time spent by pass-through vehicles driving through the District is 16.86%. However, this is not yet the percentage of general benefit accruing to occupants of pass-through vehicles. Not all pass-through vehicles will travel the full length of the District. Some may only travel within a portion of the District, while some may travel its full length. Therefore, a reduction factor of 50% is applied. Furthermore, vehicles passing through the District only receive limited benefit from the landscaping and street lighting Improvements along sections of Blue Ravine Road and Iron Point Road, and no benefit from the public art Improvements as the art is only found within the parks as well as some of the interior neighborhood entries. Therefore, an additional reduction factor of 33% is applied. To recognize these reduced pass-through benefits, the adjusted total pass-through percentage is calculated on the following page.

TABLE 7. ADJUSTED TOTAL PASS-THROUGH PERCENTAGE

ITE Property Type	Estimated Daily Vehicle Trips
Total Pass-Through Percentage	16.86%
Reduction Factor for Length of Travel	50%
Reduction Factor for Reduced Special Benefit	66%
Adjusted Total Pass-through Percentage	5.56%

The 5.56% adjusted total pass-through percentage is considered the general benefit accruing to vehicles passing through the District, as a result of the improvements.

GENERAL BENEFIT: BICYCLE TRAFFIC

An estimated 1% of all US trips are made by bicycle. According to Walk Score, the community received a bikeable rating of 64 out of 100 and there are several bike lanes scattered throughout the District. According to the National Household Travel Surveys, 49% of bike trips are for recreation, exercise, and sports. As a result of the District maintenance improvements, there will be a level of general benefit to bicycle traffic that is not associated with property in the District. As such, the general benefit portion of the improved benefits resulting from the improvements is estimated to be .50%, rounded up to 1.00%, from bicycle traffic.

GENERAL BENEFIT: PEDESTRIAN TRAFFIC

Additionally, the commonly accepted distance people will walk for public transportation, goods and services is one-quarter mile. As a result of the District maintenance improvements, there will be a level of general benefit to pedestrian traffic that is not associated with property in the District. According to Walk Score, the community is mostly dependent upon vehicles to navigate, with a low walk score of 36 out of 100. However, there are multiple forms of public transportation available throughout the District. A person living within proximity of the District boundary may decide to walk to the bus stop for public transportation. As such the general benefit portion of the improved benefits resulting from the improvements is estimated to be 1.00% from pass-through pedestrian traffic.

OVERALL GENERAL BENEFIT

To determine an Overall General Benefit percentage to apply to the District, it is necessary to combine the separately analyzed components of each of the general benefits described above. As the benefits conferred by the Improvements are independent of each other, it is appropriate to combine the individual general benefit percentages to determine a cumulative Overall General Benefit. The table below summarizes the Overall General Benefit for the District.

TABLE 8. OVERALL GENERAL BENEFIT

General Benefit Category	General Benefit %
General Benefit: Pass-Through Traffic	5.56%
General Benefit: Pedestrians	1.00%
General Benefit: Bicycles	1.00%
Overall District General Benefit	7.56%

The general benefit, which is the percentage of the total budget that must be funded through sources other than assessments, is 7.56%. The special benefit, which is the percentage of the total budget that may be funded by assessments, is 92.44%.

5. Special Benefit Distribution

Once special benefits are identified, the cost of providing those special benefits must then be assigned, based on the estimated proportionate special benefit derived by each parcel. The proportionate special benefit that each parcel derives from the District's Improvements is calculated based on an analysis of each parcel's physical characteristics and land use classification. This section describes the assignment of special benefit to each parcel.

5.1 Parcel Characteristics

The method of apportioning benefit to parcels within the District reflects the proportional special benefit assigned to each property as a result of the Improvements, based upon the various property characteristics for each parcel as compared to other properties within the District. As part of the special benefit analysis, various property characteristics were analyzed including lot size, building size, distance from street lighting, and land use. Given that the special benefits provided by the Improvements focus on livability, safety, and aesthetics, it was determined that lot acreage, distance to lighting, and land use are the most appropriate parcel factors. Each parcel's lot acreage, proximity to lighting, and land use classification have been used as the primary assessment variables for the calculation and assignment of parcel factors.

LOT FACTOR

The average lot size for all assessable parcels within the District is approximately 0.26 acres. Each assessable parcel's actual lot acreage was divided by the District's average lot acreage to determine a Lot Factor. However, an average single-family home is situated on approximately 0.25 acres with an average building square footage of approximately 1,953. Therefore, to ensure those residential parcels sitting on lots larger than 0.25 acres are not paying a disproportionate share based upon the larger lot size, a maximum lot acreage of 0.25 acres has been assigned to those residential parcels with lot sizes exceeding 0.25 acres.

$$\text{Parcel's Lot Acreage} / \text{District's Average Lot Acreage} = \text{Parcel's Lot Factor}$$

It should be noted that Sacramento County secured roll data does not provide accurate acreage information for the parcels within the Waterford Place community located at 240 Natoma Station Drive. However, according to the CC&Rs for the community, the community is recognized as one single community with one common area. As a result, the total lot acreage for the entire community was measured in GIS at 18.91 acres. In order to allocate the total lot acreage to all assessable parcels within the Waterford Place community, each parcels individual building square footage was divided by the total building square footage of all parcels within the Waterford Place community in order to arrive at a percentage weighting to apply against the total lot acreage footprint.

Additionally, Sacramento County secured roll data does not provide accurate acreage information for the parcels within the Folsom Professional Center located at 193 Blue Ravine Road. However, the 26 parcels within the Folsom Professional Center are all contained within the same lot acreage footprint, measured by GIS as approximately 5.88 acres. Therefore, in order to allocate the total lot acreage to all assessable parcels within the Folsom Professional Center, each parcels individual building square footage was divided by the

total building square footage of all parcels within the Folsom Professional Center in order to arrive at a percentage weighting to apply against the total lot acreage footprint.

5.2 Lighting Factor

The street lights to be funded by the assessment are located throughout the District, along both the major and arterial streets as well as some of the interior streets and residential subdivisions. From every direction traversing the District, there is street lighting, offering a greater level of aesthetic and safety benefits. Therefore, all land use classifications are assigned a Lighting Factor of 1.0 to recognize the aesthetic and safety benefits received from the Street Lighting Improvements.

Additionally, as mentioned above, certain local streets contain interior street lighting, in some cases fronting the parcels, contributing to the enhanced character and safety of the surrounding area. It is recognized that standard street lights typically have a designed light distribution pattern that aims to provide adequate illumination along the roadway or surrounding area. Therefore, parcels in closer proximity to a street light will receive greater benefit from the street light improvements. Additionally, of the approximately 296 street lights in the District, 112 are considered interior street lights, approximately 38%. As a result, those parcels in closer proximity to interior street lighting were assigned an additional 0.38 Lighting Factor to recognize the aesthetic and safety benefits received from the Street Lighting Improvements.

5.3 Land Use Classifications

In addition to lot size and distance from the street lighting improvements, a parcel's land use will also affect the special benefits received. Following the calculation of each parcel's characteristic factors above, Land Use Benefit Points were assigned. These benefit points correspond to the special benefits described in Section 3.

Each parcel within the proposed District boundary is assigned a land use classification to determine the special benefits received. Below is a description of the land use classifications to be assessed within the District.

- **Residential Property** consists of parcels that have stand-alone residential dwelling units with their own lots intended for one family.
- **Non-Residential Property** consists of parcels used for non-profit or for profit purposes, including but not limited to:
 - Commercial or industrial including, but not limited to, retail, restaurants, commercial garages, private schools, churches, day care centers, gas stations, fast food restaurants, shopping plazas, hotels/motels, and parcels where goods are manufactured, warehoused, or distributed.
 - Office including government and public (excluding schools), medical, dental, and business parks.
 - Multi-Family Residential consisting of a single parcel or group of parcels offered for rent or ownership, containing apartments, units of 5 or more, exclusively for residential purposes.

- **School Property** consists of parcels that have public schools and associated parking lots, recreational facilities, parks, and undeveloped and open space lands.
- **Park/Recreational Property** consists of certain park parcels and trails, Oak Villa Pond and Natoma Station Pond which are not being maintained by the District nor included as part of the District Improvements.
- **Undeveloped/Utility Property** consists of parcels with utility towers, communications lines, gas and electric lines and easements, water, sanitation and irrigation lines and towers, and other apparatus related to the operation of utility parcels as well as public parking lots.

There are currently a total of 1,447 parcels in the District. Of those parcels, 1,393 parcels have been identified as assessable parcels. Those 54 parcels in the District deemed to receive no benefit from the Improvements that are non-assessable include easements, dedicated open space, roads, common areas, parcels containing the improvements themselves, and sliver parcels.

LAND USE BENEFIT POINTS

The table below summarizes the Land Use Benefit Points assigned to the various assessable land use classifications within the District:

TABLE 9. LAND USE BENEFIT POINTS

Landscaping, Street Lighting, and Public Art			
Land Use Classification	Aesthetic	Safety	Total Land Use Benefit Points
Residential	1.0	1.0	2.0
Non-Residential	1.0	1.0	2.0
School	0.50	0.50	1.0
Park/Recreational	0.25	0.25	0.50
Undeveloped/Utility	0.25	0.25	0.50

Aesthetic: The Aesthetic Benefits conferred by the Improvements are universal benefits for all land use classifications. The benefit of visual appeal is not restricted to a particular land use. A more attractive public environment benefits all parcels irrespective of land use classification. As noted in Section 3.1, the Improvements are believed to create a more beautiful, aesthetically pleasing environment within the District, and they enhance the overall image and desirability of the properties within the District. Accordingly, each assessable land use classification will be assigned 1.0 Aesthetic Benefit Point. However, School land use classifications are assigned 0.50 Aesthetic Benefits and Park/Recreational and Undeveloped/Utility land use classifications are assigned 0.25 Aesthetic Benefits because these property types do not receive the same level of special benefits associated with Aesthetic as do other properties.

Safety: The Safety Benefits conferred by the Improvements are universal benefits for all land use classifications within the District. Safety can be thought of as a universal need. As noted in Section 3.3 the Improvements will provide a measure of safety for pedestrian and vehicular traffic within the District. Accordingly, each assessable land use classification will be assigned 1.0 Safety Benefit Point. However, School land use classifications are assigned 0.50 Aesthetic Benefits and Park/Recreational and Undeveloped/Utility land use classifications are assigned 0.50 and 0.25 Safety Benefits because these

property types do not receive the same level of special benefits associated with Safety as do other properties.

5.4 Total Benefit Points

The calculation of Total Benefit Points for each parcel considers each component analyzed and described above: Lot Factor, Lighting Factor Land Use Classification. The formula for determining each parcel's Total Benefit Points is as follows:

$$(\text{Lot Factor} + \text{Lighting Factor}) \times \text{Total Land Use Benefit Points} = \text{Special Benefit Points}$$

The Total Special Benefit Points are computed for each parcel in the District and summed. The Total District Special Benefit Points are 5,535.36. These Total Special Benefit Points are used to determine the proposed assessment amounts on each parcel.

6. Budget

The following table summarizes the estimated annual costs to fund the Improvements for Fiscal Year 2025/26:

TABLE 10. FISCAL YEAR 2025/26 ESTIMATED BUDGET

Description	Amount
GENERAL MAINTENANCE COSTS	
Scheduled	\$105,000.00
Unscheduled	14,100.00
Streetlights	27,000.00
Irrigation	7,150.00
SERVICE COSTS	
Electrical	\$22,300.00
Water	49,500.00
CURRENT YEAR IMPROVEMENT PROJECTS	
Ladder Fuel Removal	\$6,200.00
INSTALLMENT COSTS	
Short-Term Installment Plan	\$55,200.00
Long-Term Installment Plan	70,000.00
OTHER	
Reserves	\$15,000.00
Contingency	5,000.00
<i>Subtotal</i>	\$376,450.00
INCIDENTAL COSTS	
Professional Services (ER & IP)	\$1,000.00
Contract Services (all other)	50,000.00
Staff	27,497.31
Overhead	6,250.00
County Auditor Fee	807.04
<i>Subtotal</i>	\$85,556.35
Total Cost of Improvements	\$462,006.35

6.1 Maximum Amount to be Assessed

The total maximum amount to be assessed upon the specially benefitting assessable parcels is the total cost of the improvements, as detailed above, less the portion of costs attributable to General Benefit as detailed in the Separation and Quantification of General Benefits section. The calculation of the balance to be assessed is shown on the following page:

TABLE 11. BREAKDOWN OF MAXIMUM TO BE ASSESSED

Description	Amount
Total Cost of Improvements	\$376,450.00
Less General Benefit Portion (7.56%)	(28,475.91)
Plus District Administrative Costs	\$85,556.35
Less Rounding ⁽¹⁾	(1.53)
Total Amount to Be Assessed in FY 2025/26	\$433,528.91

(1) The final assessment rates in Section 9 have been truncated to two decimal places.

Each year the estimated budget may change, which will cause a corresponding change in the dollar amount of general benefit. However, the general benefit percentage will remain at 7.56% in future years.

6.2 FY 2025/26 Maximum Assessment Rate

The Maximum Assessment Rate per Special Benefit Point is calculated by dividing the total costs to be Assessed by the total Special Benefit Points assigned to the parcels within the District for the Improvements. The following formula provides the assessment rate per Special Benefit Point for the Improvements.

$$\frac{\text{Total Improvement Costs to be Assessed}}{\text{Total Special Benefit Points}} = \text{Maximum Assessment Rate per Special Benefit Point}$$
$$\frac{\$433,530.44}{5,535.36} = \$78.32$$

The Maximum Assessment Rate per Special Benefit Point for the Improvements is then multiplied by each parcel's total special benefit points to determine the maximum assessment amount per parcel.

6.3 Annual Maximum Assessment Rate Inflation

Each parcel's maximum assessment is determined by multiplying the maximum assessment rate per special benefit point by the parcel's total special benefit points. If the total special benefit points for all assessable parcels in the District change in future years, the maximum allowable annual assessment rate per special benefit point will not be recalculated. The maximum allowable annual assessment rate per special benefit point, plus the annual cost of living inflator, will remain fixed. The actual annual assessment rate per special benefit point will be calculated by dividing the fiscal year's total cost of improvements to be assessed by the total special benefit points, not to exceed the maximum allowable annual assessment rate per special benefit point for that fiscal year. The maximum allowable assessment rate per special benefit point is escalated each year on July 1 by the annual change in the February-to-February Consumer Price Index for all Urban Consumers, for the San Francisco-Oakland-Hayward CA area ("CPI"), not to exceed 3% annually, beginning July 1, 2026.

In any given year, the assessments may be at any rate sufficient to meet the estimated budget and levied without undertaking an assessment ballot proceeding, as long as the actual assessment rate per special benefit point does not exceed the Maximum Assessment Rate per special benefit point as described above for that fiscal year. If the change in CPI effective for any fiscal year is determined to be negative, the

maximum assessment rate will remain unchanged from the previous fiscal year. The actual assessment rate may vary from year to year but will be no higher than the maximum rate.

6.4 Future Changes to Parcel Characteristics

Future changes to any of the parcel characteristics detailed in Section 5 will cause possible changes in the total assessment revenue. The assessment revenue for any given year will be the product of the District's parcel characteristics, special benefit points and the budget in effect for such fiscal year. Development within the District that increases the overall lot acreage, for example, will lead to possible increased assessment revenue, even if the assessment rate per special benefit point is not increased. By way of example, when a previously undeveloped parcel develops into a single-family residential land use classification, the parcel will no longer be assessed as an undeveloped land use, but rather as a single-family residential parcel with the updated parcel characteristics.

6.5 Data for Annual Assessment Calculations

Each year, as part of the assessment calculation procedures, the City or its designated consultant shall determine the land use and lot size for each parcel based on the County Assessor's use code or other supplementary information made available and deemed reliable. In the event the County Assessor's data is deemed to be unreliable, the City or its designated consultant shall utilize other sources of data including but not limited to City records, County Assessor's parcel maps, GIS data, and online research. Assessment amounts for each parcel may change over time in accordance with changes to parcel characteristics including land use classification and lot size.

6.6 Appeals

If any property owner believes the data used to calculate the assessment is inaccurate for any reason, the property owner shall submit, in writing, a request for review to the City. The property owner shall provide documentation to support the request for review. The City or its designated consultant shall review the request and provide a response to the property owner. The property owner must be current in the payment of all assessments when filing the request for review and must remain current during the review process.

If the review conducted by the City or its designated consultant results in the approval for changes to any parcel characteristics used to compute the assessment, the City or its designated consultant shall recalculate the assessment. When recalculating the assessment, the assessment rates actually applied in such fiscal year shall be used. Only the assessment for the parcel or parcels subject to review shall be recalculated.

If the recalculated assessment for the parcel or parcels being reviewed is less than the amount submitted to the County on the secured property tax roll, the difference shall be credited back to the property owner in a manner approved by the City. This credit shall be limited to the current fiscal year and the prior fiscal year, if applicable. The "fiscal year" shall follow the County's fiscal year for property taxes, from July 1 to June 30. The applicable fiscal year shall be determined by the date the request for review is submitted to the City.

The credit may be provided in the form of a check issued to the property owner, an adjustment to the current year's property tax roll (if possible), or a credit to the succeeding year's assessment thereby reducing the amount placed on the secured property tax roll for such year.

If the recalculated assessment is greater than the amount submitted to the County on the secured property tax roll, the City or its designated consultant shall apply the recalculated assessment to the succeeding year's property tax roll and no adjustments shall be made to the prior or current fiscal years' assessments.

In any dispute over parcel characteristic data used to compute assessments, the City or its designated consultant shall make a conclusive determination and its decision shall be final.

6.7 Method of Collection

The assessments will be collected annually on the Sacramento County secured property tax roll. The assessments will be subject to the County's assigned due dates and late penalties. However, the City or its designated consultant may choose to collect the assessments in an alternate manner (including directly billing the property owner) as may be deemed appropriate or necessary by the City or as allowed by law.

7. Engineer's Statement

The City of Folsom Natoma Station Maintenance Assessment District No. 2025-1 assessments described in this Report have been prepared pursuant to Article XIII D of the California Constitution. In preparing these assessments:

1. I have identified all parcels that will have a special benefit conferred upon them by the Improvements described in Section 2 of this Report (the "Specially Benefited Parcels").
 - a. For particulars as to the identification of these parcels, reference is made to the Assessment Diagram, a copy of which is included in Section 8 of this Report.
2. I have assessed the estimated costs and expenses of the Improvements upon the Specially Benefited Parcels. In making such assessment:
 - a. The proportionate special benefit derived from the Improvements by each Specially Benefited Parcel was determined in relationship to the entirety of the cost of the Improvements;
 - b. No assessment has been imposed on any Specially Benefited Parcel which exceeds the reasonable cost of the proportional special benefit conferred on such parcel by the Improvements; and
 - c. The general benefits have been separated from the special benefits and only special benefits have been assessed.

I, the undersigned, respectfully submit this Engineer's Report and, to the best of my knowledge, information and belief, this Engineer's Report, Assessments, and the Assessment Diagram herein have been prepared and computed in accordance with the Assessment Law.

By: John G. Egan
